# Free PDF NCP-CI-Azure - Accurate Valid Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Test Pdf

P.S. Free 2026 Nutanix NCP-CI-Azure dumps are available on Google Drive shared by TopExamCollection:
https://drive.google.com/open?id=10S1kfekL3taZD5_lZgJcXrwFxFS2Q8SV

With our NCP-CI-Azure study materials, only should you take about 20 - 30 hours to preparation can you attend the exam. The rest of the time you can do anything you want to do to, which can fully reduce your review pressure. Saving time and improving efficiency is the consistent purpose of our NCP-CI-Azure Learning Materials. With the help of our NCP-CI-Azure exam questions, your review process will no longer be full of pressure and anxiety.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploying an NC2 on Azure Environment: This section assesses the skills of Nautanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.
Topic 2	• Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.
Topic 3	• Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.
Topic 4	• Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.

Valid NCP-CI-Azure Exam Sample, NCP-CI-Azure Reliable Braindumps Sheet

Overall, we can say that with the Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) (NCP-CI-Azure) exam you can gain a competitive edge in your job search and advance your career in the tech industry. However, to pass the Nutanix NCP-CI-Azure Exam you have to prepare well. For the quick Nutanix NCP-CI-Azure exam preparation the NCP-CI-Azure Questions is the right choice.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q45-Q50):

NEW QUESTION # 45
An administrator just completed the initial account setup tasks for NC2 on Azure, such as creating a My Nutanix account, starting a 30-day free trial for NC2 on Azure, and setting up the Azure account and subscription.
Which two additional actions should the administrator take before creating a cluster? (Choose two.)

- A. Allowlisting the Azure Subscription
- B. Configure VPN for connectivity
- C. Purchasing an Azure savings plan
- D. Creating an App Registration

Answer: A,D

Explanation:
* Allowlisting the Azure Subscription:This step ensures that the Azure subscription is recognized and permitted by Nutanix Cloud Clusters (NC2). Without allowlisting, the necessary resources and permissions within the Azure subscription may not be available for NC2, potentially blocking the creation and management of clusters.
* Creating an App Registration:This involves setting up an application within Azure Active Directory (AAD) to enable secure communication between NC2 andAzure. The app registration process includes assigning permissions and obtaining necessary authentication credentials, facilitating the interaction and management of Azure resources by NC2.
References:
* Nutanix Documentation on NC2 Setup
* Azure Active Directory Application Registration Guide

NEW QUESTION # 46
An administrator is deploying an NC2 cluster in Azure and observes on NC2 console that nodes will not progress and continue in a Booting state.
What is the most likely cause for the node not continuing to deploy?

- A. A private DNS server is being used that is not reachable.
- B. The Azure account does not have an active subscription.
- C. The subscription has not been validated to be allowlisted by Microsoft.
- D. An Azure Support case must first be submitted for allowlisting the Azure subscription.

Answer: C

Explanation:
Azure Subscription Validation: When deploying an NC2 cluster, the Azure subscription must be validated and allowlisted by Microsoft. This is a crucial step to ensure that the necessary permissions and configurations are set up for the deployment.
Booting State Issue: If the nodes are stuck in the Booting state, it often indicates that the subscription has not been properly validated and allowlisted. This prevents the deployment from progressing as required resources and permissions are not fully accessible.
Checking Allowlisting Status: Administrators should verify that their subscription has been allowlisted by contacting Azure support or checking the status through the Azure portal.
Resolution: Once the subscription is validated and allowlisted by Microsoft, the deployment should proceed without the nodes getting stuck in the Booting state.

NEW QUESTION # 47
An administrator has noticed the company's NC2 free trial expired 60 days ago.
Whatshouldthe administrator do to continue using all of the NC2 features on existing clusters?

- A. Contact the cloud vendor.
- B. Nothing. The clusters will have full feature support.
- C. Switch to a paid subscription plan.
- D. Contact Nutanix support to redeploy the cluster.

Answer: C

Explanation:
* Free Trial Expiration:Once the NC2 free trial period expires, the administrator needs to switch to a paid subscription plan to
continue using all the features and functionalities provided by Nutanix NC2.
* Paid Subscription Benefits:Transitioning to a paid subscription ensures uninterrupted access to NC2 features, support, and
updates, maintaining the operational capabilities of the existing clusters.
References:
* Nutanix Subscription and Billing Documentation
* Nutanix NC2 Support and Subscription Guide

NEW QUESTION # 48
An administrator has recently deployed an NC2 on azure cluster, but does not have connectivity back to the on-premises
environment. The administrator would like to start working on configuring the new cluster.
What is the best way to get access to PrismCentral?

- A. Deploy a Jump HostInstanceIn the PrismCentral VNet inside a delegated subnet
- B. Deploy a Jump Host in an external VNet and peer the VNets for communication between bare-metal VNet and the Jump
Host VNet.
- C. Deploy a Jump Host instance in the same subnet as the bare-metal.
- D. Deploy a Jump Host in an external VNet and peer the VNets for communication between PrismCentral VNet and the
Jump Host VNet.

Answer: D

Explanation:
* Jump Host Deployment:A Jump Host provides a secure method to access the NC2 environment when direct connectivity is
unavailable. Deploying it in an external VNet allows flexibility in managing network access and security.
* VNet Peering:By peering the external VNet (where the Jump Host is deployed) with the VNet containing PrismCentral, the
administrator can establish a communication pathway. This setup enables secure and controlled access to PrismCentral fromthe
Jump Host.
References:
* Azure VNet Peering Documentation
* Nutanix NC2 Configuration and Access Guide

NEW QUESTION # 49
Exhibit.

An administrator is trying to figure out why the NC2 cluster deployment in Azure failed.
Which issue might be the cause?

- A. The company does not have sufficient NCI/AOS licenses.
- B. The selected bare metal node type is not supported in the deployment region.
- C. The administrator has not specified a DNS server during deployment.
- D. DNS servers are not reachable from cluster management VNet.

Answer: B

Explanation:
* Error Message Analysis:The error message indicates that the node cannot boot successfully and will be replaced with a new node. This points towards an issue related to the specific node type or configuration.
* Bare Metal Node Support:One common cause for such deployment failures is selecting a bare metal node type that is not supported in the chosen deployment region. Azure has specific regions where certain node types are available, and attempting to use an unsupported node type in a region can result in provisioning failures.

NEW QUESTION # 50

......

TopExamCollection Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) (NCP-CI-Azure) practice test software is the answer if you want to score higher in the Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) (NCP-CI-Azure) exam and achieve your academic goals. Don't let the NCP-CI-Azure certification exam stress you out! Prepare with our NCP-CI-Azure exam dumps and boost your confidence in the Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) (NCP-CI-Azure) exam. We guarantee your road toward success by helping you prepare for the Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) (NCP-CI-Azure) certification exam. Use the best TopExamCollection Nutanix NCP-CI-Azure practice questions to pass your Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) (NCP-CI-Azure) exam with flying colors!
