Snowflake SnowPro Core Certification Exam Sample Questions (Q960-Q965):

NEW QUESTION # 960

A user wants to access files stored in a stage without authenticating into Snowflake. Which type of URL should be used?

- A. Staged URL
- **B. Pre-signed URL**
- C. Scoped URL
- D. File URL

Answer: B

Explanation:

A Pre-signed URL should be used to access files stored in a Snowflake stage without requiring authentication into Snowflake. Pre-signed URLs are simple HTTPS URLs that provide temporary access to a file via a web browser, using a pre-signed access token. The expiration time for the access token is configurable, and this type of URL allows users or applications to directly access or download the files without needing to authenticate into Snowflake5.
