

Free PDF Quiz CompTIA - DS0-001 - Authoritative Certification CompTIA DataSys+ Certification Exam Book Torrent

BONUS!!! Download part of ExamDumpsVCE DS0-001 dumps for free: <https://drive.google.com/open?id=1IUiWCFu11b1NS3APxes9acPL8c9Fjm6g>

Many people are keen on taking part in the DS0-001 exam, The competition between candidates is fierce. If you want to win out, you must master the knowledge excellently. Our DS0-001 training quiz is your best choice. With the assistance of our DS0-001 study materials, you will advance quickly. Also, all DS0-001 Guide materials are compiled and developed by our professional experts. So you can totally rely on our DS0-001 exam simulating to aid you pass the exam. Furthermore, you will learn all knowledge systematically, which can help you memorize better.

CompTIA DS0-001 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Database Management and Maintenance: Here, you'll learn about monitoring and reporting for database management and performance, common database maintenance processes, documentation production, and relevant tools usage. Lastly, the topic focuses on implementing data management tasks.

Topic 2	<ul style="list-style-type: none"> • Database Deployment: In this topic, you'll find discussions on database planning and design aspects. It also focuses on the implementation, testing, and deployment phases of databases.
Topic 3	<ul style="list-style-type: none"> • Business Continuity: Finally, this topic covers the importance of disaster recovery techniques. Moreover, the topic explains backup and restore best practices and processes.
Topic 4	<ul style="list-style-type: none"> • Data and Database Security: This topic focuses on data security concepts, governance and regulatory compliance purposes, implementing authentication and authorization policies and best practices. Additionally, the topic discusses database infrastructure security, and understanding types of attacks and their effects on data systems.
Topic 5	<ul style="list-style-type: none"> • Database Fundamentals: This topic covers database structure types, SQL code development and modification based on scenarios, comparison of scripting methods and environments, and the impact of programming on database operations.

Pass Guaranteed High Hit-Rate CompTIA - DS0-001 - Certification CompTIA DataSys+ Certification Exam Book Torrent

Different with other similar education platforms on the internet, the DS0-001 guide torrent has a high hit rate, in the past, according to data from the students' learning to use the DS0-001 test torrent, 99% of these students can pass the qualification test and acquire the qualification of their yearning, this powerfully shows that the information provided by the DS0-001 Study Tool suit every key points perfectly, targeted training students a series of patterns and problem solving related routines, and let students answer up to similar topic.

CompTIA DataSys+ Certification Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78

Which of the following is part of logical database infrastructure security?

- A. Surveillance
- B. Cooling system
- C. Biometric access
- D. Perimeter network

Answer: A

Explanation:

The option that is part of logical database infrastructure security is perimeter network. Perimeter network, also known as DMZ (Demilitarized Zone), is a network segment that lies between an internal network and an external network, such as the internet. Perimeter network provides an additional layer of security for the internal network by isolating and protecting the servers or services that are exposed to the external network, such as web servers, email servers, database servers, etc. Perimeter network also helps prevent unauthorized access or attacks from the external network to the internal network by using firewalls, routers, proxies, etc. The other options are either part of physical database infrastructure security or not related to database infrastructure security at all. For example, surveillance is a method of monitoring and recording physical activities or events in a location or resource; biometric access is a device that uses biological characteristics to control access to a physical location or resource; cooling system is a device or system that regulates the temperature and humidity of a location or resource.

NEW QUESTION # 79

Which of the following database instances are initiated by default when a database administrator installs a SQL Server instance for the first time? (Choose two.)

- A. Index
- B. View
- C. Root

- D. Master
- E. Log
- F. Model

Answer: D,F

NEW QUESTION # 80

A group of developers needs access to a database in a development environment, but the database contains sensitive data. Which of the following should the database administrator do before giving the developers access to the environment?

- A. Remove sensitive data from tables
- B. Encrypt connections to the development environment.
- C. Audit access to tables with sensitive data.
- D. Mask the sensitive data.

Answer: D

Explanation:

The database administrator should mask the sensitive data before giving the developers access to the environment. Data masking is a technique that replaces sensitive data with fictitious but realistic data, such as random numbers or characters, to protect it from unauthorized access or exposure. Data masking preserves the format and structure of the original data, but does not reveal its actual value. This allows developers to work with realistic data without compromising its confidentiality or compliance. The other options are either insufficient or excessive for this scenario. For example, auditing access to tables with sensitive data may help monitor and track who accesses the data, but does not prevent it from being seen; removing sensitive data from tables may compromise the quality or completeness of the data, and may not be feasible if there is a large amount of data; encrypting connections to the development environment may protect the data in transit, but not at rest or in use. Reference: CompTIA DataSys+ Course Outline, Domain 4.0 Data and Database Security, Objective 4.2 Given a scenario, implement security controls for databases.

NEW QUESTION # 81

A database administrator needs to aggregate data from multiple tables in a way that does not impact the original tables, and then provide this information to a department. Which of the following is the best way for the administrator to accomplish this task?

- A. Create a function.
- B. Create indexes on those tables
- C. Create a new database.
- D. Create a materialized view.

Answer: D

Explanation:

The best way for the administrator to accomplish this task is to create a materialized view. A materialized view is a type of view that stores the result of a query on one or more tables as a separate table in the database. A materialized view can aggregate data from multiple tables in a way that does not impact the original tables, and then provide this information to a department as a single source of truth. A materialized view also improves query performance and efficiency by reducing the need to recompute complex queries every time they are executed. The other options are either not suitable or not optimal for this task. For example, creating indexes on those tables may improve query performance on individual tables, but not on aggregated data; creating a new database may require additional resources and maintenance, and may introduce inconsistency or redundancy; creating a function may require additional coding and execution, and may not store the result as a separate table. Reference: CompTIA DataSys+ Course Outline, Domain 2.0 Database Deployment, Objective 2.2 Given a scenario, create database objects using scripting and programming languages.

NEW QUESTION # 82

A DBA is reviewing the following logs to determine the current data backup plan for a primary data server:

Timestamp	Activity	Size	Duration
2023-Jan-23 23:59:00	Back up to disk	7.35GB	03:14:55
2023-Jan-24 23:59:00	Back up to disk	0.12GB	00:14:22
2023-Jan-25 23:59:00	Back up to disk	1.11GB	01:11:55
2023-Jan-26 23:59:00	Back up to disk	1.23GB	01:22:12
2023-Jan-27 23:59:00	Back up to disk	1.22GB	01:19:56
2023-Jan-28 23:59:00	Back up to disk	1.21GB	01:17:19
2023-Jan-29 23:59:00	Back up to disk	0.94GB	01:01:29
2023-Jan-30 23:59:00	Back up to disk	8.1GB	03:45:66

Which of the following best describes this backup plan?

- A. Daily differential
- B. Monthly full, daily differential
- C. Daily full
- D. Weekly full, daily incremental

Answer: D

Explanation:

The backup plan that best describes the logs is weekly full, daily incremental. This means that a full backup of the entire database is performed once a week, and then only the changes made since the last backup are backed up every day. This can be inferred from the logs by looking at the size and duration of the backups. The full backups are larger and take longer than the incremental backups, and they occur every seven days. The other backup plans do not match the pattern of the logs. Reference: CompTIA DataSys+ Course Outline, Domain 5.0 Business Continuity, Objective 5.2 Given a scenario, implement backup and restoration of database management systems.

NEW QUESTION # 83

.....

We also provide timely and free update for you to get more DS0-001 questions torrent and follow the latest trend. The DS0-001 exam torrent is compiled by the experienced professionals and of great value. You can master them fast and easily. We provide varied versions for you to choose and you can find the most suitable version of DS0-001 Exam Materials. So it is convenient for the learners to master the DS0-001 questions torrent and pass the DS0-001 exam in a short time.
