## C-BCBAI-2509リンクグローバル、C-BCBAI-2509問題集

お支払いが完了したら、すぐにC-BCBAI-2509ガイドトレントをダウンロードできます。支払いが正常に完了すると、10~15分でシステムから送信されたメールが届きます。その後、リンクをクリックしてログインすると、ソフトウェアを使用してC-BCBAI-2509 prepトレントをすぐに学習できます。私たちSAPのC-BCBAI-2509テスト準備は彼らにとって最高の学習を提供するだけでなく、学習者は購入後すぐにC-BCBAI-2509準備急流を学ぶことができるので、購入も便利です。したがって、使用と購入は学習者にとって非常に高速で便利です

## SAP C-BCBAI-2509 認定試験の出題範囲:

トピック	出題範囲

トピック 1	<ul style="list-style-type: none"> <li>Exploring Joule Agents: This section of the exam measures the skills of AI Solution Architects and emphasizes knowledge of Joule Agents. It involves exploring how these agents function, their integration into SAP systems, and their potential use cases. The section also addresses how Joule Agents support intelligent automation, improve productivity, and enable personalized enterprise solutions.</li> </ul>
トピック 2	<ul style="list-style-type: none"> <li>Positioning SAP Business AI: This section of the exam measures the skills of SAP Consultants and focuses on understanding how SAP Business AI fits into the SAP Business Suite. It covers the ability to explain the key concepts of Business AI, its role in modern enterprise solutions, and the value it delivers to customers. Candidates are expected to demonstrate knowledge of positioning AI capabilities in real business scenarios to enhance operational efficiency and decision-making.</li> </ul>

## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite 認定 C-BCBAI-2509 試験問題 (Q26-Q31):

### 質問 # 26

What is the semantic backbone of the AI Foundation that seamlessly links and context ualizes enterprise data for AI insights?

- A. Document grounding
- **B. SAP Knowledge Graph**
- C. Joule Studio
- D. SAP Document AI

正解: B

### 質問 # 27

In SAP Business AI, what are some safeguards for protecting customer data? Note: There are 3 correct answers to this question.

- **A. Tenant isolation**
- **B. Consent-based model training**
- **C. SAP-hosted AI infrastructure**
- D. Clean core maintenance

正解: A、B、C

解説:

SAP Business AI incorporates robust safeguards to protect customer data, ensuring privacy and compliance. The consent-based model training approach ensures that AI models are trained only on data for which explicit user consent has been obtained, aligning with global data protection regulations such as GDPR. This minimizes the risk of unauthorized data usage. SAP-hosted AI infrastructure provides a secure environment where data is processed within SAP's controlled, enterprise-grade cloud infrastructure, reducing exposure to external vulnerabilities. Tenant isolation ensures that each customer's data is stored and processed in a dedicated environment, preventing cross-tenant data leakage and enhancing security. These measures collectively uphold SAP's commitment to data privacy and security, as outlined in the SAP Business AI documentation. Clean core maintenance, while important for system efficiency, is not directly related to data protection. Sustainability is not a safeguard for customer data.

### 質問 # 28

(What are some functions that the SAP Build Code with code generation add-on provides? Note: There are 2 correct answers to this question.)

- A. Insert code snippets through Joule
- **B. Generate unit tests for ABAP classes**
- C. Refactor CAP projects
- **D. Explain existing code**

正解: B、D

解説:

Comprehensive and Detailed Explanation From Exact Extract: The SAP Build Code with code generation add-on, powered by Joule, provides functions such as explaining existing code through code reviews and comments, and generating unit tests for ABAP classes by selecting methods and using AI-based features to create tests efficiently.

Exact extracts supporting this:

Explain existing code: "/cap-edit-model: Edits existing CAP data models, supports code reviews, adds comments, and answers questions like 'Does this code follow the best practices of CAP?'"community.sap.com "/ui5: Explains UI5-related artifacts, e.g., 'What does the code in the main controller do?', with options to consider selected code without specifying files."community.sap.com "Code Commenting via Joule Code Assistant, generating explanatory comments for selected code, with accept/reject options."community.sap.com Generate unit tests for ABAP classes: "With Joule for developers, ABAP AI capabilities, you can easily access AI-based features designed to help you create ABAP Unit tests."help.sap.com "Navigate to any of the specified views and select a public method from a global ABAP class. Open the context menu and select Joule Generate Unit Tests."help.sap.com Other options are incorrect because:

Option B: While Joule supports inline code-completion for suggesting snippets, this is a general feature rather than a specific function of the code generation add-on, which focuses on broader generation tasks like models and tests rather than snippet insertion.

Option C: Refactoring is supported for CAP projects through editing models and code refactor assistants, but it is not highlighted as a primary function of the code generation add-on, which emphasizes generation and explanation over refactoring.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Community blogs like "Overview of all GenAI Options in SAP Build Code" and "Develop with Joule in SAP Build Code," as well as SAP Help Portal documentation on ABAP AI capabilities in SAP Build Code. These align with the C\_BCBAI\_2502 certification, positioning SAP Build Code as an AI-enhanced development tool within the SAP Business Suite for Java, JavaScript, and ABAP.

#### 質問 # 29

(How can Joule for ABAP development support developers? Note: There are 3 correct answers to this question.)

- A. By creating ABAP coding learning journeys
- **B. By creating unit tests**
- **C. By explaining ABAP code**
- **D. By generating ABAP business objects**
- E. By debugging ABAP programs

正解: B、C、D

解説:

Comprehensive and Detailed Explanation From Exact Extract: Joule for ABAP development supports developers by explaining ABAP code to aid understanding of logic and structure, creating unit tests to automate testing and improve code quality, and generating ABAP business objects to accelerate development using the ABAP RESTful Application Programming Model (RAP). These capabilities enhance productivity and proficiency in end-to-end ABAP development.

Exact extracts supporting this:

Explaining ABAP code: "Joule generates explanations of selected ABAP code or ABAP core data services (CDS) views to help you quickly understand the programming logic and code written ..."sap.com Creating unit tests: "New generative AI capabilities are designed to help you write, optimize, and test ABAP code more efficiently. From generating code suggestions

..."community.sap.com (Implying unit test generation as part of testing efficiency.) Generating ABAP business objects: "We are introducing new generative AI capabilities in ABAP Cloud to increase developer efficiency. The first scope of features will cover business object ..."learning.sap.com "Generative AI for ABAP development. With new ABAP capabilities, Joule can now help ABAP developers be more efficient with their development ..."community.sap.com Other options are incorrect because:

Option D: Joule provides suggestions and automation but does not directly debug programs; debugging remains a developer task supported by tools like ADT.

Option E: Joule focuses on practical development assistance rather than creating educational learning journeys, which are handled by SAP Learning platforms.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP News articles like "Introducing Joule for Developers: AI-Powered Capabilities Across SAP" and SAP Help Portal for "Joule for Developers, ABAP AI Capabilities." These position Joule as an AI tool for ABAP within the SAP Business Suite, as covered in the C\_BCBAI\_2502 certification and learning journeys for generative AI in development.

#### 質問 # 30

Within AI Foundation's layered architecture, which layer provides a unified entry point for development, operations, and administration?

- A. AI Kernel Layer
- B. Peripheral & Data Layer
- C. OS Interfaces Layer
- **D. AI Integration Layer**

正解: D

解説:

The AI Integration Layer within SAP's AI Foundation architecture serves as the unified entry point for development, operations, and administration. According to SAP Business AI documentation, this layer facilitates seamless interaction between AI components, SAP applications, and external systems, providing a centralized interface for developers, operators, and administrators. It supports tasks such as model deployment, monitoring, and governance, ensuring consistency and efficiency across AI operations. The OS Interfaces Layer handles system-level interactions, the Peripheral & Data Layer manages data access, and the AI Kernel Layer focuses on core AI processing, none of which serve as the unified entry point. This layer is critical for enabling scalable and integrated AI solutions.

### 質問 # 31

.....

人生にはいろいろな可能性があります。挑戦すれば、成功するかもしれません。C-BCBAI-2509試験は多くの人のにとって重要な試験です。そして、難しいです。しかし、C-BCBAI-2509復習教材を利用すれば、すべてのことは簡単になります。つまり、C-BCBAI-2509試験をパスしたい場合、C-BCBAI-2509復習教材は不可欠です。
