These Google Cloud Digital Leader practice exams simulate the actual Cloud-Digital-Leader Exam conditions and provide an accurate assessment of test preparation. Our desktop-based Cloud-Digital-Leader practice exam software needs no internet connection.

Google Cloud Digital Leader Sample Questions (Q258-Q263):

NEW QUESTION # 258
Google offers Firebase, In terms of Firebase Console, any particular message that has to be deliv-ered to a customer at a certain degree of change in behavior can be managed through _____.

- A. None of the above

- B. A/B testing
- C. Firebase Remote config.
- D. Notification Composer

Answer: D

Explanation:
You can send notification messages using the Notifications composer in the Firebase console. Though this does not provide the same flexibility or scalability as sending messages with the Admin SDK or the HTTP and XMPP protocols, it can be very useful for testing or for highly targeted marketing and user engagement.
The Firebase console provides analytics-based A/B testing to help refine and improve marketing messages.
After you have developed logic in your app to receive messages, you can allow non-technical users to send messages per the instructions on the Notifications page in the Firebase Help Center.

NEW QUESTION # 259
A partner of yours used to have their own private data center. Your company was already on Google Cloud and now they have also moved to Google Cloud. You are investigating whether there are ways to collaborate better or shared services. What would be one good option to consider?

- A. Use VPC Peering to share resources privately between your two organizations.
- B. Use Private Service Access within Google Cloud.
- C. Use VPC Shared Networks to share common resources.
- D. Use public IP addresses as before. It will automatically be routed internally only.

Answer: A

Explanation:
VPC Network Peering allows internal IP address connectivity across two Virtual Private Cloud (VPC) networks regardless of whether they belong to the same project or the same organization.
-> Shared VPC is only within an organization - it allows an organization to connect resources from multiple projects to a common Virtual Private Cloud (VPC) network, so that they can communicate with each other securely and efficiently using internal IPs from that network.
-> Private Google Access is only to access Google APIs and services

NEW QUESTION # 260
Your organization needs to minimize how much it pays for data traffic from the Google network to the internet. What should your organization do?

- A. Deploy Cloud NAT.
- B. Choose the Premium network service tier.
- C. Choose the Standard network service tier.
- D. Deploy Cloud VPN.

Answer: C

Explanation:
Choose the Standard network service tier. While Premium tier is the default for all egress traffic and offers the highest performance, when cost is a consideration. Standard tier is the more economical.

NEW QUESTION # 261
An organization wants to move from a tactical cloud adoption approach to a transformational approach.
How should they change their cloud security?

- A. Emphasize strong perimeter security and trust in their private network.
- B. Provide staff identities using only Google Cloud authentication.
- C. Emphasize three main Identity Access Management roles: owner, editor, and viewer.
- D. Provide multiple layers of network security using a zero-trust model.

Answer: D

Explanation:
https://www.crowdstrike.com/cybersecurity-101/zero-trust-security/
Zero Trust is a security framework requiring all users, whether in or outside the organization's network, to be authenticated, authorized, and continuously validated for security configuration and posture before being granted or keeping access to applications and data

NEW QUESTION # 262

An organization has servers running mission-critical workloads on-premises around the world. They want to modernize their infrastructure with a multi-cloud architecture.
What benefit could the organization experience?

- A. Ability to disable regional network connectivity during cyber attacks
- B. Ability to keep backups of their data on-premises in case of failure
- C. Full management access to their regional infrastructure
- D. Reduced likelihood of system failure during high demand events

Answer: D

NEW QUESTION # 263

......
