CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q388-Q393):

NEW QUESTION # 388

A startup company that provides streaming media services is considering a new CSP. The company sees an average volume of 5000TB daily and high QoS. It has received the following bids:

Based on the information above, which of the following CSPs offers the MOST cost-effective solution for streaming?

- A. Provider 4
- **B. Provider 1**
- C. Provider 3
- D. Provider 2

Answer: B

NEW QUESTION # 389

Which of the following is MOST typically accessed through Web services?

- A. None of the above
- B. SaaS
- C. PaaS
- D. IaaS

Answer: C

NEW QUESTION # 390

A DevOps team wants to document the upgrade steps for its public database solution. The team needs a dedicated virtual environment separate from the production systems to replicate multiple installations. Which of the following BEST represents what the team needs?

- A. Containerization
- B. Cold storage
- C. Sandboxing
- D. Infrastructure as code

Answer: C

Explanation:

Sandboxing is the best option for the DevOps team that wants to document the upgrade steps for its public database solution. Sandboxing is a technique that creates a virtual environment that is isolated from the production systems and allows the team to replicate multiple installations without affecting the real data or applications. Sandboxing is useful for testing, debugging, and experimenting with new features or configurations in a safe and controlled way. Sandboxing can also help the team to identify and resolve any potential issues or errors before deploying the upgrade to the production environment.

NEW QUESTION # 391

An oil producer wants to collect and collate information from all the company's oil rigs to analyze the productivity of an oil field. Which of the following cloud services will most likely be used for this project?

- A. Blockchain
- B. Federation
- C. Microservices
- D. Big Data

Answer: D

Explanation:

Big Data cloud services are designed to handle and analyze large volumes of data, such as the data collected from multiple oil rigs. These services provide the ability to store, process, and analyze large datasets, making them ideal for projects where vast amounts of information need to be collected and analyzed to gain insights, such as assessing the productivity of an oil field.

NEW QUESTION # 392

A SaaS provider specifies in a user agreement that the customer agrees that any misuse of the service will be the responsibility of the customer. Which of the following risk response methods was applied?

- A. Avoidance
- B. Transference
- C. Mitigation
- D. Acceptance

Answer: A
