I27001F 덤프 CertiProf 인증 시험

IT업계에 계속 종사하고 싶은 분이라면 자격증 취득은 필수입니다. CertiProf I27001F 시험은 인기 자격증을 필수 시험과목인데 CertiProf I27001F 시험부터 자격증 취득에 도전해보지 않으실래요? CertiProf I27001F 덤프는 이 시험에 대비한 가장 적합한 자료로서 자격증을 제일 빠르게 간편하게 취득할 수 있는 지름길입니다. 구매전 덤프구매사이트에서 DEMO부터 다운받아 덤프의 일부분 문제를 체험해보세요.

최신 ISO 27000 I27001F 무료샘플문제 (Q26-Q31):

질문 # 26

Which statement describes the difference between ISO/IEC 27001:2022 and ISO/IEC 27002:2022?

- A. ISO/IEC 27002:2022 provides mandatory requirements for a risk management approach, and ISO/IEC 27001:2022 contains mandatory requirements for an ISMS
- B. ISO/IEC 27002:2022 provides guidance on measurement, and ISO/IEC 27001:2022 provides guidance on information security controls
- C. ISO/IEC 27002:2022 contains mandatory requirements, while ISO/IEC 27001:2022 provides guidance on information security controls
- **D. ISO/IEC 27001:2022 contains mandatory requirements, while ISO/IEC 27002:2022 provides guidance on information security controls**

정답: D

설명:

ISO/IEC 27001:2022 is the certifiable standard that contains requirements for establishing, implementing, maintaining, and continually improving an Information Security Management System. ISO/IEC 27002:2022 is not a certifiable requirements standard. It provides guidance for selecting, implementing, and managing information security controls, including the controls referenced in Annex A of ISO/IEC 27001:2022.

Therefore, option C is correct.

질문 # 27

In ISO/IEC 27001:2022, what does the information security risk assessment process refer to?

- A. Identifying risk owners
- **B. All of the above**
- C. Establishing and maintaining information security risk criteria
- D. Identifying information security risks

정답: B

설명:

ISO/IEC 27001:2022 requires the organization to establish and maintain information security risk criteria, identify information security risks, and identify risk owners as part of the risk assessment process. These activities are core elements of clause 6 on planning and risk assessment. Since all of the listed options are required parts of the process, the correct answer is D.

질문 # 28

According to the terms and definitions associated with ISO 27001, authenticity is defined as:

- A. The ability to prove that a claimed event has occurred or that a claimed action was performed by the entities that originated it
- B. None of the above
- C. The property of consistency in behaviour and intended results
- **D. The property that an entity is what it claims to be**

정답: D

설명:

In ISO information security terminology, authenticity means the property that an entity is what it claims to be.

This concept is distinct from non-repudiation, which relates to the ability to prove that an event or action occurred and cannot later be denied. It is also distinct from integrity, which concerns accuracy and completeness. Therefore, option B is correct.

질문 # 29

What does ISO/IEC 27001:2022 require for the control of documented information?

- A. Acquisition of a set of information security tools for effective documented information control
- B. A consultancy to accurately perform documented information control
- C. A person designated by top management with expertise to control documented information
- **D. Appropriate protection, for example, against loss of confidentiality, improper use, or loss of integrity**

정답: D

설명:

ISO/IEC 27001:2022 requires documented information to be controlled so that it is adequately protected. The standard specifically refers to protection from issues such as loss of confidentiality, improper use, and loss of integrity. It also requires documented information to be available and suitable for use where and when needed.

The standard does not require a consultancy, specific tools, or a single designated expert to meet this requirement. Therefore, option D is correct.

질문 # 30

How should top management provide evidence of its commitment to the Information Security Management System?

- A. By operating the Information Security Management System once it has been established
- B. By conducting an annual internal audit of the Information Security Management System
- **C. By communicating the importance of meeting ISMS requirements**
- D. By defining a risk assessment approach

정답: C

설명:

One of the explicit leadership responsibilities in ISO/IEC 27001:2022 is for top management to communicate the importance of effective information security management and of conforming to the ISMS requirements.

This communication helps demonstrate visible commitment and organizational direction. Conducting internal audits and defining the risk assessment approach are important activities within the ISMS, but they are not the best direct expression of top management's evidence of commitment among the options listed. Therefore, option A is correct.

질문 # 31

.....

CertiProf인증 I27001F시험은 멋진 IT전문가로 거듭나는 길에서 반드시 넘어야할 높은 산입니다. CertiProf인증 I27001F시험문제패스가 어렵다한들PassTIP덤프만 있으면 패스도 간단한 일로 변경됩니다. PassTIP의CertiProf인증 I27001F덤프는 100%시험패스율을 보장합니다. CertiProf인증 I27001F시험문제가 업데이트되면CertiProf인증 I27001F덤프도 바로 업데이트하여 무료 업데이트서비스를 제공해드리기에 덤프유효기간을 연장하는것으로 됩니다.
