

JN0-253 Exam Papers | JN0-253 Valid Test Voucher

P.S. Free & New JN0-253 dumps are available on Google Drive shared by DumpsKing: <https://drive.google.com/open?id=1nICDrNBu9uiAs5AfeTV8iLldZGNCKLRT>

There is a succession of anecdotes, and there are specialized courses. Experts call them experts, and they must have their advantages. They are professionals in every particular field. The JN0-253 test material, in order to enhance the scientific nature of the learning platform, specifically hired a large number of qualification exam experts, composed of product high IQ team, these experts by combining his many years teaching experience of JN0-253 quiz guide and research achievements in the field of the test, to exam the popularization was very complicated content of Mist AI, Associate (JNCIA-MistAI) exam dumps, better meet the needs of users of various kinds of cultural level. Expert team not only provides the high quality for the JN0-253 Quiz guide consulting, also help users solve problems at the same time, leak fill a vacancy, and finally to deepen the user's impression, to solve the problem of Juniper test material and no longer make the same mistake.

Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.
Topic 2	<ul style="list-style-type: none">Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.
Topic 3	<ul style="list-style-type: none">Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.
Topic 4	<ul style="list-style-type: none">Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.

Topic 5	<ul style="list-style-type: none"> Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.
Topic 6	<ul style="list-style-type: none"> Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.

JN0-253 Valid Test Voucher, High JN0-253 Quality

JN0-253 answers real questions can help candidates have correct directions and prevent useless effort. If you still lack of confidence in preparing your exam, choosing a good JN0-253 answers real questions will be a wise decision for you, it is also an economical method which is saving time, money and energy. Valid JN0-253 Answers Real Questions will help you clear exam at the first time, it will be fast for you to obtain certifications and achieve your dream.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q50-Q55):

NEW QUESTION # 50

Which protocol does Mist cloud use to send and receive data to connected access points?

- A. PTP
- **B. HTTPS**
- C. SSH
- D. MQTT

Answer: B

Explanation:

Mist Cloud Communication Protocol: The Mist cloud platform uses HTTPS (Hypertext Transfer Protocol Secure) to communicate with connected access points. This ensures that the data sent and received is encrypted and secure, adhering to modern security standards(Juniper Networks).

Security and Reliability: Using HTTPS provides a secure channel over which configuration changes, updates, and monitoring data can be safely transmitted between the Mist cloud and the access points. This protocol is widely accepted and trusted for secure communications over the internet.

NEW QUESTION # 51

Exhibit:

Referring to the exhibit, which percentage of Coverage was unsuccessful?

- **A. 21%**
- B. 15%
- C. 9%
- D. 79%

Answer: A

Explanation:

InJuniper Mist Wireless Assurance, theCoverage SLE (Service Level Expectation)measures the quality and consistency of Wi-Fi signal coverage across an organization's wireless infrastructure. It provides insight into how well clients can connect to access points with sufficient signal strength and quality.

According to theJuniper Mist AI Operations and Analytics Guide, the Coverage SLE is defined as:

"The percentage of client connections that meet the minimum signal strength threshold required for satisfactory performance. Sub-threshold values represent areas where coverage is inadequate or inconsistent." In the exhibit, the SLE visualization shows79% successful coverageand21% unsuccessful coverage, meaning that21% of connection attempts or client areas did not meet the desired signal strength threshold. These failures may be caused by factors such as:

- * Insufficient AP density or placement.
- * RF interference from neighboring devices.
- * Physical obstructions impacting signal propagation.

Thus, the unsuccessful coverage percentage is 21%, indicating potential areas where additional APs or configuration optimization may be needed to improve user experience.

NEW QUESTION # 52

Your manager asks you to set up a new WLAN that is Open Access and does not allow any connected clients to communicate with each other.

From the WLAN configuration, which feature would you use to separate the clients?

- A. Hide SSID.
- B. Configure geofence.
- C. Configure isolation.
- D. Filter ARP.

Answer: C

Explanation:

To set up a new WLAN that is Open Access and prevents connected clients from communicating with each other, you should use the Configure Isolation feature. This feature, often referred to as client isolation, ensures that each client can only communicate with the access point and not with other clients on the same WLAN.

NEW QUESTION # 53

In the context of Juniper Mist, which two statements describe a bad user minute? (Choose two.)

- A. A way to normalize a user's negative network experience.
- B. The number of minutes a device is down multiplied by the number of users affected.
- C. The number of affected users multiplied by the number of minutes they are affected.
- D. A metric that tracks how many minutes a user is connected to a network.

Answer: A,C

Explanation:

In Juniper Mist AI, the concept of a Bad User Minute (BUM) is a core metric used within Service Level Expectations (SLEs) and the AI-driven analytics engine to quantify negative user experience.

According to the Juniper Mist AI Operations and SLE Analytics Guide, a "bad user minute" is defined as:

"A normalized measure that represents one minute of degraded user experience for one user." Mist AI calculates this by multiplying the number of affected users by the number of minutes they experience poor performance. This allows administrators to understand the impact of network issues not just in duration, but in terms of total user experience degradation.

For example, if ten users experience poor connectivity for one minute, the system records 10 bad user minutes.

This normalization helps Juniper Mist prioritize incidents based on impact, rather than duration alone, allowing administrators to focus on issues that affect the greatest number of users.

Therefore:

- * B is correct - it's a way to normalize a user's negative experience.
- * D is correct - it's calculated as number of affected users × number of minutes affected.

NEW QUESTION # 54

What are Audit Logs used for in Juniper Mist?

- A. to view error information about all devices in the organization
- B. to manage subscriptions and orders
- C. to view a complete record of logins

- D. to set up your organization

Answer: C

Explanation:

Audit Logs in Juniper Mist are used to view a complete record of logins. The documentation states: "On the Audit Logs page, you can see who logged in to the Juniper Mist portal, when they logged in, and what they did." Audit Logs also record configuration and administrative actions by users on all sites within the organization, enabling administrators to track activity for compliance, troubleshooting, and security. This comprehensive record assists with accountability and change tracking, but they do not manage subscriptions, organization setup, or error logs for all devices. Filtering options allow for activity analysis over selectable time periods, by users, and by site to provide detailed insights into administrative behavior and user access history.

NEW QUESTION # 55

.....

If you can get the certification for the exam, it not only can prove the ability of you but also can improve your competitive force in the job hunting market. JN0-253 exam braindumps are high quality and accuracy, and we can help you pass the exam in your first attempt, otherwise we will give you refund. Moreover, JN0-253 test materials contain most of the knowledge points for the exam, and you can pass the exam as well as improve your ability in the process of learning. JN0-253 exam materials offer you free update for 365 days after payment, and the update version will be sent to your email automatically.
