

1Z0-1072-25 Latest Braindumps Pdf, 1Z0-1072-25 Certificate Exam

2026 Latest TrainingQuiz 1Z0-1072-25 PDF Dumps and 1Z0-1072-25 Exam Engine Free Share: https://drive.google.com/open?id=1KNvQ-Omxet59RpyEj6RplpcV0i_Ns5Dh

Being a social elite and making achievements in your own field may be the dream of all people. However, only a very few people seize the initiative in their life. Perhaps our research data will give you some help. As long as you spend less time on the game and spend more time on learning, the 1Z0-1072-25 study materials can reduce your pressure so that users can feel relaxed and confident during the preparation and certification process. It is believed that many users have heard of the 1Z0-1072-25 Study Materials from their respective friends or news stories. So why don't you take this step and try? You will not regret your wise choice.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	- Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block - File - Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.

Topic 2	• Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.
Topic 3	• Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources
Topic 4	• Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN • FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.

1Z0-1072-25 Certificate Exam | Valid 1Z0-1072-25 Dumps Demo

Our website is considered to be the most professional platform offering 1Z0-1072-25 practice guide, and gives you the best knowledge of the 1Z0-1072-25 study materials. Passing the exam has never been so efficient or easy when getting help from our 1Z0-1072-25 Preparation engine. We can claim that once you study with our 1Z0-1072-25 exam questions for 20 to 30 hours, then you will be able to pass the exam with confidence.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which IAM Identity Domain type should you create for a full-featured Identity-as-a-Service (IDaaS) solution?

- A. External User
- **B. Premium**
- C. Free
- D. Oracle Apps Premium

Answer: B

Explanation:

In Oracle Cloud Infrastructure (OCI), when you need a full-featured Identity-as-a-Service (IDaaS) solution, the appropriate Identity Domain type to create is Premium.

Premium Identity Domain: This option provides a comprehensive set of identity and access management (IAM) capabilities, including advanced security features, identity governance, and support for enterprise-grade integrations. It supports managing user identities, multifactor authentication, and various other identity services required for a robust IDaaS solution.

Other Options:

External User: This is a limited domain type typically used for managing users who only need access to specific external services.

Free: This domain type offers limited features and is not intended for full-featured enterprise IAM requirements.

Oracle Apps Premium: This is tailored for integrating with Oracle applications but does not offer the broad capabilities of the Premium option.

Relevant OCI Documentation:

Oracle Identity Domains Overview

This documentation explains the various identity domain types and their use cases within OCI.

NEW QUESTION # 28

How will moving a database instance to a different compartment impact user access?

- A. IAM policies are not tied to compartments.
- **B. Access will be revoked for all users.**
- C. Compartments prevent resource movement.
- D. Compartments are not covered by IAM policies.

Answer: B

Explanation:

In Oracle Cloud Infrastructure (OCI), when you move a database instance to a different compartment, the following impact on user access occurs:

Impact of Moving Resources: When you move a resource, like a database instance, to a different compartment, the IAM policies that grant access to that resource in the original compartment no longer apply. This effectively revokes access for users or groups unless equivalent policies are in place in the new compartment.

Restoring Access: To restore access, you would need to create new IAM policies in the destination compartment that grant the necessary permissions to the users or groups who need access.

Relevant OCI Documentation:

Managing Compartments

Moving Resources

These resources provide detailed steps on how compartment changes impact resource access and management.

NEW QUESTION # 29

What would be the total meteredBytes shown by the File Storage service after the hourly update cycle is complete when you overwrite 0.5 GB of a 1 GB file?

- A. 2.5 GB
- B. 0.5 GB
- C. 1 GB
- **D. 1.5 GB**

Answer: D

Explanation:

In Oracle Cloud Infrastructure (OCI) File Storage, when you overwrite a portion of a file, the service does not immediately reclaim the space occupied by the previous version of the file. The total meteredBytes reflects both the original data and the new data written.

Scenario Explanation: You start with a 1 GB file. When you overwrite 0.5 GB of this file, the file system retains both the 0.5 GB of the original file and the new 0.5 GB you wrote.

Calculation: The original 1 GB file contributes 1 GB to meteredBytes. When 0.5 GB is overwritten, the total usage becomes 1.5 GB (1 GB original + 0.5 GB new).

Thus, after the hourly update cycle, the total meteredBytes shown by the File Storage service will be 1.5 GB.

NEW QUESTION # 30

You enabled Cross Region Replication for the volume and selected US West (San Jose) as the destination region. What should you do to create a new volume from the volume replica?

- **A. No action required. By default, the replica is available as a block volume.**
- B. Trigger the replica.
- C. Initiate the replica.
- D. Activate the replica.

Answer: A

Explanation:

When Cross-Region Replication is enabled for a block volume in Oracle Cloud Infrastructure (OCI), the replication process automatically creates and maintains a synchronized copy of the block volume in the selected destination region (in this case, US West (San Jose)).

Replica Availability: The replicated volume is immediately available as a block volume in the destination region. You do not need to

take any additional action to activate or trigger the replica.

Creating New Volumes: Since the replica is automatically available as a block volume, you can directly use it to create a new volume in the destination region without any manual intervention.

Relevant OCI Documentation:

Cross-Region Block Volume Replication

This documentation outlines how cross-region replication works and confirms that no additional steps are needed to create a new volume from a replica

NEW QUESTION # 31

Which TWO options will accomplish a fully redundant connection from an on-premises data center to a Virtual Cloud Network (VCN) in the us-ashburn-1 region?

- A. Configure a Site-to-Site VPN from a single on-premises CPE.
- B. Configure one FastConnect virtual circuit to the us-ashburn-1 region and a Site-to-Site VPN to the us-ashburn-1 region.
- C. Configure two FastConnect virtual circuits to the us-ashburn-1 region and terminate them in diverse hardware on-premises.
- D. Configure one FastConnect virtual circuit to the us-ashburn-1 region and the second FastConnect virtual circuit to the us-phoenix-1 region.

Answer: B,C

Explanation:

For a fully redundant connection from an on-premises data center to a VCN in the OCI us-ashburn-1 region, it is important to ensure high availability and fault tolerance. Here's how each option contributes to redundancy:

Option B: Two FastConnect Virtual Circuits:

FastConnect provides a dedicated, private connection with higher bandwidth and more consistent performance compared to a VPN. To achieve redundancy, you can configure two FastConnect circuits in the same region (us-ashburn-1), each terminated on diverse hardware on-premises. This setup ensures that even if one circuit or its associated hardware fails, the other circuit can maintain the connection. This ensures no single point of failure in the connectivity to OCI. Thus, option B is correct.

Option D: FastConnect and Site-to-Site VPN:

Another approach to redundancy is to have a mix of connection types. By setting up one FastConnect circuit and one Site-to-Site VPN, both terminating in the same region (us-ashburn-1), you create a diverse connection path. If the FastConnect connection fails, traffic can automatically route through the VPN connection, maintaining connectivity. This setup adds an extra layer of redundancy, making option D correct as well.

Incorrect Options:

Option A: Only configuring a Site-to-Site VPN from a single on-premises CPE does not provide redundancy because it involves just one connection path. If that connection or the CPE fails, there would be no fallback.

Option C: Configuring FastConnect circuits to different regions (us-ashburn-1 and us-phoenix-1) does not provide redundancy within a single region but rather across regions, which is not required for regional redundancy.

Relevant OCI Documentation:

OCI FastConnect Overview

Using Site-to-Site VPN and FastConnect for Redundancy

These references offer more detailed information on setting up redundant connections and the benefits of each connection type within OCI.

NEW QUESTION # 32

.....

To get better condition of life, we all need impeccable credentials of different exams to prove individual's capacity. However, weak 1Z0-1072-25 practice materials may descend and impair your ability and flunk you in the real exam unfortunately. And the worst condition is all that work you have paid may go down the drain for those 1Z0-1072-25 question torrent lack commitments and resolves to help customers. The practice materials of the exam with low quality may complicate matters of the real practice exam. So, you must know about our 1Z0-1072-25 question torrent.
