

# Microsoft DP-100 Exam | Reliable DP-100 Exam Practice - 100% Safe Shopping Experience

P.S. Free 2026 Microsoft DP-100 dumps are available on Google Drive shared by BootcampPDF: [https://drive.google.com/open?id=14rhzJ7zXC8wwQ6Nr7oRbClcIcyk\\_IW\\_](https://drive.google.com/open?id=14rhzJ7zXC8wwQ6Nr7oRbClcIcyk_IW_)

The Designing and Implementing a Data Science Solution on Azure (DP-100) questions are available in three easy-to-use forms. The first one is a Designing and Implementing a Data Science Solution on Azure (DP-100) Dumps PDF form, and it is printable and portable. You can print Designing and Implementing a Data Science Solution on Azure (DP-100) questions PDF or can access them by saving them on your smartphones, tablets, and laptops. The Designing and Implementing a Data Science Solution on Azure (DP-100) dumps PDF format can be used anywhere, anytime and is essential for students who like to learn from their smart devices for Designing and Implementing a Data Science Solution on Azure (DP-100) exam.

Microsoft DP-100 Exam is a great opportunity for data professionals to demonstrate their expertise in designing and implementing data science solutions on the Azure platform. Designing and Implementing a Data Science Solution on Azure certification can greatly enhance a candidate's career prospects as it is recognized by organizations around the world. Designing and Implementing a Data Science Solution on Azure certification demonstrates that a candidate has the skills and knowledge required to work with big data and machine learning on the Azure platform.

## Reliable DP-100 Exam Price & DP-100 Free Exam Dumps

We will give you full refund if you fail to pass the exam after purchasing DP-100 learning materials from us. We are pass guarantee and money back guarantee, and money will be returned to your payment account. We have a professional team to collect and research the latest information for DP-100 Exam Dumps, we can ensure you that the exam dumps you receive are the latest one we have. In order to let you know the latest information for the DP-100 learning materials, we offer you free update for one year, and the update version will be sent to your email automatically.

## Conclusion

Data science is a lucrative career option and you can explore it without any hassle if you've managed to taste success in the

Microsoft DP-100 Exam, which is known to create a skilled workforce of Azure data scientists. However, a great outcome in such a test will only come if the aspirant is referring to the updated and recent study resources like the official courses provided by the exam vendor itself.

## Microsoft Designing and Implementing a Data Science Solution on Azure Sample Questions (Q375-Q380):

### NEW QUESTION # 375

You run an experiment that uses an AutoMLConfig class to define an automated machine learning task with a maximum of ten model training iterations. The task will attempt to find the best performing model based on a metric named accuracy.

You submit the experiment with the following code:

You need to create Python code that returns the best model that is generated by the automated machine learning task. Which code segment should you use?

- A.
- B.
- C.
- D.

**Answer: B**

Explanation:

The `get_output` method returns the best run and the fitted model.

<https://notebooks.azure.com/azureml/projects/azureml-getting-started/html/how-to-use-azureml/automated-machine-learning/classification/auto-ml-classification.ipynb>

### NEW QUESTION # 376

You have a Python data frame named `salesData` in the following format:

The data frame must be unpivoted to a long data format as follows:

You need to use the `pandas.melt()` function in Python to perform the transformation.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Reference:

<https://pandas.pydata.org/pandas-docs/stable/reference/api/pandas.melt.html>

### NEW QUESTION # 377

You are producing a multiple linear regression model in Azure Machine Learning Studio.

Several independent variables are highly correlated.

You need to select appropriate methods for conducting effective feature engineering on all the data.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

Step 1: Use the Filter Based Feature Selection module

Filter Based Feature Selection identifies the features in a dataset with the greatest predictive power.

The module outputs a dataset that contains the best feature columns, as ranked by predictive power. It also outputs the names of the features and their scores from the selected metric.

Step 2: Build a counting transform

A counting transform creates a transformation that turns count tables into features, so that you can apply the transformation to

multiple datasets.

Step 3: Test the hypothesis using t-Test

### NEW QUESTION # 378

You have an Azure Machine learning workspace. The workspace contains a dataset with data in a tabular form.

You plan to use the Azure Machine Learning SDK for Python v1 to create a control script that will load the dataset into a pandas dataframe in preparation for model training. The script will accept a parameter designating the dataset. You need to complete the script.

How should you complete the script? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

### NEW QUESTION # 379

You train a machine learning model by using Azure Machine Learning.

You use the following training script in Python to log an accuracy value.

You must use a Python script to define a sweep job.

You need to provide the primary metric and goal you want hyper parameter tuning to optimize.

How should you complete the Python script? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 380
