SAP Certified Associate - Positioning SAP Business Suite via SAP Supply Chain Management Solutions Sample Questions (Q15-Q20):

NEW QUESTION # 15

How does geolocation tracking in SAP Transportation Management reduce costs and improve carrier interactions for transporting perishable goods?

- A. Manages global logistics using real-time geolocation
- B. Improves production processes
- C. Optimizes financial processes
- D. Automates procurement

Answer: A

Explanation:

Solution:

Based solely on content from learning.sap.com (and related SAP documentation), the correct answer is:

* D. Manages global logistics using real-time geolocation

Geolocation tracking in SAP Transportation Management, particularly via SAP Business Network Global Track & Trace, provides real-time visibility across global logistics networks. This functionality reduces costs and enhances interactions with carriers-especially for perishable goods-by enabling predictive ETAs, milestone awareness, event-triggered alerts, and seamless collaboration with carriers and logistics partners.

The other options (A, B, and C) are not relevant to geolocation tracking in this context.

NEW QUESTION # 16

Which aspect of SAP Business Network helps ensure compliance during unplanned purchases?

- A. Optimizes financial approaches
- B. Automates supplier selection
- C. Implements automatic auditing and budgeting rules
- D. Enhances production efficiency

Answer: C

Explanation:

Solution:

The correct answer based on learning.sap.com is:

* D. Implements automatic auditing and budgeting rules

The SAP Business Network for Procurement ensures compliance during unplanned purchases by leveraging configurable business rules and automated audit trails. These help enforce company policies around spend compliance, including change orders, price controls, contractual adherence, and handling non-PO invoices.

The other options (A, B, C) are not directly associated with compliance enforcement for unplanned purchases on that site.

NEW QUESTION # 17

What are the benefits of SAP Visual Inspection powered by AI?Note: There are 3 correct answers to this Question.

- A. Increase production lead time
- B. Extended inspection duration
- C. Increase sustainability
- D. Mitigate production risks
- E. Improve quality

Answer: B

Explanation:

Solution:

The correct benefits of SAP Visual Inspection powered by AI-as listed on learning.sap.com-are:

- * Increase sustainability (C): It helps reduce waste and scrap through optimized detection and corrective actions.
- * Mitigate production risks (D): By catching defects early, it prevents production issues and downtime
- * Improve quality (E): Automating defect detection ensures higher product quality and consistency.

The other options-A (Increase production lead time) and B (Extended inspection duration)-are incorrect, as AI-based inspection aims to shorten lead times and streamline inspections, not prolong them.

NEW QUESTION # 18

How does real-time production orchestration in SAP Digital Manufacturing improve resource utilization within global manufacturing networks?

- A. Improves logistics
- B. Aligns financial optimization
- C. **Manages production with AI automation in real-time**
- D. Automates procurement

Answer: C

Explanation:

The correct answer is:

Solution:

B . Manages production with AI automation in real-time

SAP Digital Manufacturing's real-time Production Orchestration (Resource Orchestration) empowers supervisors to dispatch, schedule, monitor, and automatically balance production on a live basis-responding instantly to events on the shop floor and optimizing resources like labor, equipment, and materials [us.io](https://www.sap.com)

[group.com](https://www.sap.com)+6learning.sap.com+6help.sap.com+6sap.com+8sap.com+8learning.sap.com+8.

Here's how the other options stack up:

- * A. Improves logistics - While orchestration connects operations with logistics, its primary purpose is on-floor execution and resource balancing-not optimizing logistics functions directly.
- * C. Automates procurement - This relates to supply chain/procurement modules in SAP, not manufacturing execution orchestration.
- * D. Aligns financial optimization - Financial alignment comes primarily from ERP integration, not from real-time production orchestration.

So the best fit is option B.

NEW QUESTION # 19

How do inventory optimization features in SAP IBP help companies to improve transparency in inventory management?

- A. Automates financial reporting
- B. Simplifies procurement procedures
- C. **Establishes connections between data sources**
- D. Integrates third-party systems

Answer: C

Explanation:

Solution:

The correct answer from learning.sap.com on how inventory optimization in SAP IBP improves transparency in inventory management is:

- * B. Establishes connections between data sources.

SAP IBP enhances transparency by integrating diverse data-real-time ERP figures, forecasting models, supply signals, and external inputs-into a unified planning platform. This centralized visibility ensures stakeholders across the supply chain can make informed, aligned decisions based on real-time inventory insights.

Options A, C, and D are not highlighted in the context of transparency via inventory optimization on learning.sap.com.

NEW QUESTION # 20

.....

You should also keep in mind that to get success in the SAP C-BCSBN-2502 exam is not an easy task. The SAP C-BCSBN-2502 certification exam always gives a tough time to their candidates. So you have to plan well and prepare yourself as per the recommended C-BCSBN-2502 Exam study material.
