Sometimes if you want to pass an important test, to try your best to exercise more questions is very necessary, which will be met by our AD0-E605 exam software, and the professional answer analysis also can help you have a better understanding. the multiple versions of free demo of AD0-E605 Exam Materials can be offered in our website. Try to find which version is most to your taste; we believe that our joint efforts can make you pass AD0-E605 certification exam.

Adobe Real-Time CDP Business Practitioner Professional Sample Questions (Q17-Q22):

NEW QUESTION # 17

A company wants to capture both `customer_id` and `email_address` as identities in their data feeds within the Real-Time customer profile.

What is the recommended identity types that should be used for the identities listed above?

- A. `customer_id` uses a type of Device ID
`email_address` uses a type of Cookie ID
- **B. `customer_id` uses a type of Cross-Device ID
`email_address` uses a type of Email**
- C. `customer_id` uses a type of Person ID
`email_address` uses a type of Email
- D. `customer_id` uses a type of Cookie ID
`email_address` uses a type of Device ID

Answer: B

NEW QUESTION # 18

A financial services customer wishes to suppress people from active credit card campaigns as soon as they submit an application for the associated credit card name. The business's goal is to optimize ad spend by suppressing people quickly who convert and use the savings to help funnel more money back into their acquisition strategies.

The current data model that IT has provided from their data warehouse looks like the following:

It is assumed that each application submit contains an offer that is always associated to a credit card name.

Assuming all applications are streamed into the Real-Time Customer Profile, in which two ways could a developer model the application submit event to ensure the real-time suppression requirement is supported? (Choose two.)

- A. Offer is modeled as an object within the Application Submit schema
- **B. Offer is de-normalized back into the Application Submit schema**
- **C. Application Submit is modeled as an XDM Experience Event class-based schema**
- D. Application Submit is modeled as an XDM Individual Profile class-based schema

Answer: B,C

NEW QUESTION # 19

A marketer wants to create a segment based on profiles that have these seven attributes:

LoyaltyId, LoyaltyLevel, Location, Age, MaritalStatus, Email, and Phone. The marketer wants the segment to qualify all profiles that have these attributes: LoyaltyLevel and Age, and disqualify profiles that have either of these attributes: MaritalStatus and Location. How can the audience rule-builder UI be used to build this segment?

- A. Drag and drop the LoyaltyLevel and Age attributes into an "Include all" container Then, drag and drop the MaritalStatus and Location attributes into an "Exclude all" container
- B. Drag and drop the LoyaltyLevel and Age attributes into an "Include any of" container Then, drag and drop the MaritalStatus and Location attributes into an "Exclude all" container
- C. Drag and drop the LoyaltyLevel and Age attributes into an "Include any of" container Then, drag and drop the MaritalStatus and Location attributes into an "Exclude all" container
- **D. Drag and drop the LoyaltyLevel and Age attributes into an "Include all" container Then, drag and drop the MaritalStatus and Location attributes into an "Exclude any of" container**

Answer: D

NEW QUESTION # 20

A large retailer is moving customer loyalty data from a data warehouse to the Adobe RTCDP. The source connectors of the Adobe Experience Platform do not support this data warehouse. The data architect plans to use the API to push the data into the experience platform so that the data can be used in the segment in a few minutes to send campaigns.

What is the efficient way to ingest this data in RTCDP?

- A. Use Real-Time APIs to send multiple single-record requests in parallel
- B. Use the Batch Ingestion API to ingest this data in bulk
- C. Use the Data Landing Zone API to ingest this data immediately
- **D. Use the single HTTP API request to send Multiple Messages**

Answer: D

NEW QUESTION # 21

Which part of Adobe Real-Time CDP is responsible for housing customer information collected from multiple sources?

- A. Graph Database
- B. Identity service
- **C. Real-Time Customer Profile**
- D. Experience Data Model (XDM) System

Answer: C

Explanation:

While several components of the Adobe Experience Platform work together, the Real-Time Customer Profile is the specific functional component responsible for housing and serving the consolidated customer information. It acts as the centralized "hub" where data attributes (from the Individual Profile class) and behavioral events (from the ExperienceEvent class) are aggregated. The Real-Time Customer Profile is not a traditional database but a highly optimized NoSQL data store designed for sub-second retrieval. It stores the "Active Profile," which is the result of the merging and stitching processes. This allows other services, such as the Segmentation Service and Activation destinations, to access a complete and up-to-date representation of any customer instantly. Option A, the Graph Database, is used specifically by the Identity Service (Option C) to manage the relationships between different identity namespaces (like linking an Email to a Cookie ID), but it does not store the full profile attributes like name or purchase history. Option D, the XDM System, is the formal language and structure (the "blueprint") that defines how data is modeled, but it is not the storage layer itself.

Therefore, the Real-Time Customer Profile is the correct entity that houses the actual unified customer data.

NEW QUESTION # 22

.....

Adobe certification exams become more and more popular. The certification exams are widely recognized by international community, so increasing numbers of people choose to take Adobe certification test. Among Adobe certification exams, AD0-E605 is one of the most important exams. So, in order to pass AD0-E605 test successfully, how do you going to prepare for your exam?
