Latest Microsoft SC-401 Test Online & SC-401 Test Review

If you need the SC-401 training material to improve the pass rate, our company will be your choice. SC-401 training materials of our company have the information you want, we have the answers and questions. Our company is pass guarantee and money back guarantee. We also have free demo before purchasing. Compared with the paper one, you can receive the SC-401 Training Materials for about 10 minutes, you don't need to waste the time to wait.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q203-Q208):

NEW QUESTION # 203

You have a Microsoft SharePoint Online site named Site1 that contains the files shown in the following table.

You have a data loss prevention (DLP) policy named DLP1 that has the advanced DLP rules shown in the following table.

You apply DLP1 to Site1.

Which policy tips will appear for File2?

- A. Tip1 and Tip2 only
- B. Tip1 only
- C. Tip2 only
- D. Tip3 only

Answer: C

Explanation:

Comprehensive Detailed Explanation with References

Step 1 - Review File2 contents

File2 contains 3 IP addresses.

Step 2 - Review DLP rules and priorities

RuleConditionPolicy TipStop Processing?Priority

Rule1 1 or more IP addressesTip1No0

Rule2 3 or more IP addressesTip2Yes1

Rule3 2 or more IP addressesTip3No2

Step 3 - Rule evaluation order

Advanced DLP rules are processed by priority order (lowest number first).

Rule1 (Priority 0) will trigger because File2 has at least 1 IP address.

This applies Tip1.

However, Rule1 has Stop Processing = No, so evaluation continues.

Rule2 (Priority 1) will also trigger because File2 has 3 IP addresses (#3).

This applies Tip2.

Rule2 has Stop Processing = Yes, so evaluation stops after this.

Rule3 (Priority 2) will not be evaluated because Rule2 stopped processing.

Step 4 - Final outcome

File2 matches Rule1 (Tip1), but since Rule2 fires afterward with Stop Processing = Yes, only Tip2 is applied.

Step 5 - Microsoft Reference

From Microsoft docs: "When a rule is configured to stop processing, subsequent rules are not evaluated and only the policy tip from the last triggered rule with stop processing applies." Reference: Order of rule processing in DLP policies

NEW QUESTION # 204

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Cloud Apps.

You need to ensure that you receive an alert when a user uploads a document to a third-party cloud storage service.

What should you use?

- A. an activity policy
- B. a file policy
- C. a sensitivity label
- D. an insider risk policy

Answer: A

Explanation:

Activity Policy (MCAS): Monitors and alerts on specific user actions such as uploading files, downloads, or logins to cloud apps.

Perfect for detecting "upload to third-party storage".

Sensitivity label: Used for classifying and protecting content, not generating alerts.

File policy (MCAS): Inspects and governs files already stored in sanctioned apps, not upload activity.

Insider risk policy: Focuses on risky behavior like data exfiltration or security violations, not direct activity alerts in cloud apps.

Answer: A. an activity policy

Reference: Defender for Cloud Apps activity policies

NEW QUESTION # 205

You have Microsoft 365 E5 subscription that uses data loss prevention (DLP) to protect sensitive information.

You have a document named Form.docx.

You plan to use PowerShell to create a document fingerprint based on Form.docx.

You need to first connect to the subscription.

Which cmdlet should you run?

- A. Connect-MgGraph
- B. Connect-SPOService
- C. Connect-IPPSSession
- D. Connect-ExchangeOnline

Answer: C

Explanation:

To create a document fingerprint in Microsoft 365 Data Loss Prevention (DLP), you need to use PowerShell for Microsoft Purview. The correct cmdlet to connect to the Microsoft 365 Security & Compliance Center (where DLP policies are managed) is Connect-IPSSession. This cmdlet establishes a PowerShell session to manage DLP policies, compliance settings, and document fingerprinting.

NEW QUESTION # 206

You have a Microsoft 365 subscription.

Users have devices that run Windows 11.

You plan to create a Microsoft Purview insider risk management policy that will detect when a user performs the following actions:

*Deletes files that contain a sensitive information type (SIT) from their device

*Copies files that contain a SIT to a USB drive

*Prints files that contain a SIT

You need to prepare the environment to support the policy.

What should you do?

- A. Configure the physical badging connector.
- B. Configure the HR data connector.
- C. Create a Microsoft Purview communication compliance policy.
- **D. Onboard the devices to Microsoft Purview.**

Answer: D

Explanation:

To ensure that Microsoft Purview Insider Risk Management can detect file deletions, USB copies, and print actions on sensitive information, you must onboard the Windows 11 devices to Microsoft Purview.

Device onboarding enables endpoint activity monitoring, allowing Purview to track and log user activities such as file deletions, USB transfers, and printing of sensitive files. Once onboarded, the Insider Risk Management policy can analyze these activities and generate risk alerts when sensitive information types (SITs) are involved.

NEW QUESTION # 207

Hotspot Question

You have a Microsoft 365 tenant.

You need to create a new sensitive info type for items that contain the following:

- An employee ID number that consists of the hire date of the employee followed by a three digit number

- The words "Employee", "ID", or "Identification" within 300 characters of the employee ID number What should you use for the primary and secondary elements? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Functions

Need to include use a date function for the primary element.

Note: Create custom sensitive information types

The primary element can be a Regular expression with an optional validator, a Keyword list, a Keyword dictionary, or one of the pre-configured Functions.

Box 2: A keyword list

Use a keyword list which includes the words "Employee", "ID", or "Identification".
