# Latest Juniper JN0-224 Exam Duration, New JN0-224 Test Voucher

This is a good way to purchase valid exam preparation materials for your coming JN0-224 test. Good choice will make you get double results with half efforts. Good exam preparation will point you a clear direction and help you prepare efficiently. Our JN0-224 exam preparation can not only give a right direction but also cover most of the real test questions so that you can know the content of exam in advance. You can master the questions and answers of Juniper JN0-224 Exam Preparation, even adjust your exam mood actively.

## Juniper JN0-224 Exam Syllabus Topics:

| Topic | Details |
|-------|---------|
| Topic 1 | • Data Serialization: This domain addresses YAML and JSON formats used for structured data representation and exchange in network automation workflows. |
| Topic 2 | • Rest API: This domain covers Junos REST API implementation, REST API Explorer tool, and cURL usage for HTTP-based device management and configuration. |
| Topic 3 | • NETCONF<br>• XML API: This domain focuses on XML syntax, XPath expressions, NETCONF protocol, and XML API functionality for programmatic device configuration and communication. |
| Topic 4 | • Python<br>• PyEZ: This domain examines Python programming with PyEZ library for Junos automation, including JSNAPy, Jinja2 templates, RPC calls, exception handling, and device configuration management. |
| Topic 5 | • Junos Automation Stack and DevOps Concepts: This domain covers fundamental automation tools, frameworks, APIs, and DevOps culture applicable to Junos platform operations and network management. |

## New JN0-224 Test Voucher | Reliable JN0-224 Exam Vce

It is certain that the pass rate of our JN0-224 study guide among our customers is the most essential criteria to check out whether our JN0-224 training materials are effective or not. The good news is that according to statistics, under the help of our JN0-224 learning dumps, the pass rate among our customers has reached as high as 98% to 100%. It is strongly proved that we are professonal in this career and our JN0-224 exam braindumps are very popular.

# Juniper Automation and DevOps, Associate (JNCIA-DevOps) Sample Questions (Q43-Q48):

**NEW QUESTION # 43**
Which two programming languages are used for Junos on-box scripting? (Choose two.)

- A. XSLT
- B. Perl
- C. SLAX
- D. Ruby

**Answer: A,C**

Explanation:
Junos on-box scripting supports the following programming languages:
SLAX (C): SLAX (Structured Language for XML) is a scripting language designed specifically for Junos devices. It allows for easy manipulation of XML data, making it ideal for creating Junos scripts that interact with device configurations.
XSLT (D): XSLT (Extensible Stylesheet Language Transformations) is another language used for transforming XML documents into other formats. It is commonly used in Junos for transforming XML data into different views or outputs.
Options A (Perl) and B (Ruby) are not used for Junos on-box scripting. While these languages are popular in other contexts, Junos scripting relies heavily on XML-based languages like SLAX and XSLT.
Reference:
Junos XML API and Scripting Guide: Describes the use of SLAX and XSLT for on-box scripting.
Juniper Networks Automation Documentation: Provides examples and best practices for using SLAX and XSLT in Junos scripting.

**NEW QUESTION # 44**
Exhibit.

Referring to the exhibit, which two statements about the script are correct? (Choose two.)

- A. The script prints interface information for each interface name.
- B. The script retrieves the interface configuration in XML
- C. The script prints the name of each configured interface.
- D. The script retrieves the interface configuration in JSON.

**Answer: C,D**

**NEW QUESTION # 45**
What is the difference between a list and a tuple in Python?

- A. Lists are mutable objects that use square brackets, and tuples are immutable objects that use parentheses.
- B. Lists are immutable objects that use square brackets, and tuples are mutable objects that use parentheses.
- C. Lists are immutable objects that use parentheses, and tuples are immutable objects that use square brackets.
- D. Lists are mutable objects that use parentheses, and tuples are immutable objects that use square brackets.

**Answer: A**

Explanation:
In Python, the distinction between lists and tuples is essential for efficient programming:
Lists:
Mutable (B): This means that once a list is created, its elements can be changed, added, or removed. Lists are versatile and commonly used when the data is expected to change.
Square Brackets: Lists are defined using square brackets [].
Example:
my_list = [1, 2, 3]
my_list[0] = 10 # Modifying the first element
Tuples:
Immutable (B): Once a tuple is created, it cannot be altered. Tuples are used when a fixed collection of items is needed, providing more integrity to the data.

Parentheses: Tuples are defined using parentheses ().
Example:
my_tuple = (1, 2, 3)
# my_tuple[0] = 10 # This would raise an error because tuples are immutable Reference:
Python Official Documentation: The Python Language Reference provides detailed information on data types like lists and tuples, including their mutability and syntax.
Automation Scripts: In the context of automation, understanding when to use mutable or immutable data structures can significantly impact script performance and reliability.

## NEW QUESTION # 46
What are two Junos PyEZ configuration object methods? (Choose two.)

- A. config ()
- B. commie ()
- C. lockO
- D. device ()

**Answer: A,C**

Explanation:
In Junos PyEZ, the Config object provides various methods for interacting with device configurations. Two of the key methods are:
lock(): This method locks the candidate configuration database to prevent other users or processes from making changes while you are modifying the configuration.
config(): This method is used to create a Config object that represents the configuration database, allowing you to load, modify, and commit configuration changes.
Option C (lock) and Option D (config) are correct because they are valid methods provided by the PyEZ Config object.
Option A (commie) and Option B (device) are incorrect as they are not methods of the Config object.
Supporting Reference:
Junos PyEZ Documentation: Details the methods available in the Config object, including lock() and config().

## NEW QUESTION # 47
Which two statements about Junos automation are correct? (Choose two.)

- A. Junos automation does not allow for device provisioning throuqh the console port.
- B. The Junos REST API client is off-box.
- C. The Junos REST API client is on-box.
- D. Junos automation allows for device provisioning through the console port.

**Answer: C,D**

## NEW QUESTION # 48
......

Juniper offers a free demo version for you to verify the authenticity of the Juniper JN0-224 exam prep material before buying it. 365 days free upgrades are provided by Juniper JN0-224 exam dumps you purchased change. We guarantee to our valued customers that Juniper JN0-224 Exam Dumps will save you time and money, and you will pass your Juniper JN0-224 exam.
