Are you ready to take your career to the next level with the Salesforce Certified MuleSoft Integration Architect I (MuleSoft-Integration-Architect-I)? Look no further than PDFDumps for all of your Salesforce Certified MuleSoft Integration Architect I (MuleSoft-Integration-Architect-I) exam needs. Our comprehensive and cost-effective solution includes regularly updated Salesforce MuleSoft-Integration-Architect-I Exam Questions, available in a convenient PDF format that can be downloaded on any device, including PC, laptop, mac, tablet, and smartphone.

If you buy our MuleSoft-Integration-Architect-I training quiz, you will find three different versions are available on our test platform. According to your need, you can choose the suitable version for you. The three different versions of our MuleSoft-Integration-Architect-I study materials include the PDF version, the software version and the online version. We can promise that the three different versions are equipped with the high quality. If you purchase our MuleSoft-Integration-Architect-I Preparation questions, it will be very easy for you to easily and efficiently find the exam focus and pass the MuleSoft-Integration-Architect-I exam.

## MuleSoft-Integration-Architect-I Certification Materials | Passing MuleSoft-Integration-Architect-I Score

Our MuleSoft-Integration-Architect-I practice prep is so popular and famous for it has the advantage that it can help students improve their test scores by improving their learning efficiency. Therefore, users can pass MuleSoft-Integration-Architect-I exams with very little learning time. For another example, there are some materials that apply to students with professional backgrounds that are difficult for some industry rookie to understand. But our MuleSoft-Integration-Architect-I Learning Materials are compiled to simple language for our customers to understand easily.

## Salesforce Certified MuleSoft Integration Architect I Sample Questions (Q248-Q253):

**NEW QUESTION # 248**  
Refer to the exhibit.

□ A Mule application is being designed to be deployed to several CloudHub workers. The Mule application's integration logic is to replicate changed Accounts from Satesforce to a backend system every 5 minutes. A watermark will be used to only retrieve those Satesforce Accounts that have been modified since the last time the integration logic ran.

What is the most appropriate way to implement persistence for the watermark in order to support the required data replication integration logic?

- 
- A. Persistent Cache Scope
- **B. Persistent Object Store**
- C. Persistent VM Queue
- D. Persistent Anypoint MQ Queue

**Answer: B**

Explanation:

\* An object store is a facility for storing objects in or across Mule applications. Mule uses object stores to persist data for eventual retrieval.

\* Mule provides two types of object stores:

- 1) In-memory store - stores objects in local Mule runtime memory. Objects are lost on shutdown of the Mule runtime.
- 2) Persistent store - Mule persists data when an object store is explicitly configured to be persistent.

In a standalone Mule runtime, Mule creates a default persistent store in the file system. If you do not specify an object store, the default persistent object store is used.

MuleSoft Reference: <https://docs.mulesoft.com/mule-runtime/3.9/mule-object-stores>

#### NEW QUESTION # 249

An external API frequently invokes an Employees System API to fetch employee data from a MySQL database. The architect must design a caching strategy to query the database only when there is an update to the Employees table or else return a cached response in order to minimize the number of redundant transactions being handled by the database.

- A. Use a Scheduler with a fixed frequency set to every hour to trigger an invalidate cache flow. Use an object-store-caching-strategy and the default expiration interval.
- B. Use a Scheduler with a fixed frequency set to every hour, triggering an invalidate cache flow. Use an object-store-caching-strategy and set the expiration interval to 1 hour.
- **C. Use an On Table Row operation configured with the Employees table, call invalidate cache, and hardcode the new Employees data to cache. Use an object-store-caching-strategy and set the expiration interval to 1 hour.**
- D. Use an On Table Row operation configured with the Employees table and call invalidate cache. Use an object-store-caching-strategy and the default expiration interval.

**Answer: C**

#### NEW QUESTION # 250

Which type of communication is managed by a service mesh in a microservices architecture?

- A. Communication between microservices developers
- B. Communication between microservices runtime administrators
- **C. Communication between microservices**
- D. Communication between trading partner services

**Answer: C**

Explanation:

In a microservices architecture, a service mesh manages the communication between microservices. This involves handling service discovery, load balancing, failure recovery, metrics, and monitoring. Service meshes also provide more complex operational requirements like A/B testing, canary releases, rate limiting, access control, and end-to-end authentication. By abstracting these functionalities away from individual microservices, a service mesh allows developers to focus on business logic while ensuring reliable and secure inter-service communication.

References:

\* Understanding Service Mesh

\* Service Mesh for Microservices

### NEW QUESTION # 251

A retailer is designing a data exchange interface to be used by its suppliers. The interface must support secure communication over the public internet. The interface must also work with a wide variety of programming languages and IT systems used by suppliers. What are suitable interface technologies for this data exchange that are secure, cross-platform, and internet friendly, assuming that Anypoint Connectors exist for these interface technologies?

- A. XML over ActiveMQ XML over SFTP XML/REST over HTTPS
- B. SOAP over HTTPS HOP over TLS gRPC over HTTPS
- C. EDIFACT XML over SFTP JSON/REST over HTTPS
- D. CSV over FTP YAML over TLS JSON over HTTPS

**Answer: A**

Explanation:

\* As per definition of API by Mulesoft, it is Application Programming Interface using HTTP-based protocols. Non-HTTP-based programmatic interfaces are not APIs.

\* HTTP-based programmatic interfaces are APIs even if they don't use REST or JSON. Hence implementation based on Java RMI, CORBA/IIOP, raw TCP/IP interfaces are not API's as they are not using HTTP.

\* One more thing to note is FTP was not built to be secure. It is generally considered to be an insecure protocol because it relies on clear-text usernames and passwords for authentication and does not use encryption.

\* Data sent via FTP is vulnerable to sniffing, spoofing, and brute force attacks, among other basic attack methods.

Considering the above points only correct option is

- XML over ActiveMQ
- XML over SFTP
- XML/REST over HTTPS

### NEW QUESTION # 252

A company wants its users to log in to Anypoint Platform using the company's own internal user credentials.

To achieve this, the company needs to integrate an external identity provider (IdP) with the company's Anypoint Platform master organization, but SAML 2.0 CANNOT be used. Besides SAML 2.0, what single- sign-on standard can the company use to integrate the IdP with their Anypoint Platform master organization?

- A. SAML 1.0
- B. OAuth 2.0
- C. Basic Authentication
- D. OpenID Connect

**Answer: D**

Explanation:

As the Anypoint Platform organization administrator, you can configure identity management in Anypoint Platform to set up users for single sign-on (SSO).

Configure identity management using one of the following single sign-on standards:

- 1) OpenID Connect: End user identity verification by an authorization server including SSO
- 2) SAML 2.0: Web-based authorization including cross-domain SSO

### NEW QUESTION # 253

.....

Our MuleSoft-Integration-Architect-I training guide has been well known in the market. Almost all candidates know our MuleSoft-Integration-Architect-I exam questions as a powerful brand. Once their classmates or colleagues need to prepare an exam, they will soon introduce them to choose our MuleSoft-Integration-Architect-I Study Materials. So our study materials are helpful to your preparation of the MuleSoft-Integration-Architect-I exam. As a matter of fact, we receive thousands of the warm feedbacks to thank us for helping them pass the exam.
