- A. Backlog Template
- B. Business Process Design Template
- C. Test Strategy
- D. Quality Gate Checklist

Answer: A,B

Explanation:
New Implementation SAP S/4HANA Cloud
Accelerators that support the fit-to-standard workshop in the Explore phase of an SAP S/4HANA Cloud implementation include:
* A. Backlog Template.This is used to document and manage the requirements and adjustments identified during the workshops, facilitating a structured approach to capturing and prioritizing business needs.
* D. Business Process Design Template.This template helps in detailing the standard business processes and any required customizations or extensions, ensuring that all process requirements are clearly defined and understood.
Both accelerators are essential for effectively managing the fit-to-standard workshops, ensuring that all necessary configurations and customizations are accurately captured and documented.References:

NEW QUESTION # 19

Where do you activate SAP Best Practices from Cloud ALM to be used during the fit-to-standard workshops for SAP S/4HANA Cloud Public Edition?

- A. Development System
- B. Starter System
- C. Quality System
- D. Production System

Answer: B

Explanation:

In the context of SAP S/4HANA Cloud Public Edition, SAP Best Practices are activated from the Starter System during the fit-to-standard workshops. The Starter System in SAP S/4HANA serves as a preliminary, fully configured system that allows project teams to explore and understand SAP functionalities, configure business processes, and make necessary adjustments before these are moved to the production environment. It is crucial during the initial stages of implementation to help in aligning the standard SAP solutions with the organization's business processes. The activation of these practices in the Starter System ensures that the project team can test and validate processes without affecting the live business operations that occur in the production system, or ongoing development in the development system.References:

NEW QUESTION # 20

What does a cutover involve? Note: There are 2 correct ans-wers to this que-stion.

- A. Presenting completed functionality to key users
- B. Switching productive operations to new system
- C. Completing solution end-user documentation
- D. Aligning business and technical cutover plans

Answer: B,D

Explanation:

A cutover typically involves:

* B. Switching productive operations to new system: This is a critical component of the cutover process, where the business officially starts operating on the new system after successful completion of the previous phases.

* D. Aligning business and technical cutover plans: Ensures that both the business and technical aspects of the project are synchronized and ready for the transition to the new system. Options A (Completing solution end-user documentation) and C (Presenting completed functionality to key users) are important tasks in a project lifecycle but are not typically considered core components of the cutover process itself.

NEW QUESTION # 21

When do you perform Quality Gate (Q-Gate) during a project? Note: There are 2 correct ans-wers to this que-stion.

- A. At the end of Run phase
- B. At the end of Realize phase
- C. At the end of Discover phase
- D. At the end of Prepare phase

Answer: B,D

Explanation:

Quality Gates (Q-Gates) are performed during a project at specific phases to ensure quality and readiness for the next phase:

* A. At the end of Realize phase: This is a critical checkpoint to assess if the project deliverables are ready for deployment and meet the set expectations.

* B. At the end of Prepare phase: Marks the completion of initial project setup and planning, ensuring all elements are in place for

the project's execution phase. Options C (At the end of Discover phase) and D (At the end of Run phase) are not typically associated with Quality Gates in the SAP Activate methodology.References:
