It ensures that candidates know the value of cloud solutions, the key concepts of ERP in the cloud, and how SAP's offering supports digital transformation for businesses.</li> </ul>

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q55-Q60):

### NEW QUESTION # 55

Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf?

Note: There are 2 correct answers to this question.

- A. An execution variant has not been maintained.
- B. The test process failed the execution pre-check.
- C. The process steps have been reordered.
- D. Data marked for deletion is picked for execution.

**Answer: A,B**

Explanation:

The following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

\* An execution variant has not been maintained: An execution variant is a set of test data that is used to execute a test process. It contains the input values and expected results for each test step. If an execution variant is not maintained for a test process, the system cannot run the test automatically and will skip it1.

\* The test process failed the execution pre-check: The execution pre-check is a validation that is performed before the test execution to ensure that the test process and the execution variant are consistent and complete. If the execution pre-check fails, it means that there are some issues or gaps in the test process or the execution variant that need to be resolved before the test can be run2.

The following would not prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

\* Data marked for deletion is picked for execution: Data marked for deletion is data that is no longer relevant or valid for the test process. It can be marked for deletion by the customer or by SAP. However, this does not affect the test execution, as the system

will ignore the data marked for deletion and use the available data for the test process3.

\* The process steps have been reordered: The process steps are the individual actions that are performed as part of the test process. They can be reordered by the customer or by SAP to reflect the changes in the business process or the user interface. However, this does not affect the test execution, as the system will follow the order of the process steps as defined in the test process4.

## NEW QUESTION # 56

To which partner role does the IT Contact first assign access permission for SAP Cloud ALM?

- A. Lead configuration expert
- B. LoB configuration expert
- C. Communication contact
- D. Project manager

**Answer: D**

Explanation:

The IT Contact is the person who receives the welcome email from SAP and is responsible for setting up the initial access to SAP Cloud ALM. The IT Contact needs to eventually provide all project team members access to SAP Cloud ALM, but it's most important the partner and customer project managers are given access first, because they are responsible for setting up the implementation project and assigning tasks to the other project team members1. The project manager is a partner role that has the authorization to create and manage projects in SAP Cloud ALM2. References = Setting up the Implementation Project in SAP Cloud ALM, Teams, Roles, and Access Restrictions | SAP Help Portal In the context of SAP Cloud ALM (Application Lifecycle Management), the IT Contact is typically responsible for the initial setup and assignment of roles within the project. The first role to which the IT Contact often assigns access permission is:

\* Project manager: The project manager plays a crucial role in overseeing the SAP project's planning, execution, and completion. By assigning access permission to the project manager first, the IT Contact ensures that the project manager has the necessary tools and insights to manage the project effectively within SAP Cloud ALM. This access allows the project manager to monitor project progress, manage resources, and make informed decisions, facilitating successful project execution and alignment with business goals.

Granting the project manager access to SAP Cloud ALM is a strategic decision that empowers them to lead the project efficiently, leveraging the platform's capabilities for project management, monitoring, and collaboration.

## NEW QUESTION # 57

Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf? Note: There are 2 correct answers to this question.

- A. The process steps have been reordered.
- B. An execution variant has not been maintained.
- C. The test process failed the execution pre-check.
- D. Data marked for deletion is picked for execution.

**Answer: A,B**

## NEW QUESTION # 58

In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Add blocking reasons for billing.
- B. Change approval thresholds.
- C. Modify building blocks.
- D. Create new scope items.
- E. Add new sales organizations.

## Answer: A,B,E

### Explanation:

In the Product-Specific Configuration Phase within SAP Central Business Configuration, several key activities can be performed to tailor the SAP S/4HANA Cloud system to meet specific business needs:

- \* Add new sales organizations: This activity involves setting up new sales organizations within the system, defining the structure of the sales department, and aligning it with the company's sales strategies and territories. This setup is crucial for managing sales processes, customer relationships, and sales reporting.
- \* Change approval thresholds: Modifying approval thresholds is an essential configuration activity that adjusts the approval limits for various transactions, ensuring that the approval process aligns with the company's internal control and governance policies. This can involve setting different thresholds for purchase orders, expense approvals, and other financial transactions.
- \* Add blocking reasons for billing: This configuration activity allows the company to define specific reasons for blocking billing documents, ensuring that billing does not proceed under certain conditions until the issues are resolved. This is critical for maintaining accurate and compliant billing processes.

These activities are part of the detailed configuration work that tailors the SAP S/4HANA Cloud system to the specific operational needs of the business, ensuring that the software supports the company's unique processes and policies.

## NEW QUESTION # 59

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create business processes with a high number of people involved in a pre-defined sequence
- B. To create standard procedures from SAP Signavio Process Navigator
- C. To create complex, repeated work processes with iterative cycles
- D. To create cross-product workflow procedures
- E. To create very simple release or approval procedures

## Answer: A,C,D
