## Pass Guaranteed Quiz Updated VMware - 2V0-32.24 - VMware Cloud Operations 8.x Professional V2 Updated Testkings

Our company, with a history of ten years, has been committed to making efforts on developing 2V0-32.24 exam guides in this field. Since the establishment, we have won wonderful feedback from customers and ceaseless business and continuously worked on developing our 2V0-32.24 exam prepare to make it more received by the public. Moreover, our understanding of the importance of information technology has reached a new level. Efforts have been made in our experts to help our candidates successfully Pass 2V0-32.24 Exam. Seldom dose the e-market have an authorized study materials for reference.

## VMware Cloud Operations 8.x Professional V2 Sample Questions (Q22-Q27):

NEW QUESTION # 22

In vRealize Operations, a user applies a CPU License to a custom group which has existing hosts. How will the Virtual Machines (VMs) on the existing hosts be affected?

- A. The VMs running on the hosts show a 'License is Invalid' watermark.
- **B. The VMs running on the hosts are not affected.**
- C. vRealize Operations prompts the user to apply a VM license key to the VMs running.
- D. The CPU license gets converted to a CPU and VM license.

**Answer: B**

Explanation:

When a CPU license is applied to a custom group in vRealize Operations, it impacts the hosts but does not directly affect the Virtual Machines (VMs) running on those hosts. The license is applied at the host level, and the VMs are not impacted by this change. The VMs will continue to run as they were, and no additional VM licenses are required.

#### NEW QUESTION # 23

When setting up the vRealize Log Insight integration within vRealize Operations what do administrators configure within vRealize Operations?

- A. The vRealize Log Insight collector group instance
- B. The vRealize Log Insight content pack
- **C. The vRealize Log Insight management pack**
- D. The vRealize Log Insight troubleshooting dashboard

**Answer: C**

Explanation:

When setting up vRealize Log Insight integration within vRealize Operations, administrators configure the vRealize Log Insight management pack in vRealize Operations. This management pack allows vRealize Operations to integrate with vRealize Log Insight, enabling the collection and analysis of log data from vRealize Log Insight within the vRealize Operations platform. It provides enhanced visibility and monitoring for logs, allowing users to correlate performance data with log data.

#### NEW QUESTION # 24

Which vRealize Log Insight deployment architecture is valid?

- A. A three node cluster with a large central node and two smaller remote nodes
- **B. A six node cluster deployed with three nodes in each of two datacenters**
- C. A four node cluster deployed with two nodes in each of two datacenters
- D. A three node cluster forwarding all messages to a three node cluster in another datacenter

**Answer: B**

Explanation:

vRealize Log Insight supports the deployment of multi-node clusters across multiple data centers for high availability and scalability. The architecture with three nodes in each of two separate data centers ensures fault tolerance and load balancing. The six-node cluster can operate across the two datacenters and provides a resilient and distributed logging solution.

#### NEW QUESTION # 25

An administrator is attempting to install a new management pack on to a 2-node vRealize Operations cluster but the installation is failing.

Which two actions can the administrator take to troubleshoot the issue? (Choose two.)

- **A. Log into each vRealize Operations node in the cluster as admin.**
- **B. Log into the Primary vRealize Operations node for the cluster as admin.**
- C. Log into each vRealize Operations node in the cluster as root.
- D. Run the \$VMWARE\_PYTHON\_3\_BIN /tmp/Netcheck.py script.
- E. Run the \$VMWARE\_PYTHON\_3\_BIN /usr/lib/vmware-casa/bin/Netcheck.py script.

**Answer: A,B**

Explanation:

Log into each vRealize Operations node in the cluster as admin: Troubleshooting should start by logging into both nodes (or at least the primary node) as an admin user to check for any errors or configuration issues that might be affecting the management pack installation.

Log into the Primary vRealize Operations node for the cluster as admin: The primary node often holds key configuration and management tasks, so troubleshooting on this node can provide more insight into the issue.

#### NEW QUESTION # 26

An administrator has added Microsoft Azure as a data source in vRealize Operations. Which is the minimal time interval that is supported for data collection?

- A. 10 minutes
- B. 1 minute
- C. 30 minutes
- D. 5 minutes

**Answer: C**

Explanation:

When Microsoft Azure is added as a data source in vRealize Operations, the minimal supported time interval for data collection is 30 minutes. This is the smallest interval at which data can be retrieved from Azure, ensuring that performance and resource utilization data is gathered at regular intervals for monitoring and analysis.

#### NEW QUESTION # 27

.....

Usually, the recommended sources of studies for certification exams are boring and lengthy. It makes the candidate feel uneasy and they fail to prepare themselves for 2V0-32.24 exam. Contrary to this, Real4Prep dumps are interactive, enlightening and easy to grasp within a very short span of time. You can check the quality of these unique exam dumps by downloading Free 2V0-32.24 Dumps from Real4Prep before actually purchasing.
