

# Simulation 1Z0-1111-25 Questions, 1Z0-1111-25 Testking Exam Questions

There are a lot of excellent experts and professors in our company. The high quality of the 1Z0-1111-25 reference guide from our company resulted from their constant practice, hard work and their strong team spirit. After a long period of research and development, our 1Z0-1111-25 test questions have been the leader study materials in the field. We have taken our customers' suggestions of the 1Z0-1111-25 Exam Prep seriously, and according to these useful suggestions, we have tried our best to perfect the 1Z0-1111-25 reference guide from our company just in order to meet the need of these customers well. So stop hesitation and buy our study materials.

Don't let the Oracle Cloud Infrastructure 2025 Observability Professional exam stress you out! Prepare with our 1Z0-1111-25 exam dumps and boost your confidence in the 1Z0-1111-25 exam. We guarantee your road toward success by helping you prepare for the 1Z0-1111-25 exam. Use the best Oracle 1Z0-1111-25 practice questions to pass your 1Z0-1111-25 Exam with flying colors! In this way, the Oracle Cloud Infrastructure 2025 Observability Professional certified professionals can not only validate their skills and knowledge level but also put their careers on the right track. By doing this you can achieve your career objectives.

## 1Z0-1111-25 Testking Exam Questions | Latest 1Z0-1111-25 Exam Format

If you purchase our Oracle Cloud Infrastructure 2025 Observability Professional guide torrent, we can make sure that you just need to spend twenty to thirty hours on preparing for your exam before you take the exam, it will be very easy for you to save your time and energy. So do not hesitate and buy our 1Z0-1111-25 study torrent, we believe it will give you a surprise, and it will not be a dream for you to pass your Oracle Cloud Infrastructure 2025 Observability Professional exam and get your certification in the shortest time.

## Oracle Cloud Infrastructure 2025 Observability Professional Sample Questions (Q33-Q38):

### NEW QUESTION # 33

Why do dedicated Vantage Points matter? Select two reasons that apply. (Choose two.)

- A. Applications on-premise or secured network can be tested from a public Vantage Point
- B. Test internal customer applications
- C. Applications on-premise or on secured network cannot be tested from a public Vantage Point
- D. Test Deployment Manager and Scheduler

**Answer: B,C**

Explanation:

In OCI APM's Synthetic Monitoring, Vantage Points are locations from which synthetic tests (e.g., HTTP requests) are run.

Dedicated Vantage Points are private, user-managed instances, distinct from public ones hosted by Oracle:

Applications on-premise or on secured network cannot be tested from a public Vantage Point (B): Public Vantage Points, located in Oracle-managed regions, lack access to private networks (e.g., on-premise servers or firewalled applications). Dedicated Vantage Points, deployed within a user's network, overcome this limitation.

Test internal customer applications (C): Dedicated Vantage Points enable testing of internal applications (e.g., intranet sites) not exposed to the public internet, ensuring performance monitoring from within the secured environment.

Why not A or D?

Test from public Vantage Point (A): Contradicts B; public Vantage Points can't access private networks.

Test Deployment Manager and Scheduler (D): These are unrelated OCI components, not Synthetic Monitoring targets.

Dedicated Vantage Points extend monitoring to restricted environments.

### NEW QUESTION # 34

Which two components are optional while creating the Monitoring Query Language (MQL) expressions in the Oracle Cloud Infrastructure (OCI) Monitoring service? (Choose two.)

- A. Grouping Function
- B. Statistic
- C. Interval
- D. Previous
- E. Dimensions
- F. Metric

**Answer: A,B**

Explanation:

MQL expressions in OCI Monitoring retrieve and process metric data. Optional components include:

Statistic (B): Specifies how to summarize data (e.g., avg, max). If omitted, raw data is returned.

Grouping Function (D): Aggregates data across metric streams (e.g., by resourceId). It's optional if no grouping is needed.

Why not A, C, E, or F?

Interval (A): Defines the time window; defaults apply if omitted, but it's typically required for meaningful queries.

Previous (C): Not a standard MQL component (possibly a typo).

Metric (E): Mandatory to specify what's being queried.

Dimensions (F): Filters data; required if specific streams are targeted, though optional in basic queries.

Statistic and Grouping Function enhance flexibility but aren't mandatory.

### NEW QUESTION # 35

Which TWO Observability and Management (O&M) services are supported by Management Agent? (Choose two.)

- A. Logging Analytics
- B. Enterprise Manager
- C. Database Management
- D. Application Performance Management

**Answer: A,B**

Explanation:

Management Agents collect and send data to OCI services:

Logging Analytics (B): Agents gather log data from various sources (e.g., files, databases) and send it to Logging Analytics for indexing and analysis.

Enterprise Manager (C): Agents integrate with Oracle Enterprise Manager, enabling monitoring of on-premises or cloud targets

within OCI.

Why not A or D?

Application Performance Management (A): Uses Java and Browser Agents, not Management Agents.

Database Management (D): Leverages agents indirectly via other services, not a direct target.

These services leverage Management Agents for observability.

### NEW QUESTION # 36

Which pillars of Observability are available as a single view from the Dashboard?

- **A. Logs, Metrics, and Traces**
- B. Logging Analytics, Database Management, Stack Monitoring
- C. Log data, Query language, Dashboard widgets
- D. Compute, Storage, and Network

**Answer: A**

### NEW QUESTION # 37

Your on-premises private cloud environment consists of virtual machines hosting a set of application servers. These VMs are currently monitored using a 3rd party monitoring tool for resource metrics such as CPU and Memory utilization. You have created an automation workflow to transform these application servers into Oracle Cloud Infrastructure (OCI) which will deploy a set of new compute instances. There are a few requirements to consider while running this task: Ensure continuous monitoring is enabled, so the current monitored resource metrics are continuously collected and reported; Monitor the completion of Compute Instance deployment during the workflow and notify with email on each execution; Notify with email for any new OCI Object Storage buckets created after the migration workflow. What solution would you recommend to achieve these requirements?

- A. Configure OCI Compute agent on OCI compute instances to collect required resource metrics. Use OCI Events and Functions services to track the Instance deployment (`com.oraclecloud.computeapi.launchinstance.end`) and creation of new buckets (`com.oraclecloud.objectstorage.createbucket`). Use OCI Notifications and Events service to notify these changes.
- **B. Configure OCI Compute agent on on-premises VMs and OCI compute instances to collect required resource metrics. Use OCI Events service to track the end-to-end deployment process (`com.oraclecloud.computeapi.launchinstance.end`) and creation of new bucket (`com.oraclecloud.objectstorage.createbucket`). Use OCI Notifications and Events services to notify these changes.**
- C. Configure OCI Compute agent on on-premises VMs to collect required resource metrics. Use OCI Events service to track all deployments (`com.oraclecloud.computeapi.launchinstance.end`) with OCI Notifications service to track and report all changes occurring in the target environment.
- D. Configure both 3rd party monitoring tool and OCI Compute Agent on OCI compute instances to collect required resource metrics. Use OCI Events service (`com.oraclecloud.computeapi.launchinstance.end`) with Notifications service to track and notify all changes occurring in the target OCI environment.

**Answer: B**

Explanation:

The solution must address continuous monitoring and event-driven notifications:

D:

OCI Compute agent on on-premises VMs and OCI instances: Ensures metric continuity (e.g., CPU, memory) across the migration, using Management Agents for both environments.

Events service: Tracks `launchinstance.end` for deployment completion and `createbucket` for new buckets.

Notifications and Events: Sends email alerts for these events.

Why not A, B, or C?

A: Misses on-premises monitoring continuity.

B: Lacks bucket creation tracking.

C: Redundant 3rd-party tool use; OCI agents suffice.

D provides end-to-end coverage.

### NEW QUESTION # 38

.....

**1Z0-1111-25 Testking Exam Questions:** <https://www.actualtestsit.com/Oracle/1Z0-1111-25-exam-prep-dumps.html>

By default, when you press Tab at the beginning of a paragraph, Word 1Z0-1111-25 sets a first-line indent for the paragraph. In this article, we'll look at just a few of the many possibilities that are available.

For example, you can spend much time and energy on the preparation for 1Z0-1111-25 Oracle Cloud Infrastructure 2025 Observability Professional exam, also you can choose an effective training course, Please keep focus on our Oracle 1Z0-1111-25 test practice torrent.

Only in this way can you easily deal with the examination.
