

JN0-336 Test Quiz, Latest JN0-336 Exam Practice

P.S. Free 2026 Juniper JN0-336 dumps are available on Google Drive shared by VCE4Plus: <https://drive.google.com/open?id=1wNyneH-il78dPf-lrWAza5q43bAAE9si>

During nearly ten years, our company has kept on improving ourselves, and now we have become the leader in this field. And now our JN0-336 training materials have become the most popular JN0-336 practice materials in the international market. There are so many advantages of our JN0-336 Study Materials, and as long as you free download the demos on our website, then you will know that how good quality our JN0-336 exam questions are in! You won't regret for your wise choice if you buy our JN0-336 learning guide!

VCE4Plus Juniper JN0-336 Practice Test give you the opportunity to practice for the Juniper JN0-336 new exam questions. By using Juniper Practice Test, you can get the ideal possibility to know the actual Security, Specialist (JNCIS-SEC) exam, as they follow the same interface as the real exam. This way, you can become more confident and comfortable while taking the actual exam.

Latest JN0-336 Exam Practice | JN0-336 Exam Actual Tests

As is known to all, practice makes perfect. This proverb also can be replied into the exam. We have the JN0-336 Study Materials with good reputation in the market. The JN0-336 exam dumps not only contains the quality, but also have the quantity, therefore it will meet your needs. Just think that you just need to practice it for some time, a certificate will be obtained by your own efforts, it will be a quite delightful thing. So act now, you will be very happy to see it come true.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q44-Q49):

NEW QUESTION # 44

Exhibit

Referring to the exhibit, what do you determine about the status of the cluster.

- A. There are no issues with the cluster.
- B. Node 1 is down
- C. Both nodes determine that they are in a primary state.

- D. Node 2 is down.

Answer: B

NEW QUESTION # 45

You want to be alerted if the wrong password is used more than three times on a single device within five minutes. Which Juniper Networks solution will accomplish this task?

- A. Juniper Identity Management Service
- B. Intrusion Prevention System
- C. Juniper Secure Analytics
- D. Adaptive Threat Profiling

Answer: C

Explanation:

The Juniper Networks solution that will accomplish the task of alerting if the wrong password is used more than three times on a single device within five minutes is Juniper Secure Analytics (JSA). JSA is a security intelligence platform that collects, analyzes, and correlates network data from various sources, such as firewalls, routers, switches, servers, and applications. JSA can detect and respond to threats, anomalies, and vulnerabilities in real time using rules, offenses, reports, and dashboards. JSA can also integrate with JIMS (Juniper Identity Management Service) to obtain user identity information from Active Directory domains or syslog sources. JSA can use this information to create custom rules that trigger offenses or alerts based on user behavior or activity, such as failed login attempts or password changes.

NEW QUESTION # 46

When a security policy is deleted, which statement is correct about the default behavior of active sessions allowed by that policy?

- A. The active sessions allowed by the policy will be marked as a legacy flow and will continue to be forwarded.
- B. The active sessions allowed by the policy will be dropped.
- C. The active sessions allowed by the policy will be reevaluated by the cached
- D. The active sessions allowed by the policy will continue

Answer: A

Explanation:

When a security policy is deleted, the existing sessions that were previously allowed by that policy are not immediately dropped; instead, they are typically treated as legacy flows. This means they are allowed to continue until they naturally end or until the session timeout is reached. This behavior ensures that deleting a policy does not abruptly disrupt ongoing traffic flows that were previously authorized by that policy. This approach helps in avoiding unintended service disruptions, especially in production environments where active connections may be critical to operations.

NEW QUESTION # 47

Which two statements are correct about the fab interface in a chassis cluster? (Choose two.)

- A. In an active/active configuration, inter-chassis transit traffic is sent over the fab interface.
- B. The fab interface enables configuration synchronization.
- C. Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization.
- D. Heartbeat signals sent on the fab interface monitor the health of the control plane link.

Answer: A,C

Explanation:

The fab interface is a fabric link that connects the two nodes in a chassis cluster. A chassis cluster is a high-availability feature that groups two identical SRX Series devices into a cluster that acts as a single device.

The fab interface has two functions:

Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization: RTOs are data structures that store information about active sessions, such as source and destination IP addresses, ports, protocols, and security policies. RTOs

are exchanged between the nodes on the fab interface to ensure that both nodes have the same session information and can take over the traffic in case of a failover.

In an active/active configuration, inter-chassis transit traffic is sent over the fab interface: In an active/active configuration, both nodes in a cluster can process traffic for different redundancy groups (RGs). RGs are collections of interfaces or services that fail over together from one node to another. If traffic needs to transit from one RG to another RG that is active on a different node, it is sent over the fab interface.

NEW QUESTION # 48

Your network uses a single JSA host and you want to implement a cluster.

In this scenario, which two statements are correct? (Choose two.)

- A. The software versions on both primary and secondary hosts
- B. The primary and secondary hosts must be configured with the same storage devices.
- C. The cluster virtual IP will need an unused IP address assigned.
- D. The secondary host can backup multiple JSA primary hosts.

Answer: A,C

Explanation:

According to the Juniper Networks JNCIP-SEC Study Guide, when setting up a cluster with a single JSA host, both the primary and secondary hosts must have the same software version installed. Additionally, an unused IP address must be assigned to the cluster virtual IP. The primary and secondary hosts do not need to be configured with the same storage devices, and the secondary host cannot be used to backup multiple JSA primary hosts.

NEW QUESTION # 49

.....

When prepare a exam, we may face the situation like this: there are so many books in front of me, which one should I choose for preparing for the exam? If you are ready to attend the JN0-336 exam, then just choose us, our product is the one you can trust, with the experienced professionals to expect and update, the quality of the product is quite high. Furthermore, our company respect the privacy of the customers, with our product, there is no need for you to worry about the problem. Except for this, if you buy product for the JN0-336 Exam, you will get the free update for one year, and money back guarantee within 60 days after you buy it, so don't hesitate, just do it.
