100% Pass Quiz 2026 Perfect Microsoft SC-401: Administering Information Security in Microsoft 365 Pass Rate

P.S. Free 2026 Microsoft SC-401 dumps are available on Google Drive shared by Pass4Test: https://drive.google.com/open?id=1fNHeGPbstkStghIU8Ar0sJJUM_kgc45Z

The SC-401 would assist applicants in preparing for the Microsoft SC-401 exam successfully in one go SC-401 would provide SC-401 candidates with accurate and real Administering Information Security in Microsoft 365 (SC-401) Dumps which are necessary to clear the SC-401 test quickly. Students will feel at ease since the content they are provided with is organized rather than dispersed.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 2	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 3	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 4	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

SC-401 Latest Dumps: Administering Information Security in Microsoft 365 & Administering Information Security in Microsoft 365 Exam Cram

If you are ready for the exam for a long time, but lack of a set of suitable SC-401 learning materials, I will tell you that you are so lucky to enter this page. We are such SC-401 exam questions that you can use our products to prepare the exam and obtain your dreamed SC-401 certificates. We all know that if you desire a better job post, you have to be equipped with appropriate professional quality and an attitude of keeping forging ahead. Our SC-401 exam questions will be your best ally to get what you wanted.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q13-Q18):

NEW QUESTION # 13
You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Cloud Apps.
You plan to deploy a Defender for Cloud Apps file policy that will be triggered when the following conditions are met:
A file is shared externally.
A file is labeled as internal only.
Which filter should you use for each condition? To answer, drag the appropriate filters to the correct conditions. Each filter may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

In Defender for Cloud Apps file policies, Access level is the filter used to detect how a file is exposed (e.g., Public on the internet, External, Internal, Private). Choosing Access level = External matches files that are shared with users outside your organization-exactly the "shared externally" condition.
Ref: Microsoft Defender for Cloud Apps - Create/Use file policies (File filters: Access level), Microsoft Learn.
See: Microsoft Defender for Cloud Apps > Policies > File policies documentation describing file filters including Access level and its values (Public, External, Internal, Private).
To target files that carry an MIP/AIP classification such as Internal Only, you use the Sensitivity label file filter. Defender for Cloud

Apps ingests Microsoft Purview Information Protection labels and lets you build file policies that trigger when a specific label is applied.

Ref: Integrate Microsoft Information Protection with Microsoft Defender for Cloud Apps and File policies - Sensitivity label filter, Microsoft Learn.

These docs explain that MCAS can filter and govern files by Sensitivity label and apply governance based on labels such as Internal Only, Confidential, etc.

Why not the other options?

Collaborators filters by specific users/domains; it's useful to find files shared with a particular external user but not for the generic "shared externally" condition.

Matched policy is for files already flagged by another policy/DLP engine and does not detect "Internal Only" labeling by itself.

NEW QUESTION # 14

You need to provide a user with the ability to view data loss prevention (DLP) alerts in the Microsoft Purview portal. The solution must use the principle of least privilege.

Which role should you assign to the user?

- **A. Security Reader**
- B. Compliance Data Administrator
- C. Security Operator
- D. Compliance Administrator

Answer: A

Explanation:

https://docs.microsoft.com/en-us/microsoft-365/compliance/dlp-configure-view-alerts-policies

NEW QUESTION # 15

Hotspot Question

You have a Microsoft 365 subscription.

You plan to deploy an audit log retention policy.

You need to perform a search to validate whether the policy will be applied to the intended entries.

Which two fields should you configure for the search? To answer, select the appropriate fields in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Search

Explanation:

To validate whether an audit log retention policy will apply to the intended entries, you should configure the following fields:

- Date and time range (UTC) ensures that you are searching for audit logs within the time period when the policy should be applied. Audit logs are time-sensitive, and policies affect logs based on their timestamp.

- Record types allows you to filter and search for specific audit log categories (e.g., Exchange, SharePoint, Teams, etc.) that are affected by the retention policy. Selecting the correct record type ensures that the policy is evaluated against the relevant data.
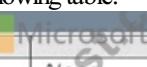

NEW QUESTION # 16

HOTSPOT

You have a Microsoft 365 E5 subscription that contains two Microsoft 365 groups named Group1 and Group2. Both groups use the following resources:

A group mailbox

Microsoft Teams channel messages

A Microsoft SharePoint Online teams site

You create the objects shown in the following table.

Name	Type	Description
RLabel1	Retention label	None
AutoApply1	Auto-labeling policy	Applies RLabel1 to Group1
Retention1	Retention policy	Applied to Group2

To which resources will AutoApply1 and Retention1 be applied? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

AutoApply1:

- The group mailbox only
- The SharePoint Online teams site only
- The group mailbox and SharePoint Online teams site only
- The group mailbox and Teams channel messages only
- The group mailbox, SharePoint Online teams site, and Teams channel messages

Retention1:

- The group mailbox only
- The SharePoint Online teams site only
- The group mailbox and SharePoint Online teams site only
- The group mailbox and Teams channel messages only
- The group mailbox, SharePoint Online teams site, and Teams channel messages

Answer:

Explanation:

Answer Area

AutoApply1:

- The group mailbox only
- The SharePoint Online teams site only
- The group mailbox and SharePoint Online teams site only
- The group mailbox and Teams channel messages only
- The group mailbox, SharePoint Online teams site, and Teams channel messages

Retention1:

- The group mailbox only
- The SharePoint Online teams site only
- The group mailbox and SharePoint Online teams site only
- The group mailbox and Teams channel messages only
- The group mailbox, SharePoint Online teams site, and Teams channel messages

Explanation:

Answer Area

AutoApply1:

- The group mailbox only
- The SharePoint Online teams site only
- The group mailbox and SharePoint Online teams site only
- The group mailbox and Teams channel messages only
- The group mailbox, SharePoint Online teams site, and Teams channel messages

Retention1:

- The group mailbox only
- The SharePoint Online teams site only
- The group mailbox and SharePoint Online teams site only
- The group mailbox and Teams channel messages only
- The group mailbox, SharePoint Online teams site, and Teams channel messages

AutoApply1 is an auto-labeling policy that applies RLabel1 to Group1. Auto-labeling policies can apply retention labels across group mailboxes, SharePoint Online sites, and Teams channel messages if they are configured for group resources.

Retention1 is a retention policy applied to Group2. Retention policies for Microsoft 365 groups apply to all group resources, including group mailboxes, SharePoint Online teams sites, and Teams channel messages.
Since both AutoApply1 and Retention1 affect entire groups, they apply to all associated resources: group mailbox, SharePoint Online teams site, and Teams channel messages.

NEW QUESTION # 17

You have a Microsoft 36S ES subscription that contains two Windows devices named Device1 and Device2 Device1 has the default browser set to Microsoft Edge. Devke2 has the default browser set to Google Chrome.

You need to ensure that Microsoft Purview insider risk management can collect signals when a user copies files to a USB device by using their default browser.

What should you deploy to each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 18

......

Our company in the field of the SC-401 exam bootcamp for years, we also enjoy high reputation in the business. You choose us, we will give you the best we have, and your right choice will also bring the benefits to you. With the high reputation in the field, we can guarantee the quality of the SC-401 Exam Dumps. It also contains the free update for one year for you. It can save your money for updating, and the update version will send to your mailbox automatically.
