

# Latest 1z0-1054-25 Test Vce, 1z0-1054-25 Exam Certification

P.S. Free 2026 Oracle 1z0-1054-25 dumps are available on Google Drive shared by TestkingPDF: [https://drive.google.com/open?id=1qpBu9vDVja0oJWXwHYe-qy5mli\\_hXeXP](https://drive.google.com/open?id=1qpBu9vDVja0oJWXwHYe-qy5mli_hXeXP)

There are three versions of Oracle Financials Cloud: General Ledger 2025 Implementation Professional test torrent—PDF, software on pc, and app online, the most distinctive of which is that you can install 1z0-1054-25 test answers on your computer to simulate the real exam environment, without limiting the number of computers installed. The buying process of 1z0-1054-25 Test Answers is very simple, which is a big boon for simple people. After the payment of 1z0-1054-25 guide torrent is successful, you will receive an email from our system within 5-10 minutes; click on the link to login and then you can learn immediately with 1z0-1054-25 guide torrent.

## Oracle 1z0-1054-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Implementing Enterprise and Financial Reporting Structures: This section of the exam measures skills of Oracle ERP Implementation Consultants and covers the core components used in setting up enterprise structures and reporting configurations. It assesses knowledge in defining legal entities, jurisdictions, and geographies, as well as the design and configuration of Chart of Accounts. Candidates must also demonstrate how to set up and secure chart structures and manage reporting calendars and currencies.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Performing Period Close: Designed for Oracle Financial Application Managers, this section evaluates expertise in executing and managing the period close lifecycle. Topics include reconciliations, revaluation, translation, and consolidation. Candidates are required to configure the Period Close Monitor and associated setups like revaluation, allocations, and chart mappings for financial consolidation.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Configuring Financial Reports: This portion of the exam measures the abilities of Financial Reporting Analysts and includes creating and managing a range of reports using tools like the Financial Reporting Center, Web Studio, OTBI, Smart View, and Dashboards. Candidates must know how to define account groups, set up infolets, and build custom analytics tailored to user needs.</li></ul>

## 1z0-1054-25 Exam Certification | 1z0-1054-25 Reliable Exam Labs

As we know, if you can obtain the job qualification 1z0-1054-25 certificate, which shows you have acquired many skills. In this way, your value is greatly increased in your company. Then sooner or later you will be promoted by your boss. Our 1z0-1054-25 Preparation exam really suits you best for your requirement. We have been considered to be the best friend for helping numerous of our customers successfully get their according 1z0-1054-25 certification.

### Oracle Financials Cloud: General Ledger 2025 Implementation Professional Sample Questions (Q70-Q75):

#### NEW QUESTION # 70

You have exported data from your budgeting application into a .csv file. What should you use to load that data into General Ledger?

- A. Budget journal spreadsheet
- B. Application Developer Framework desktop integrator
- C. File-based data import
- D. Enterprise Resource Budget Integrator

**Answer: C**

#### NEW QUESTION # 71

You need to add new transactional attributes to the journal approval notification in an implementation project. Which two Business Intelligence catalog objects should you copy (or customize) and edit?

- A. Sub template
- B. Data model
- C. Style template
- D. Layout template
- E. Output type

**Answer: B,D**

Explanation:

To modify the journal approval notification, you need to copy (or customize) and edit the layout template and the data model of the Analytics Publisher report. The layout template defines the appearance and content of the notification, such as the text, fields, tables, and images. The data model defines the data sources and queries that provide the data for the notification, such as the journal attributes, amounts, and statuses. You can use Template Builder for Word to edit the layout template and Analytics Publisher to edit the data model. You also need to download the Workflow Notification Subtemplate, which is a common subtemplate that contains the header and footer of the notification. You can preview the modified notification using the subtemplate and the data model.

#### NEW QUESTION # 72

You are using account hierarchies for reporting and allocations. Which two statements are true about these types of hierarchies? (Choose two.)

- A. Hierarchies for reporting and allocations do not have to be published to Essbase cubes.
- B. Child values in these hierarchies can belong to only one parent.
- C. Hierarchies for reporting and allocations have to be published to Essbase cubes.
- D. You can have only one version of a hierarchy published to the Essbase cube at any time.

**Answer: B,D**

Explanation:

According to the Oracle documentation<sup>34</sup>, account hierarchies are defined in Oracle Fusion applications using tree functionality. Each account hierarchy is defined as a tree with one or more versions. You can have only one version of a hierarchy published to the Essbase cube at any time (option A). Child values in these hierarchies can belong to only one parent (option D). Option B is incorrect because hierarchies for reporting and allocations must be published to Essbase cubes<sup>5</sup>. Option C is incorrect because it contradicts option B.

#### NEW QUESTION # 73

Which two statements are true regarding the Translation process? (Choose two.)

- A. The Translation process can only be used for translating the balances of Secondary ledgers.
- B. The Translation process can only be used to translate balance sheet accounts.
- C. Any resulting offset from the translation is entered in the Cumulative Translation Adjustment account.
- D. The Translation process should be run before posting Period Close adjustment entries.
- E. If necessary, before submitting the Translation process, the Revaluation process should be completed.

**Answer: C,E**

Explanation:

According to Oracle documentation<sup>1</sup>, the following statements are true regarding the Translation process:

Any resulting offset from the translation is entered in the Cumulative Translation Adjustment account, and if necessary, before submitting the Translation process, the Revaluation process should be completed. The Translation process enables you to translate balances from one currency to another for reporting purposes.

The Translation process calculates any difference between the translated balance and the entered balance and posts it to the Cumulative Translation Adjustment account. The Revaluation process enables you to adjust balances denominated in foreign currencies to reflect current exchange rates. The Revaluation process should be completed before the Translation process to ensure that the balances are accurate. Therefore, options A and B are correct. Option C is incorrect because the Translation process should be run after posting Period Close adjustment entries. Option D is incorrect because the Translation process can be used for translating the balances of primary ledgers, secondary ledgers, and reporting currencies. Option E is incorrect because the Translation process can be used to translate both balance sheet accounts and income statement accounts.

#### NEW QUESTION # 74

You notice that a lot of erroneous address data is being saved. How do you ensure that only valid addresses are entered in the system?

- A. Define the Geography Validation for Country option to No Validation.
- B. Define the Geography Validation for Country option to Error.
- C. Redefine the geography hierarchy.
- D. Redefine the location structure.

**Answer: B**

Explanation:

Geography validation is a feature that enables you to validate the address information entered for a location against the geography hierarchy defined for a country. You can set the Geography Validation for Country option to one of the following values:

No Validation: No validation is performed on the address information.

Warning: A warning message is displayed if the address information does not match the geography hierarchy, but the user can still save the address.

Error: An error message is displayed if the address information does not match the geography hierarchy, and the user cannot save the address until the error is corrected. To ensure that only valid addresses are entered in the system, you should set the Geography Validation for Country option to Error. This will prevent users from saving erroneous address data and enforce data quality and accuracy. References:
