All in all, we hope that you can purchase our three versions of the IAM-Certificate real exam dumps.

IAM The Institute of Asset Management Certificate Sample Questions (Q80-Q85):

NEW QUESTION # 80

Holding equipment spare parts can be expensive. What is the best justification for holding spares?

- A. The organization has always held spares
- B. When maintenance is outsourced to a maintainer who doesn't hold spares
- **C. When cost of downtime or service losses exceeds cost of holding spares**
- D. When the original equipment manufacturer recommends spares should be held
- E. The Maintenance Manager wants to hold spares

Answer: C

Explanation:

Spares strategy should be based on risk and cost trade-off. Holding spares is justified when the impact of unavailability (downtime, penalties, service interruption) exceeds the cost of stocking the parts.

Exact Extract from IAM - Asset Management: An Anatomy (v4), Section 3.4.3 - Operate and Maintain:

"Decisions about spare parts should consider the risk of failure, lead time, and cost of downtime in relation to the cost of storage and obsolescence."

NEW QUESTION # 81

Which of the following is NOT normally an input to an asset management plan?

- A. Organizational objectives
- **B. Maintenance schedules**
- C. Asset knowledge
- D. Demand forecast
- E. Asset Management Objectives

Answer: B

Explanation:

Maintenance schedules are the output of planning rather than a prerequisite input. The other options are critical drivers in determining what actions should be planned.

Exact Extract from ISO 55002:2018, Clause 6.2 - Planning for AM Objectives:

"Inputs include asset information, demand forecasts, AM objectives, organizational priorities, and risk assessments."

NEW QUESTION # 82

Effective asset management can enhance an organization's reputation and its ability to?

- **A. All true**
- B. Operate safely.
- C. Reduce the cost of managing assets over their lives.
- D. Meet its regulatory and statutory obligations

Answer: A

NEW QUESTION # 83

Assurance is the combination of monitoring and control (of processes and outcomes) to confirm the assets, systems and processes are operating as intended.

- A. False
- B. True

Answer: A

Explanation:

The correct concept of assurance is that it combines monitoring and auditing (not control). Monitoring checks operational conformity, and auditing provides an independent review. Control is a broader management concept and not the specific second component of assurance.

Exact Extract from IAM - Asset Management: An Anatomy (v4), Section 1.4.4 - Assurance:

"Assurance is provided through monitoring and auditing mechanisms that evaluate whether intended outcomes are being achieved."

NEW QUESTION # 84

What is an Asset Management System as defined by PAS 55?

- A. The asset system which organises all data management activities
- B. The asset information technology system used for collating and analysing asset data
- C. The system by which organisations can manage and influence stakeholder requirements
- D. The management system which organises and drives all asset management activities

Answer: D

Explanation:

The Asset Management System refers to the management framework of policies, processes, and tools that collectively enable the achievement of asset-related objectives-not just IT or data systems.

Exact Extract from PAS 55-1:2008, Clause 3.3.1:

"Asset management system: The integrated set of processes, plans, and tools that collectively define and drive the asset management activities within the organization."

NEW QUESTION # 85
