C_CPI_2506 Exam Certification Cost, C_CPI_2506 Latest Test Prep

So many candidates have encountered difficulties in preparing to pass the C_CPI_2506 exam. But our study materials will help candidates to pass the exam easily. Our C_CPI_2506 guide questions can provide statistics report function to help the learners to find weak links and deal with them. The C_CPI_2506 Test Torrent boost the function of timing and simulating the exam. They set the timer to simulate the exam and help the learners adjust the speed and keep alert. So the C_CPI_2506 guide questions are very convenient for the learners to master and pass the exam.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.

Topic 2	• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 3	• SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 4	• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

SAP Certified Associate - Integration Developer Sample Questions (Q22-Q27):

NEW QUESTION # 22
What kind of editor can you use to manipulate integration flows?

- A. Code editor
- B. Graphical editor
- C. Command-line editor

Answer: B

Explanation:
To manipulate integration flows, you can use a graphical editor that is provided by SAP Integration Suite. The graphical editor allows you to visualize and edit your integration flows using a drag-and-drop interface. It also provides a palette of icons that represent different integration components and actions, such as senders, receivers, routers, mappers, transformers, and so on. You can use the graphical editor to design and configure complex integration scenarios in a user-friendly way. Reference: Overview of Integration Flow Editor | SAP Help Portal, Design and Deploy Your First Integration Flow | SAP Tutorials

NEW QUESTION # 23
In the Cloud Integration capability within SAP Integration Suite, which internal message format is used?

- A. JSON
- B. XSLT
- C. XML

Answer: C

Explanation:
In the Cloud Integration capability within SAP Integration Suite, XML is the internal message format that is used. XML stands for Extensible Markup Language and is a standard format for representing structured data. All messages that are processed by the Cloud Integration capability are converted to XML internally and then transformed to the desired format at the outbound channel. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 24
You use an APIKey for authentication in an HTTPS API call. In which part of the Content Modifier is the APIKey included?

- A. Attachment
- B. Exchange property
- C. Message header
- D. Message body

Answer: C

Explanation:
To use an API key for authentication in an HTTPS API call, you must include the API key in the message header of the content modifier step. The message header contains information related to the message, such as addressing, routing, or metadata. You can use the content modifier step to create or modify message headers using expressions or constants. The API key is typically passed as a value of a specific header field, such as Authorization or X-API-Key, depending on the API provider's requirements. You can use the Camel Simple Expression Language to access or construct the API key value from variables, properties, or system information. Reference: Content Modifier | SAP Help Portal, Using Camel Simple Expression Language | SAP Help Portal

NEW QUESTION # 25
How does the increased number of API calls in a microservices architecture impactAP I management and monitoring within an SAP Integration Suite landscape?

- A. Increased API calls improve API management efficiency and reduce the need for extensive monitoring within the SAP Integration Suite.
- B. Increased API calls necessitate more robust API management tools and comprehensive monitoring capabilities within the SAP Integration Suite tensure
- C. Reduced API calls simplify API management and minimize monitoring needs within the SAP Integration Suite.
- D. Increased API calls necessitate less robust API management tools and simplified monitoring capabilities within the SAP Integration Suite.
- E. performance, security and traceability across the distributed microservices.

Answer: B

Explanation:
In a microservices architecture, applications are decomposed into multiple smaller services communicating via APIs. This results in:
Increased API traffic due to inter-service communication.
Higher need for governance: enforcing policies, security, throttling, and quotas.
Comprehensive monitoring required to trace calls across multiple distributed services to ensure performance, reliability, and compliance.
SAP Integration Suite's API Management provides these capabilities:
Traffic management (quotas, rate limiting).
Security policies (OAuth, API keys).
End-to-end monitoring & analytics for distributed calls.
Thus, the correct answer highlights the need for more robust API management and monitoring in high- volume, microservices-driven landscapes.

NEW QUESTION # 26
In the SAP Integration Suite, where can you change the virtual host name?

- A. Settings APIs
- B. Design APIs
- C. Discover - APIs
- D. Configure ? APIs

Answer: A

Explanation:
In the SAP Integration Suite, you can change the virtual host name in the Settings APIs. The Settings APIs allow you to configure various aspects of your API provider, such as the virtual host name, the base path, the authentication method, and the CORS settings. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 27
......
