Transportation Management Sample Questions (Q58-Q63):

NEW QUESTION # 58

Over recent years SAP has made a significant investment in designing and building a best-in-class transportation management solution. This solution will continue to evolve as more functionality is rolled out. Currently, the solution supports the following scenarios for shippers and logistic service providers:

There are 3 correct answers to this question.

- A. For sales orders, destination locations are stored on root level.
- B. International Outbound Transportation And Ocean Freight
- C. Domestic Inbound Transportation
- D. Domestic Outbound Transportation And International Inbound Logistics

Answer: B,C,D

NEW QUESTION # 59

Which attributes can you directly define in a schedule? Note: There are 2 correct answers to this question.

- A. Carrier
- B. Capacity
- C. Downtimes
- D. Transportation lane

Answer: A,D

Explanation:

In SAP S/4HANA Transportation Management, a schedule defines planned transportation activities, such as regular departures. According to the SAP documentation, the following attributes can be directly defined in a schedule:

* Transportation lane (C): The schedule specifies the transportation lane (route between locations) it applies to, defining the path for the scheduled transport.

* Carrier (D): The carrier responsible for the transport can be defined in the schedule, ensuring the correct partner is assigned.

The other options are incorrect:

* Capacity (A) is defined in vehicle resources or transportation allocations, not directly in schedules.

* Downtimes (B) are managed in vehicle resources or calendars, not schedules.

NEW QUESTION # 60

You want to perform carrier selection for a freight order created in SAP S/4HANA Supply Chain for transportation management. Which of the following can you use as decision criteria? Note: There are 2 correct answers to this question.

- A. Priority from carrier selection settings
- B. Costs from shipment cost document
- C. Costs from charge management
- D. Priority from transportation lane

Answer: A,D

Explanation:

Transportation Planning

NEW QUESTION # 61

How can you initiate carrier selection?

Note: there are 2 correct answers to this question.

- A. From the collaboration portal
- B. From the freight booking user interface
- C. Execute report/SCMTMS/BACKGRND_PLN
- D. From the container unit user interface

Answer: C,D

NEW QUESTION # 62

You have two sales orders with three items each for the same customer with the same delivery date. No incompatibilities exist. The following customizing settings are defined:

* Build freight units automatically

* Freight unit building rule strategy is "consolidate as much as possible" What is the minimum number of freight units that are created?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

In SAP S/4HANA Transportation Management, freight units are created based on sales order items, with the freight unit building rule strategy determining consolidation. With the settings "Build freight units automatically" and "consolidate as much as possible," the system combines items into the fewest possible freight units, provided no incompatibilities exist. According to the SAP documentation:

* Two sales orders with three items each result in six items total.

* Since the items are for the same customer, have the same delivery date, and have no incompatibilities, the "consolidate as much as possible" strategy combines all six items into one freight unit (A), assuming other criteria (e.g., same source/destination) are met.

The other options are incorrect:

* B (3) and C (6) assume less consolidation (e.g., one freight unit per sales order or item).

* D (2) assumes one freight unit per sales order, which is not the maximum consolidation.
