If you buy our E_S4CPE_2405 Study Materials you will pass the E_S4CPE_2405 test smoothly. Our product boosts many advantages and it is your best choice to prepare for the test. Our E_S4CPE_2405 learning prep is compiled by our first-rate expert team and linked closely with the real exam.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q49-Q54):

NEW QUESTION # 49

Which of the following are responsibility definitions in responsibility management? Note: There are 2 correct answers to this question.

- A. Material group L002
- B. Operational purchaser
- C. Strategic purchasing
- D. Purchasing group 002

Answer: B,C

NEW QUESTION # 50

What must you do in SAP Cloud ALM to assign a business process test to a specific tester? Note: There are 2 correct answers to this question.

- A. Change the status to In Testing
- B. Assign the test case to a test plan
- C. Change the status to In Preparation
- D. Assign the test plan to a test case

Answer: B,D

Explanation:

In SAP Cloud ALM, assigning a business process test to a specific tester involves organizing test cases and test plans. Let's evaluate:

* A. Change the status to In Preparation: This is incorrect. Changing the status to "In Preparation" indicates the test case is being prepared, but it doesn't assign it to a tester-assignment is a separate action.

* B. Assign the test plan to a test case: This is correct in intent but worded imprecisely. In SAP Cloud ALM, you assign test cases to a test plan, and then within the Test Plan app, you assign testers to specific test cases. This option is functionally part of the process, as the test plan links test cases to testers.

* C. Assign the test case to a test plan: This is correct. In the Test Preparation app, test cases are created, and then in the Test Plan app, you assign them to a test plan. Subsequently, within the test plan, you assign individual testers to each test case, ensuring accountability.

* D. Change the status to In Testing: This is incorrect. Changing the status to "In Testing" occurs after assignment, when the tester begins execution, not as part of the assignment process.

In summary, to assign a business process test to a specific tester in SAP Cloud ALM, you must B(Assign the test plan to a test case) and C(Assign the test case to a test plan), with the subsequent step of assigning the tester within the test plan. Note: The phrasing of "B" reflects SAP's intent, though "C" is the more precise initial step.

NEW QUESTION # 51

What is the maximum file size when using the Local SAP S/4HANA Database Schema migration approach? Note: There are 2 correct answers to this question.

- A. 160 MB per ZIP file
- B. 100 MB per ZIP file

- C. 160 MB per file
- D. 100 MB per file

Answer: A,B

NEW QUESTION # 52

How do you set up SAP Test Automation by Tricentis for a customer?

- **A. With an app in SAP Cloud ALM**
- B. With an integration package from SAP Signavio Process Navigator
- C. With an app in SAP Business Technology Platform
- D. With an API from the SAP Business Accelerator Hub

Answer: A

NEW QUESTION # 53

What are the most important tasks in the Fit-to-Standard analysis and design workshops for a system conversion? Note: There are 2 correct answers to this question.

- A. Validating new functionality in the sandbox system
- **B. Capturing configuration requirements for the predefined solution**
- C. Capturing configuration requirements for new functionality
- **D. Validating the predefined solution in the sandbox system**

Answer: B,D

Explanation:

In a system conversion to SAP S/4HANA Cloud Private Edition, Fit-to-Standard analysis and design workshops focus on aligning existing business processes with the new system capabilities. Key tasks include:

Option A: Validating new functionality in the sandbox system

This option is incorrect. The primary focus is on existing processes rather than new functionalities.

Option B: Validating the predefined solution in the sandbox system

This option is correct. Workshops involve demonstrating current business processes in the sandbox system to ensure they function as expected post-conversion.

SAP Learning

Option C: Capturing configuration requirements for the predefined solution This option is correct. Identifying necessary configurations to align the system with existing business processes is essential during these workshops.

SAP Learning

Option D: Capturing configuration requirements for new functionality

This option is incorrect. The focus is on existing processes, not new functionalities.

In summary, during system conversion Fit-to-Standard workshops, validating the predefined solution in the sandbox system and capturing configuration requirements for existing processes are critical tasks to ensure a smooth transition.
