Certified Information-Technology-Management Questions | Latest Real Information-Technology-Management Exam

If you study with our Information-Technology-Management exam questions, you will have a 99% chance to pass the exam. Of course, you don't have to buy any other study materials. Our Information-Technology-Management exam questions can satisfy all your learning needs. During this time, you must really be learning. If you just put Information-Technology-Management Real Exam in front of them and didn't look at them, then we have no way. Our Information-Technology-Management exam questions want to work with you to help you achieve your dreams.

The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, but more importantly, it is necessary to have a good control over the annual propositional trend. The Information-Technology-Management quiz guide through research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use. The WGU Information Technology Management QGC1 prepare torrent can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the qualification examination, combining with the relevant knowledge of recent years, then predict the direction which can determine this year's exam. Information-Technology-Management test material will improve the ability to accurately forecast the topic and proposition trend this year.

WGU Information-Technology-Management Exam Practice Material in Three Diverse Versions

According to the research of the past exams and answers, TestPassKing provide you the latest WGU Information-Technology-Management exercises and answers, which have have a very close similarity with real exam. TestPassKing can promise that you can 100% pass your first time to attend WGU Certification Information-Technology-Management Exam.

WGU Information Technology Management QGC1 Sample Questions (Q213-Q218):

NEW QUESTION # 213

Which prototyping method demonstrates how a solution operates using various data and business rules as inputs?

- A. Simulation
- B. Storyboards
- C. Workflow modeling
- D. Static modeling

Answer: A

Explanation:

Simulation is a prototyping method that replicates how a system or solution would function in real-world scenarios. It allows businesses to test various data inputs, business rules, and operational conditions before full implementation. This method helps identify potential issues and optimize decision-making.

NEW QUESTION # 214

What is the purpose of system testing in the system development life cycle (SDLC)?

- A. To gather the system's user requirements
- B. To verify the system meets specific requirements
- C. To review the individual components of the system
- D. To design the software architecture

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

System testing is a phase in the SDLC where the entire integrated system is tested as a whole to ensure it behaves as specified. The primary purpose of system testing is to verify that the complete system meets the defined functional and non-functional requirements (such as performance, reliability, and security) documented earlier in the lifecycle.

Unlike unit testing, which focuses on individual components, or integration testing, which focuses on interactions between components, system testing validates the end-to-end behavior of the solution from the perspective of overall requirements.

Option A (To review the individual components of the system) describes unit testing, not system testing.

Option B (To gather the system's user requirements) is an activity of the requirements analysis phase, which occurs before design and development.

Option C (To design the software architecture) corresponds to the design phase, not the testing phase.

Thus, the purpose of system testing is to verify the system meets specific requirements, making D the correct answer.

NEW QUESTION # 215

Which phase of the waterfall methodology is executed immediately prior to the implementation phase?

- A. Development
- B. Testing
- C. Analysis
- D. Maintenance

Answer: B

Explanation:

In the Waterfall methodology, the phases flow sequentially:

Requirements # 2. Analysis # 3. Design # 4. Development # 5. Testing # 6. Implementation # 7. Maintenance.

The Testing phase comes immediately before Implementation, where the system is validated, bugs are fixed, and readiness is

confirmed before deployment.
Option A: Analysis occurs much earlier in the process.
Option C: Development precedes testing, not implementation.
Option D: Maintenance comes after implementation.
Thus, the correct phase immediately before implementation is Testing.

NEW QUESTION # 216

Which organizational policy states that an employee should never send unsolicited emails outside the organization?

- A. Information use policy
- B. Social media policy
- C. Employee monitoring policy
- D. Anti-spam policy

Answer: D

Explanation:
Understanding Anti-Spam Policies:
Anti-spam policies prohibit the sending of unsolicited emails, particularly outside the organization.
Such policies protect an organization's reputation and comply with legal frameworks like the CAN-SPAM Act.
Focus on External Communications:
The policy ensures employees refrain from sending emails that may be perceived as spam, safeguarding the organization from legal and reputational risks.
Why Other Options Are Incorrect:
Option A: Information use policies focus on managing and protecting data, not email practices.
Option B: Monitoring policies are about observing employee activity but do not prevent spam.
Option D: Social media policies govern employee behavior on social platforms, not email usage.

"Anti-Spam Guidelines for Businesses" - FTC
IT Policy Frameworks and Guidelines (ISO 27002)

NEW QUESTION # 217

What is the expert system type of artificial intelligence?

- A. A system that imitates the reasoning processes used by skilled humans
- B. The longest identified stretch of dependent activities measured from start to finish
- C. Knowledge-based information system that accomplishes specific tasks on behalf of its users
- D. A system that attempts to emulate the way a typical human brain works

Answer: A

Explanation:
* Definition of Expert Systems:
* An expert system is a type of artificial intelligence that uses knowledge-based reasoning to solve problems, make decisions, or emulate the processes of skilled human experts.
* It consists of a knowledge base and an inference engine to analyze data and draw conclusions.
* Applications of Expert Systems:
* Used in fields like medicine (diagnostic systems), engineering, and finance for decision support.
* Example: A medical expert system might suggest potential diagnoses based on patient symptoms.
* Incorrect Options Analysis:
* B. Emulates the human brain: Refers to neural networks, not expert systems.
* C. Longest stretch of activities: Refers to critical path in project management, unrelated to AI.
* D. Knowledge-based system accomplishing tasks: Describes intelligent agents, not expert systems.
