PECB NIS-2-Directive-Lead-Implementer practice test software contains many PECB NIS-2-Directive-Lead-Implementer practice exam designs just like the real PECB Certified NIS 2 Directive Lead Implementer (NIS-2-Directive-Lead-Implementer) exam. These NIS-2-Directive-Lead-Implementer practice exams contain all the NIS-2-Directive-Lead-Implementer questions that clearly and completely elaborate on the difficulties and hurdles you will face in the final NIS-2-Directive-Lead-Implementer Exam. PECB Certified NIS 2 Directive Lead Implementer (NIS-2-Directive-Lead-Implementer) practice test is customizable so that you can change the timings of each session. DumpTorrent desktop PECB NIS-2-Directive-Lead-Implementer practice test questions software is only compatible with windows and easy to use for everyone.

PECB NIS-2-Directive-Lead-Implementer Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Testing and monitoring of a cybersecurity program: This domain assesses the abilities of Security Auditors and Compliance Officers in testing and monitoring the effectiveness of cybersecurity programs. Candidates learn to design and conduct audits, continuous monitoring, performance measurement, and apply continual improvement practices to maintain NIS 2 Directive compliance.
Topic 2	<ul style="list-style-type: none"> • Planning of NIS 2 Directive requirements implementation: This domain targets Project Managers and Implementation Specialists focusing on how to initiate and plan the rollout of NIS 2 Directive requirements. It includes using best practices and methodologies to align organizational processes and cybersecurity programs with the directive's mandates.
Topic 3	<ul style="list-style-type: none"> • Communication and awareness: This section covers skills of Communication Officers and Training Managers in developing and executing communication strategies and awareness programs. It emphasizes fostering cybersecurity awareness across the organization and effective internal and external communication during cybersecurity events or compliance activities.
Topic 4	<ul style="list-style-type: none"> • Fundamental concepts and definitions of NIS 2 Directive: This section of the exam measures the skills of Cybersecurity Professionals and IT Managers and covers the basic concepts and definitions related to the NIS 2 Directive. Candidates gain understanding of the directive's scope, objectives, key terms, and foundational requirements essential to lead implementation efforts effectively within organizations.
Topic 5	<ul style="list-style-type: none"> • Cybersecurity roles and responsibilities and risk management: This section measures the expertise of Security Leaders and Risk Managers in defining and managing cybersecurity roles and responsibilities. It also covers comprehensive risk management processes, including identifying, assessing, and mitigating cybersecurity risks in line with NIS 2 requirements.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q12-Q17):

NEW QUESTION # 12

According to Article 10 of the NIS 2 Directive, what is one of the responsibilities of Member States concerning CSIRTs?

- A. Informing the Commission about the identity of the CSIRT along with the CSIRT chosen as the coordinator
- B. Negotiating disclosure timelines with CSIRTs and managing vulnerabilities that impact multiple entities
- C. Monitoring the request management and routing system of CSIRTs to ensure seamless and efficient transitions

Answer: A

NEW QUESTION # 13

What is the required frequency for Member States to update the register of entities?

- A. Every six months
- B. Every year
- C. Every two years

Answer: C

NEW QUESTION # 14

Scenario 1:

into incidents that could result in substantial material or non-material damage. When it comes to identifying and mitigating risks, the company has employed a standardized methodology. It conducts thorough risk identification processes across all operational levels, deploys mechanisms for early risk detection, and adopts a uniform framework to ensure a consistent and effective incident response. In alignment with its incident reporting plan, SecureTech reports on the initial stages of potential incidents, as well as after the successful mitigation or resolution of the incidents.

Moreover, SecureTech has recognized the dynamic nature of cybersecurity, understanding the rapid technological evolution. In

response to the ever-evolving threats and to safeguard its operations, SecureTech took a proactive approach by implementing a comprehensive set of guidelines that encompass best practices, effectively safeguarding its systems, networks, and data against threats. The company invested heavily in cutting-edge threat detection and mitigation tools, which are continuously updated to tackle emerging vulnerabilities. Regular security audits and penetration tests are conducted by third-party experts to ensure robustness against potential breaches. The company also prioritizes the security of customers' sensitive information by employing encryption protocols, conducting regular security assessments, and integrating multi-factor authentication across its platforms. SecureTech reports on the initial stages of potential incidents and after the successful mitigation or resolution of the incidents. Is this in compliance with the NIS 2 Directive requirements? Refer to scenario 1.

- A. No, the Directive requires that incidents are reported only in their initial stages
- B. No, the Directive requires that incidents are reported only after they have been resolved
- **C. Yes, the Directive introduces a two-stage approach to incident reporting, requiring initial and final reports.**

Answer: C

NEW QUESTION # 15

Scenario 5: Based in Altenberg, Germany, Astral Nexus Power is an innovative company founded by visionary engineers and scientists focused on pioneering technologies in the electric power sector. It focuses on the development of next-generation energy storage solutions powered by cutting-edge quantum materials. Recognizing the critical importance of securing its energy infrastructure, the company has adopted the NIS 2 Directive requirements. In addition, it continually cooperates with cybersecurity experts to fortify its digital systems, protect against cyber threats, and ensure the integrity of the power grid. By incorporating advanced security protocols, the company contributes to the overall resilience and stability of the European energy landscape. Dedicated to ensuring compliance with NIS 2 Directive requirements, the company initiated a comprehensive journey toward transformation, beginning with an in-depth comprehension of its structure and context, which paved the way for the clear designation of roles and responsibilities related to security, among others. The company has appointed a Chief Information Security Officer (CISO) who is responsible to set the strategic direction for cybersecurity and ensure the protection of information assets. The CISO reports directly to the Chief Executive Officer (CEO) of Astral Nexus Power which helps in making more informed decisions concerning risks, resources, and investments. To effectively carry the roles and responsibilities related to information security, the company established a cybersecurity team which includes the company's employees and an external cybersecurity consultant to guide them.

Astral Nexus Power is also focused on managing assets effectively. It consistently identifies and categorizes all of its digital assets, develops an inventory of all assets, and assesses the risks associated with each asset. Moreover, it monitors and maintains the assets and has a process for continual improvement in place. The company has also assigned its computer security incident response team (CSIRT) with the responsibility to monitor its on and off premises internet-facing assets, which help in managing organizational risks. Furthermore, the company initiates a thorough process of risk identification, analysis, evaluation, and treatment. By identifying operational scenarios, which are then detailed in terms of assets, threats, and vulnerabilities, the company ensures a comprehensive identification and understanding of potential risks. This understanding informs the selection and development of risk treatment strategies, which are then communicated and consulted upon with stakeholders. Astral Nexus Power's commitment is further underscored by a meticulous recording and reporting of these measures, fostering transparency and accountability. Based on scenario 5, which of the following best demonstrates Astral Nexus Power's commitment to meeting NIS 2 Directive's requirements regarding asset management?

- A. The company's in-depth comprehension of its structure and context
- B. The company's clear designation of roles and responsibilities
- **C. CSIRT's monitoring of the company's on and off premises internet-facing assets**

Answer: C

NEW QUESTION # 16

Scenario 6: Solicure is a leading pharmaceutical company dedicated to manufacturing and distributing essential medications. Thriving in an industry characterized by strict regulations and demanding quality benchmarks, Solicure has taken proactive steps to adhere to the requirements of the NIS 2 Directive. This proactive approach strengthens digital resilience and ensures the continued excellence of product offerings.

Last year, a cyberattack disrupted Solicure's research and development operations, raising concerns about the potential compromise of sensitive information regarding drug formulation. Solicure initiated an immediate investigation led by its cybersecurity team, gathering technical data to understand the attackers' methods, assess the damage, and swiftly identify the source of the breach. In addition, the company implemented measures to isolate compromised systems and remove the attackers from its network. Lastly, acknowledging the necessity for long-term security improvement, Solicure implemented a comprehensive set of security measures to

comply with NIS 2 Directive requirements, covering aspects such as cybersecurity risk management, supply chain security, incident handling, crisis management, and cybersecurity crisis response planning, among others.

In line with its crisis management strategy, Solicure's chief information security officer, Sarah, led the initiative to develop a comprehensive exercise plan to enhance cyber resilience. This plan was designed to be adaptable and inclusive, ensuring that organizational decision-makers possessed the essential knowledge and skills required for effective cybersecurity threat mitigation. Additionally, to enhance the efficacy of its crisis management planning, Solicure adopted an approach that prioritized the structuring of crisis response.

A key aspect of Solicure's cybersecurity risk management approach centered on the security of its human resources. Given the sensitive nature of its pharmaceutical products, the company placed utmost importance on the employees' backgrounds. As a result, Solicure implemented a rigorous evaluation process for new employees, including criminal history reviews, prior role investigations, reference check, and pre-employment drug tests.

To comply with NIS 2 requirements, Solicure integrated a business continuity strategy into its operations. As a leading provider of life-saving medicines and critical healthcare products, Solicure faced high stakes, with potential production and distribution interruptions carrying life-threatening consequences for patients. After extensive research and consultation with business management experts, the company decided to utilize a secondary location to reinforce the critical operations at the primary site. Along with its business continuity management strategy, Solicure developed a set of procedures to recover and protect its IT infrastructure in the event of a disaster and ensure the continued availability of its medications.

Based on scenario 6, which of the following approaches did Solicure implement as a part of its business continuity strategy?

- A. Standby arrangement
- B. Backup arrangement
- C. Multi-site operation

Answer: A
