

NCP-CN Interactive EBook, NCP-CN Practice Questions

NCP PRACTICE QUESTIONS WITH COMPLETE SOLUTIONS

Which of the following is a component of the nutrition care process that is new to the field of nutrition professionals?

- C. correct answer: a. Conducting nutrition assessments
b. Implementing nutrition interventions
c. Using dietetics specific terminology
d. Monitoring and evaluation

What is the first step in the Nutrition Care Process? correct answer: nutrition assessment

The NCP and Model and standardized language can be incorporated into which of the following methods of medical record documentation?

- E. correct answer: a. SOAP
b. DAR
c. Narrative
d. ADI or ADIME
e. All of the above

Which of the following reflect the way a RD actually completes the nutrition care process?

- D. correct answer: a. The steps are always conducted in the order shown in the NCP: nutrition assessment, nutrition diagnosis, nutrition intervention and finally nutrition monitoring and evaluation.
b. You may return to add more data to nutrition assessment and then revise your nutrition diagnosis, intervention if the patient provides additional information during your nutrition counseling intervention
c. Often during the course of providing nutrition care, the steps do not occur in a linear fashion.
d. Both b and c are correct

Which steps provide data that will likely lead to the selection of data for monitoring and evaluations?

- E- (The data in the nutrition diagnoses used for signs and symptoms comes from the nutrition assessment; however there are a lot of other data that is not relevant that would have been assessed. The data selected for the nutrition diagnoses signs and symptom should be directly applicable) correct answer: a. Nutrition Assessment (data evaluated compared to standards)
b. Nutrition Diagnoses (signs and symptoms of PES statement)
c. Nutrition Intervention (outcomes of interventions)
d. Nutrition Screening (data used to identify need for nutrition care)
e. Both a and b

Etiology is documented in which step of the Nutrition Care Process

2026 Latest iPasseleader NCP-CN PDF Dumps and NCP-CN Exam Engine Free Share: https://drive.google.com/open?id=1LQnMDo5_fhOFgN8Q70g-hfDDWro659-5

Once you try our NCP-CN exam test, you will be motivated greatly and begin to make changes. Our study questions always update frequently to guarantee that you can get enough test banks and follow the trend in the theory and the practice. That is to say, our product boosts many advantages and to gain a better understanding of our NCP-CN question torrent. It is very worthy for you to buy our product. Not only can our study materials help you pass the exam, but also it can save your much time. What are you waiting for? Follow your passion and heart.

Nutanix NCP-CN Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Prepare the Environment for an NKP Deployment: This section of the exam measures the skills of infrastructure engineers and cloud administrators and covers the initial setup tasks needed for NKP deployment. Candidates must demonstrate the ability to seed a private container registry, create a bootstrap Kubernetes cluster, and determine license tiers suitable for clusters. They also need to prepare a bastion host for secure access, build machine images or prepare nodes for deployment, and gather all necessary information to build a cluster on the target cloud or on-premises provider.

Topic 2	<ul style="list-style-type: none"> • Perform Day 2 Operations: This part assesses the expertise of site reliability engineers and cluster operators in ongoing cluster management tasks after deployment. It includes configuring authentication and authorization mechanisms, setting up logging systems, and implementing cluster backup and recovery procedures. Candidates also need to demonstrate skills in monitoring cluster performance and health, configuring autoscaling to handle workload changes, and performing lifecycle management functions such as upgrades and maintenance.
Topic 3	<ul style="list-style-type: none"> • Manage Building an NKP Cluster: This section evaluates the skills of Kubernetes administrators and platform engineers in customizing and deploying NKP clusters. Candidates must show proficiency in tailoring cluster configurations to meet specific requirements and deploying Kommander, the management platform, while applying the appropriate licenses to enable cluster features and management capabilities.
Topic 4	<ul style="list-style-type: none"> • Conduct NKP Fleet Management: This section tests the abilities of platform administrators and cloud operations engineers in managing multiple clusters as a fleet. It focuses on configuring workspaces to organize clusters, deploying workload clusters within these workspaces, and attaching or detaching clusters as needed. Additionally, candidates must be able to configure projects for workload segmentation and manage platform applications that support the overall NKP environment.

NCP-CN Practice Questions, NCP-CN Practice Test Pdf

At iPassleader, we are committed to providing our clients with the actual and latest Nutanix NCP-CN exam questions. Our real NCP-CN exam questions in three formats are designed to save time and help you clear the NCP-CN Certification Exam in a short time. Preparing with iPassleader's updated NCP-CN exam questions is a great way to complete preparation in a short time and pass the NCP-CN test in one sitting.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q40-Q45):

NEW QUESTION # 40

An administrator has been tasked with deploying NKP as the Kubernetes platform and needs to deploy their first cluster with the following requirements:

Dark site (no Internet connectivity)

Nutanix-provided Rocky Linux VM image

AHV-based cluster What are two prerequisites to accomplish the deployment? (Choose two)

- A. Existing local container registry
- B. Konvoy Image Builder
- C. Self-managed AWS cluster
- D. Air-Gapped Bundle

Answer: A,D

NEW QUESTION # 41

A Platform Engineer is looking to backup and restore persistent volumes and other cluster resources. Which two NKP licenses include backup and restore functionality? (Choose two.)

- A. NKP Pro
- B. NKP Ultimate
- C. NKP Starter
- D. NKP Essential

Answer: A,B

Explanation:

The NKPA course details that backup and restore functionality in NKP is provided through integration with Velero, which supports backing up persistent volumes, cluster resources, and application data to S3-compatible storage. This functionality is considered an advanced feature and is included in higher-tier NKP licenses: NKP Ultimate and NKP Pro.

* NKP Ultimate: This top-tier license includes all NKP features, such as air-gapped deployments, fleet management, and backup/restore capabilities. It is designed for enterprise-grade environments requiring comprehensive disaster recovery.

* NKP Pro: This mid-tier license also includes backup and restore functionality, catering to organizations needing robust data protection but not necessarily all the features of the Ultimate tier (e.g., air-gapped support).

The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide states: "Backup and restore functionality, powered by Velero, is available in NKP Pro and NKP Ultimate license tiers, enabling protection of persistent volumes and cluster resources." These licenses provide the necessary tools and support for configuring Velero with S3-compatible storage, scheduling backups, and performing restores in production environments.

Incorrect Options:

* A. NKP Starter: The Starter tier is entry-level and does not include advanced features like backup and restore. It focuses on basic cluster management.

* B. NKP Essential: This tier, if it exists in NKP's licensing model, would be a lower tier and unlikely to include backup/restore functionality, as it is not mentioned in the NKPA course.

NEW QUESTION # 42

A Kubernetes administrator needs to ensure that the following requirements are met whenever a new workload cluster is deployed to a workspace:

* Grafana Logging

* Grafana Loki

* Project Logging How would the administrator ensure that these components are deployed as part of a cluster deployment?

- A. Enable them in the Clusters section under workspace.
- B. Enable them in the Projects section under workspace.
- C. Enable them in the Insights section under workspace.
- **D. Enable them in the Application section under workspace.**

Answer: D

Explanation:

The NKPA course details that NKP Platform Applications, such as Grafana Logging, Grafana Loki, and Project Logging, are deployed to Kubernetes clusters to provide monitoring and logging capabilities. To ensure these components are automatically deployed to new workload clusters in a workspace, the administrator must enable them in the Application section under the workspace configuration in the NKP UI.

The course explains that the Application section allows administrators to select and configure platform applications that should be applied to all clusters within a workspace. By enabling Grafana Logging, Grafana Loki (for log aggregation), and Project Logging (for project-specific log management), these components are automatically deployed as part of the cluster provisioning process. The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide states: "To deploy platform applications like Grafana Loki and logging components to new clusters, configure them in the Application section of the workspace settings in the NKP UI." Incorrect Options:

* A. Enable them in the Insights section under workspace: The Insights section is for analytics and monitoring dashboards, not for deploying logging components.

* B. Enable them in the Projects section under workspace: Projects are sub-divisions within workspaces for resource allocation, not for configuring platform applications.

* C. Enable them in the Clusters section under workspace: The Clusters section is for managing cluster settings, not for enabling platform applications.

NEW QUESTION # 43

A Platform Engineer sees no insight in all workspaces, and it is a critical feature to control all the alerts on all company's Kubernetes

clusters. What does the engineer need to do to begin generating NKP Insights?

- A. Acquire the NKP Insights Add-on license.
- B. Install nkp-insights in every Kubernetes cluster with `kubectl apply -f nkp-insights-1.2.2 --kubeconfig=<cluster>.conf`
- C. Create a persistent volume claim and assign it to nkp-insights; this application requires volumes to save logs and data. Install nkp-insights with `nkp create appdeployment nkp-insights --app nkp-insights-1.2.2 --workspace kommander-workspace`

Answer: C

NEW QUESTION # 44

A Platform Engineer is deploying an NKP cluster within an air-gapped AWS environment. However, after an infrastructure planning session with the network team, it's been determined that the default CIDR block range that is used by pods on NKP clusters is already in use in their environment.

How can the engineer ensure there are no collisions between NKP pod traffic and the existing network using that subnet range?

- A. Create an NKP infrastructure provider for AWS in the NKP UI. Select the Advanced Options button from the Network section of the Create Cluster page and specify a unique CIDR block range within the pod network field.
- B. Because the environment is air-gapped, there will be no network traffic collision concerns and no adjustment needs to be made to the pod network CIDR block range.
- C. Create the NKP cluster's manifest using the `nkp create cluster` command set and include the pod CIDR block range parameter when generating the cluster manifest. Deploy the NKP cluster manifest.
- D. Create an NKP infrastructure provider for AWS in the NKP UI. When deploying the NKP cluster through the UI, specify a unique CIDR block range for the pod network field in the Network section of the Create Cluster page.

Answer: C

Explanation:

The NKPA 6.10 documentation outlines that in air-gapped environments where default pod network CIDR conflicts exist, the cluster manifest (created via the `nkp create cluster` command) should be updated to specify an alternate, non-conflicting pod CIDR block range before deployment.

NEW QUESTION # 45

.....

Getting the Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) certification exam is necessary in order to get a job in your desired tech company. Success in the Nutanix Certified Professional - Cloud Native v6.10 certification exam gives you an edge over the others because you will have certified skills. The Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) certification exam badge will make a good impression on the interviewer. Most of the people planning to attempt the Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) exam are confused that how will they prepare and pass Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) exam with good grades.
