

F5CAB4 Latest Braindumps - F5CAB4 Guaranteed Questions Answers

Score Report

F5CAB4 - BIG-IP Administration Control Plane Administration

Exam Score Report

Date Tested: 12/31/2025

Candidate: [REDACTED]

Thank you for completing the F5CAB4 - BIG-IP Administration Control Plane Administration exam. Based on preliminary exam scoring, you have **Passed**.

This is a preliminary result. Your exam results can be found in the Education Services Portal within 24 hours.

P.S. Free 2026 F5 F5CAB4 dumps are available on Google Drive shared by Braindumpsqa: <https://drive.google.com/open?id=1isfhg4JtCPHcU3v8k8JlB18PU69alfV9>

Nowadays a lot of people start to attach importance to the demo of the study materials, because many people do not know whether the F5CAB4 study materials they want to buy are useful for them or not, so providing the demo of the study materials for all people is very important for all customers. A lot of can have a good chance to learn more about the F5CAB4 Study Materials that they hope to buy.

The clients only need 20-30 hours to learn the F5CAB4 exam questions and prepare for the test. Many people may complain that we have to prepare for the test but on the other side they have to spend most of their time on their most important things such as their jobs, learning and families. But if you buy our F5CAB4 Study Guide you can both do your most important thing well and pass the F5CAB4 test easily because the preparation for the test costs you little time and energy.

F5 F5CAB4 Guaranteed Questions Answers, F5CAB4 Valid Exam Blueprint

There is a succession of anecdotes, and there are specialized courses. Experts call them experts, and they must have their advantages. They are professionals in every particular field. The F5CAB4 test material, in order to enhance the scientific nature of the learning platform, specifically hired a large number of qualification exam experts, composed of product high IQ team, these experts by combining his many years teaching experience of F5CAB4 quiz guide and research achievements in the field of the test, to exam the popularization was very complicated content of BIG-IP Administration Control Plane Administration exam dumps, better meet the needs of users of various kinds of cultural level. Expert team not only provides the high quality for the F5CAB4 Quiz guide consulting, also help users solve problems at the same time, leak fill a vacancy, and finally to deepen the user's impression, to solve the problem of F5 test material and no longer make the same mistake.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q16-Q21):

NEW QUESTION # 16

When looking at this BIG-IP prompt: root@virtual-bigip1] Peer Time Out of Sync What does the message indicate? (Choose one answer)

- A. That there was a time synchronization issue between the BIG-IP device and its peer
- B. That one of the NTP sources has a skewed clock
- C. That the peer BIG-IP is unreachable for the device group
- D. That the local time is correct, but the remote time is incorrect

Answer: A

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

On BIG-IP systems that participate in a Device Service Cluster (DSC), each device compares the remote device's system time to its own system time. If the difference is outside the ConfigSync time threshold (commonly referenced as 3 seconds by default), BIG-IP updates the shell prompt to show "Peer Time Out of Sync", and ConfigSync operations may fail until time is corrected (typically by

fixing NTP reachability/configuration, or in some cases adjusting the threshold). (cdn.studio.f5.com) This message is specifically about time drift between peers in the trust domain/DSC-not basic reachability (so B is not what it means), and it does not prove which side is "correct" (so C is too specific). It also doesn't directly mean an NTP source is "skewed" (A can be a cause, but the prompt message itself indicates the peer-to-peer time mismatch condition). (cdn.studio.f5.com)

NEW QUESTION # 17

A node is a member of various pools and hosts different web applications. If a web application is unavailable, the BIG-IP appliance needs to mark the pool member down for that application pool. What should a BIG-IP Administrator deploy at the pool level to accomplish this?

- A. An HTTP monitor with custom send/receive strings
- B. A combination of ICMP + TCP monitor
- C. A TCP monitor with a custom interval/timeout
- D. A UDP monitor with a custom interval/timeout

Answer: A

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

To accurately report the current status of specific web applications hosted on the same server (node), the Control Plane must use a monitor that operates at the application layer.

* Application-Specific Monitoring: While a node (the IP address) might be up and responding to ICMP (ping) or TCP handshakes, a specific web service or path on that server could be failing.

* Custom Send Strings: An HTTP monitor allows the administrator to define a "Send String" to request a specific page or URI related to the application in that pool.

* Receive Strings: The "Receive String" identifies a unique value that the application must return to be considered "Available".

* Granular Status Reporting: By deploying these monitors at the pool level, the Control Plane can mark a pool member "Offline" for one application pool if the receive string is missing, while keeping it "Available" in another pool where the service is still healthy.

NEW QUESTION # 18

A configuration change is made on the standby member of a device group. What is displayed as "Recommended Action" on the Device Management Overview screen?

- A. Activate device with the most recent configuration
- B. Synchronize the standby member configuration to the group
- C. Synchronize the active member configuration to the group.
- D. Force active member of device group to standby

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: The BIG-IP Control Plane monitors the "Commit ID" of the configuration on all group members. When a change is made on the Standby unit, it becomes the member with the most recent configuration. The "Recommended Action" in the HA status dashboard will be to synchronize that specific device's configuration to the rest of the group to ensure consistency

NEW QUESTION # 19

One of the two members of a device group has been decommissioned. The BIG-IP Administrator tries to delete the device group, but is unsuccessful. Prior to removing the device group, which action should be performed?

- A. Disable the device group
- B. Remove all members from the device group
- C. Make sure all members of the device group are in sync
- D. Remove the decommissioned device from the device group

Answer: B

Explanation:

To maintain integrity in a High Availability environment, TMOS prevents the deletion of active Device Groups. Procedurally, a device group is a container for synchronization; the Control Plane requires that you first strip the group of all associated members (devices) before the group object itself can be removed from the configuration.

NEW QUESTION # 20

An LTM device has a virtual server mapped to www.f5.com. Users report that when they connect to /resources/201.1.2h.l_l.com they are unable to receive content. What is the likely cause of the issue?

- A. The virtual address does not have route advertising enabled.
- B. The pool associated with the virtual server is failing its health check.
- C. The virtual address does not have ARP enabled.
- D. The pool associated with the virtual server does not have priority group activation enabled.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: The Control Plane is responsible for ARP (Address Resolution Protocol) management for Virtual Addresses. For a Virtual Server to be reachable, the BIG-IP must respond to ARP requests for that IP. If the "ARP" setting is disabled on the Virtual Address properties, upstream routers cannot resolve the MAC address of the BIG-IP, leading to connectivity failure even if the service itself is "Available."

NEW QUESTION # 21

.....

Braindumpsqa's F5 F5CAB4 exam training materials' simulation is particularly high. You can encounter the same questions in the real exam. This only shows that the ability of our IT elite team is really high. Now many ambitious IT staff to make their own configuration files compatible with the market demand, to realize their ideals through these hot IT exam certification. Achieved excellent results in the F5 F5CAB4 Exam. With the F5 F5CAB4 exam training of Braindumpsqa, the door of the dream will open for you.

F5CAB4 Guaranteed Questions Answers: https://www.braindumpsqa.com/F5CAB4_braindumps.html

We can't guarantee that we are the lowest price on the internet, but our exam braindumps are definitely the best reasonable price with most high-quality Exam Collection F5CAB4 PDF, Our F5CAB4 pdf dumps questions are up to the mark, and our valid F5CAB4 practice test software possesses the user-friendly interface for the F5 ACE test, F5 F5CAB4 Latest Braindumps Sound fantastic, isn't it?

Now, we need to get from use cases to sequence diagrams, After F5CAB4 clicking "Get a new file" you will see a status indicator, and links will be active again when the process is complete.

We can't guarantee that we are the lowest price on the internet, but our exam braindumps are definitely the best reasonable price with most high-quality Exam Collection F5CAB4 PDF.

Free PDF Quiz 2026 Trustable F5CAB4: BIG-IP Administration Control Plane Administration Latest Braindumps

Our F5CAB4 pdf dumps questions are up to the mark, and our valid F5CAB4 practice test software possesses the user-friendly interface for the F5 ACE test.

Sound fantastic, isn't it, From the Braindumpsqa platform, you will get the perfect match F5CAB4 actual test for study, Time does not wait!
