SAP C_SEC_2405 Exam Syllabus Topics:

--

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Topic 2	<ul style="list-style-type: none"> • Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
Topic 3	<ul style="list-style-type: none"> • User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.
Topic 4	<ul style="list-style-type: none"> • SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.

SAP Certified Associate - Security Administrator Sample Questions (Q33-Q38):

NEW QUESTION # 33

In S/4HANA on-premise, which of the following combinations is required to grant a business user access to data from a Core Data Services (CDS) view using the standard ABAP authorization concept and authorization object S_RS_AUTH?

- A. *ACDS role with access conditions based on authorization object S_RS_AUTH
*A PFCG role with authorization for object S_RS_AUTH
*Assignment of the PFCG role to the business user. D.
- B. *A CDS role with access conditions based on authorization object S_RS_AUTH,
*APFCG role with authorization for object S_RS_AUTH and assignment of the PFCG role
*The CDS role to the business user.
- C. *A CDS role with access conditions based on authorization object S_RS_AUTH
*APFCG role containing the CDS role and access conditions based up authorization object S_RS_AUTH
*Assignment of the PFCG role to the business user. C.
- D. *A CDS role with access conditions based on authorization object S_RS_AUTH
*APFCG role containing the CDS role and access conditions based up authorization object S_RS_AUTH
*Assignment of the PFCG role and the CDS role to the business user.

Answer: D

NEW QUESTION # 34

Which privilege types are available in SAP HANA Cloud? Note: There are 3 correct answers to this question.

- A. Analytic
- B. Application
- C. Package
- D. Object
- E. System

Answer: C,D,E

Explanation:

* Context:Privileges in SAP HANA Cloud define access control and permissions for various system entities.

* Solution Descriptions:

* B. Package: Grants permissions for packages, a logical grouping of objects.

* C. System: Controls system-level actions and configurations.

- * E. Object: Provides access control at the object level.
- SAP Security References:
- * SAP HANA Cloud Privilege Management Documentation

NEW QUESTION # 35

Which of the following are SAP Fiori Launchpad functionalities? Note: There are 2 correct answers to this question.

- A. SAP GUI
- **B. User Actions Menu**
- C. Web Dynpro
- **D. Spaces**

Answer: B,D

Explanation:

The SAP Fiori Launchpad is a central entry point for accessing applications in SAP S/4HANA, and it includes specific functionalities to enhance user experience. "Spaces" is a key feature that organizes applications into logical groups, making navigation intuitive for users. The "User Actions Menu" provides personalized options, such as user settings, app finder, and logout, enabling users to interact efficiently with the system. In contrast, SAP GUI is a traditional interface for SAP systems, not a Fiori Launchpad feature, and Web Dynpro is a technology for web-based applications that may be accessed via the Launchpad but is not a core functionality. These distinctions ensure that the Fiori Launchpad remains a modern, user-friendly interface for SAP applications.

NEW QUESTION # 36

When you maintain authorizations for SAPUI5 Fiori apps, which of the following object types is the front-end authorization object type?

- A. TADIR INA1 - InA Service
- B. TADIR IWSG - SAP Gateway: Service Groups Metadata
- **C. TADIR IWSV - SAP Gateway Business Suite Enablement-Service**
- D. TADIR G4BA - SAP Gateway Odata V4 Backend Service Group & Assignments

Answer: C

Explanation:

For SAPUI5 Fiori apps, the front-end authorization object type is TADIR IWSV (SAP Gateway Business Suite Enablement-Service). This object type represents the OData services used by Fiori apps on the front-end server, and its authorization is managed via the S_SERVICE authorization object in PFCG roles. The IWSV type specifically defines the services that the front-end server calls to access back-end data, requiring start authorizations and default values to be included in the role. TADIR IWSG is used for service group metadata, not front-end authorizations, and TADIR G4BA pertains to OData V4 services, which are less common in standard SAPUI5 Fiori apps. TADIR INA1 is related to InA (Information Access) services, not typical Fiori app authorizations. By using IWSV, SAP ensures that front-end authorizations are correctly aligned with the OData services powering Fiori apps, providing secure and efficient access control in SAP S/4HANA systems.

NEW QUESTION # 37

In SAP S/4HANA Cloud Public Edition, what can you do with the Display Authorization Trace? Note: There are 3 correct answers to this question.

- **A. Display business roles granting specific access**
- B. Adjust role restrictions to account for missing authorizations
- **C. Analyze authorization check results for missing authorizations**
- D. Adjust role restrictions to further limit access when performing forensic analysis
- **E. Analyze authorization check results for already assigned authorizations**

Answer: A,C,E

NEW QUESTION # 38

.....
