1Z0-1123-25 Exam Actual Tests | Study 1Z0-1123-25 Dumps

In addition to the PDF questions Itcerttest offers desktop 1Z0-1123-25 practice exam software and web-based Oracle Cloud Infrastructure 2025 Migration Architect Professional (1Z0-1123-25) practice exam, to help you cope with Oracle Cloud Infrastructure 2025 Migration Architect Professional (1Z0-1123-25) exam anxiety. These Oracle 1Z0-1123-25 Practice Exams simulate the actual Oracle 1Z0-1123-25 exam conditions and provide you with an accurate assessment of your readiness for the 1Z0-1123-25 exam.

Oracle 1Z0-1123-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Migrate Infrastructure Workloads Between OCI Regions: This section assesses the skills of Cloud Operations Engineers in managing workload replication across OCI regions. It covers OCI Object Storage Replication, Block Volume Replication, and File System Replication to ensure business continuity. Additionally, candidates will learn how to design and implement full-stack disaster recovery strategies using OCI Full Stack Disaster Recovery Service to minimize downtime and data loss.
Topic 2	• Design and Implement Migrations Using Oracle Cloud VMware Solution (OCVS):This section measures the skills of VMware Cloud Engineers in migrating on-premises VMware environments to OCI. It covers source discovery to assess existing infrastructure, designing the target OCVS environment, and understanding migration prerequisites. Candidates will also explore Hybrid Cloud Extension as a tool for seamless migration and integration between VMware workloads and OCI.
Topic 3	• Migrate Containerized Applications to OCI: This section evaluates the expertise of Cloud DevOps Engineers in migrating containerized applications to Oracle Cloud Infrastructure. It introduces the fundamentals of OCI Container Engine for Kubernetes and Oracle Cloud Infrastructure Registry. Candidates will learn the key phases involved in migrating containerized workloads and ensuring proper orchestration and scaling within the OCI ecosystem.

Featured Oracle certification 1Z0-1123-25 exam test questions and answers

If you prefer to practice 1Z0-1123-25 exam dumps on paper, then our exam dumps is your best choice. 1Z0-1123-25 PDF version is printable, and you can print them into hard one if you like, and you can also take some notes on them and practice them anytime and anyplace. Moreover, 1Z0-1123-25 training materials cover most of knowledge points for the exam, and you can have a good command of the major knowledge points as well as improve your professional ability in the process of practicing. We offer you free update for 365 days for 1Z0-1123-25 Exam Materials after purchasing. Our system will send the update version to you

automatically.

Oracle Cloud Infrastructure 2025 Migration Architect Professional Sample Questions (Q32-Q37):

NEW QUESTION # 32
As a migrations architect, you are explaining the workflow of Oracle Cloud Migrations (OCM) service to a business partner. After the replication of virtual machine (VM) data to Oracle Cloud Infrastructure (OCI) using OCM, what is the next step to launch the migrated instance?

- A. A Compute instance is automatically launched after the replication process
- B. Create a Compute instance with an attached Block Volume and configure the Hydration Agent to transfer the replicated data into the Block Volume
- C. Deploy a Resource Manager Stack to launch the Compute instance with the replicated Block Volume

Answer: C

Explanation:
Deploying a Resource Manager Stack to launch the Compute instance with the replicated Block Volume is the correct next step after the replication of VM data to OCI using OCM.

NEW QUESTION # 33
What is the primary function of the Data Transfer Utility provided by Oracle Cloud Infrastructure (OCI)?

- A. To automate data replication between OCI compute instances
- B. To prepare transfer disks for data shipment to Oracle
- C. To transfer data between OCI regions
- D. To transfer data between different OCI Compartments

Answer: B

Explanation:
The Data Transfer Utility is primarily used to prepare transfer disks for data shipment to Oracle's data centers.

NEW QUESTION # 34
Your company wants to expand its cloud infrastructure footprint by adopting Oracle Cloud VMware Solution (OCVS). The OCVS Software Defined Data Center (SDDC) platform will be dedicated to hosting business-critical workloads and should avoid single points of failure within its architecture. Which two would be considered while setting up the solution?

- A. vSphere Distributed Resource Scheduler (DRS)
- B. HCX Mobility Groups
- C. OCI Fault Domain
- D. vSAN Fault Domain

Answer: C,D

Explanation:
OCI Fault Domains and vSAN Fault Domains are critical considerations to avoid single points of failure and ensure high availability for business-critical workloads hosted on the OCVS SDDC platform.

NEW QUESTION # 35
You are planning to configure VMware Hybrid Cloud Extension (HCX) for a migration from an on-premises data center to Oracle Cloud VMware Solution (OCVS). What are the primary roles of the HCX Manager and HCX Connector?

- A. Both HCX Manager and HCX Connector are deployed in the OCVS environment to facilitate bidirectional migrations between cloud instances
- B. The HCX Manager is installed in the source environment to initiate migrations, whereas the HCX Connector receives the

migration traffic in the target OCVS environment

- C. The HCX Connector is responsible for WAN optimization and network extension in the OCVS environment, whereas the HCX Manager handles these tasks in the on-premises environment
- D. The HCX Manager is deployed in the OCVS environment as the Tunnel receivers, whereas the HCX Connector is installed in the on-premises environment as the Tunnel initiators

Answer: B

Explanation:
The HCX Manager is responsible for initiating migrations and managing the migration process in the source environment, while the HCX Connector receives the migration traffic in the target OCVS environment.

NEW QUESTION # 36
You have been tasked with provisioning an Oracle Cloud Infrastructure Container Engine for Kubernetes (OKE) cluster to deploy new applications and manage existing ones. Which two statements are FALSE?

- A. To access the cluster using kubectl, you have to set up a Kubernetes manifest file stored in the $HOME/.manifest directory
- B. The only available option when a cluster's Kubernetes API endpoint has a public IP address is to control the cluster locally using kubectl and the Kubernetes Dashboard
- C. To access the cluster using kubectl, you have to set up a Kubernetes configuration file stored in the $HOME/.kube directory
- D. When a cluster's Kubernetes API endpoint has a public IP address, you can access the cluster in Cloud Shell by setting up a kubeconfig file

Answer: A,B

Explanation:
Setting up a Kubernetes manifest file in the $HOME/.manifest directory is not a standard practice for accessing a Kubernetes cluster using kubectl. Manifest files are used to define and manage Kubernetes resources, such as pods, deployments, and services, but they are not used for configuring access to the cluster.
While controlling the cluster locally using kubectl and the Kubernetes Dashboard is one way to interact with a cluster, it is not the only available option when a cluster's Kubernetes API endpoint has a public IP address. You can also access and manage the cluster remotely using kubectl from any environment that has network connectivity to the cluster.

NEW QUESTION # 37
......

The content of our 1Z0-1123-25 practice engine is chosen so carefully that all the questions for the 1Z0-1123-25 exam are contained. And our 1Z0-1123-25 study materials have three formats which help you to read, test and study anytime, anywhere. This means with our products you can prepare for exams efficiently and at the same time you will get 100% success for sure. If you desire a 1Z0-1123-25 Certification, our products are your best choice.
