

Free PDF Quiz 2026 Snowflake ADA-C02: SnowPro Advanced Administrator ADA-C02–Reliable Latest Exam Pattern

BTW, DOWNLOAD part of BraindumpsPass ADA-C02 dumps from Cloud Storage: <https://drive.google.com/open?id=1xTWxcN8eGqLLsaQBw7NiKJTHzYpQSZhC>

Do you want to spend half of time and efforts to pass ADA-C02 certification exam? Then you can choose BraindumpsPass. With efforts for years, the passing rate of ADA-C02 exam training, which is implemented by the BraindumpsPass website worldwide, is the highest of all. With BraindumpsPass website you can download ADA-C02 free demo and answers to know how high is the accuracy rate of ADA-C02 test certification training materials, and to determine your selection.

With the rise of internet and the advent of knowledge age, mastering knowledge about computer is of great importance. This ADA-C02 exam is your excellent chance to master more useful knowledge of it. Up to now, No one has questioned the quality of our ADA-C02 training materials, for their passing rate has reached up to 98 to 100 percent. If you make up your mind of our ADA-C02 Exam Questions after browsing the free demos, we will staunchly support your review and give you a comfortable and efficient purchase experience this time.

Pass Guaranteed 2026 ADA-C02: SnowPro Advanced Administrator ADA-C02 Useful Latest Exam Pattern

This is a crucial part of your study to know your mistakes and overcome them before the Snowflake ADA-C02 final test. Customizable test sessions allow you to modify the setting of the ADA-C02 mock test according to your training needs. Both Snowflake ADA-C02 Practice Tests desktop and web-based create a scenario that gives an exact feeling of the Snowflake ADA-C02 real test.

Snowflake SnowPro Advanced Administrator ADA-C02 Sample Questions (Q38-Q43):

NEW QUESTION # 38

An Administrator needs to configure a virtual warehouse in Snowflake for a new use case with these details:

1. There will be 50-100 concurrent users running reports
2. Minimize costs based on the number of active users at a given time
3. The virtual warehouse should suspend and resume automatically based on user activity

Which configuration will meet these requirements?

- A. create or replace warehouse reporting_wh
warehouse_size = xxxlarge
auto_suspend = 60
auto_resume = true;
- B. create or replace warehouse reporting_wh
warehouse_size = medium
auto_suspend = 600
auto_resume = true;
- C. create or replace warehouse reporting_wh
warehouse_size = medium
max_cluster_count = 10
scaling_policy = standard
auto_suspend = 600
auto_resume = true;
- D. create or replace warehouse reporting_wh
warehouse_size = xxxlarge
max_cluster_count = 10
scaling_policy = standard
auto_suspend = 600
auto_resume = false;

Answer: C

Explanation:

Supporting 50-100 concurrent users requires a multi-cluster warehouse so compute resources can scale to handle high concurrency. Setting a maximum cluster count allows Snowflake to automatically add clusters when query demand increases and reduce them when demand drops, which helps minimize cost based on active users. Enabling auto_suspend and auto_resume ensures the warehouse automatically stops when idle and restarts when queries arrive, further optimizing cost and operational efficiency.

NEW QUESTION # 39

What roles or security privileges will allow a consumer account to request and get data from the Data Exchange? (Choose two.)

- A. ACCOUNTADMIN
- B. IMPORT PRIVILEGES and SHARED DATABASE
- C. SECURITYADMIN
- D. IMPORT SHARE and CREATE DATABASE
- E. SYSADMIN

Answer: A,D

Explanation:

ACCOUNTADMIN role is required to access and manage Data Exchange listings and shares.

The IMPORT SHARE and CREATE DATABASE privileges are required to create databases from shared data.

NEW QUESTION # 40

What are benefits of creating and maintaining resource monitors in Snowflake? (Choose three.)

- A. Resource monitors add no additional load to virtual warehouse compute.
- B. Multiple resource monitors can be applied to a single virtual warehouse.
- C. Resource monitor governance is tightly controlled and monitors can only be created by the ACCOUNTADMIN role or users with the CREATE MONITOR privilege.
- D. Multiple triggers can be configured across various virtual warehouse thresholds.
- E. Resource monitors can be applied to more than one virtual warehouse.
- F. The cost of running a resource monitor is only 10% of a credit, per day of operation.

Answer: B,D,E

Explanation:

Multiple resource monitors can be assigned to a single virtual warehouse for granular credit control.

Resource monitors support multiple triggers at different usage thresholds.
A single resource monitor can govern multiple virtual warehouses.

NEW QUESTION # 41

A company has many users in the role ANALYST who routinely query Snowflake through a reporting tool. The Administrator has noticed that the ANALYST users keep two small clusters busy all of the time, and occasionally they need three or four clusters of that size.

Based on this scenario, how should the Administrator set up a virtual warehouse to MOST efficiently support this group of users?

- A. Create a standard X-Large warehouse, which is equivalent to four small clusters. Set the warehouse to auto-resume and auto-suspend, and give USAGE privileges to the ANALYST role.
- **B. Create a multi-cluster warehouse with MIN_CLUSTERS set to 2. Set the warehouse to auto-resume and auto-suspend, and give USAGE privileges to the ANALYST role. Allow the warehouse to auto-scale.**
- C. Create four virtual warehouses (sized Small through XL) and set them to auto-suspend and auto-resume. Have users in the ANALYST role select the appropriate warehouse based on how many queries are being run.
- D. Create a multi-cluster warehouse with MIN_CLUSTERS set to 1. Give MANAGE privileges to the ANALYST role so this group can start and stop the warehouse, and increase the number of clusters as needed.

Answer: B

Explanation:

A multi-cluster warehouse with MIN_CLUSTERS = 2 matches typical usage, while auto-suspend and auto-resume ensure resources are only used when needed. Allowing auto-scaling handles peak periods efficiently, and giving USAGE (not MANAGE) to ANALYST users is secure and appropriate.

NEW QUESTION # 42

An Administrator has been asked to support the company's application team need to build a loyalty program for its customers. The customer table contains Personal Identifiable Information (PII), and the application team's role is DEVELOPER.

```
CREATE TABLE customer_data (  
customer_first_name string,  
customer_last_name string,  
customer_address string,  
customer_email string,  
... some other columns,  
);
```

The application team would like to access the customer data, but the email field must be obfuscated.

How can the Administrator protect the sensitive information, while maintaining the usability of the data?

- **A. Use the CURRENT_ROLE context function to integrate with a masking policy on the fields that contain sensitive data.**
- B. Use the CURRENT_ROLE and CURRENT_USER context functions to integrate with a secure view and filter the sensitive data.
- C. Create a view on the customer_data table to eliminate the email column by omitting it from the SELECT clause. Grant the role DEVELOPER access to the view.
- D. Create a separate table for all the non-PII columns and grant the role DEVELOPER access to the new table.

Answer: A

Explanation:

The correct approach is to apply a dynamic data masking policy on the sensitive customer_email column. Using the CURRENT_ROLE context function in the masking policy allows the Administrator to obfuscate the email for the DEVELOPER role while maintaining usability of the data for other authorized roles.

NEW QUESTION # 43

.....

Our Software version of ADA-C02 study materials has the advantage of simulating the real exam. The timing function in this Software of our ADA-C02 guide questions helps them adjust their speeds to answer the questions and the function of stimulating the

ADA-C02 Exam can help the learners adapt themselves to the atmosphere and pace of the exam. Thus the learners can master our ADA-C02 practice engine fast, conveniently and efficiently.
