You can easily get these ServiceNow CIS-SPM Exam Dumps from ServiceNow that are helping candidates achieve their goals.

### ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q72-Q77):

#### NEW QUESTION # 72

Can an `it_project_manager` convert a task to a milestone?

- A. Yes, by right-clicking on the task in the Planning Console.
- B. No, this can only be done by a system admin.
- C. Yes, if the task is assigned to the project manager.
- D. No, the PPS admin role is also required.

**Answer: A**

Explanation:

Explanation

According to the Planning Console document, an `it_project_manager` can convert a task to a milestone by right-clicking on the task in the Planning Console and selecting Convert to Milestone. The other options are not correct, as they are not the ways to convert a task to a milestone. A system admin or a PPS admin role is not required for this action. The task assignment is not relevant for this action.

#### NEW QUESTION # 73

If an `it_project_manager` does not want to equally distribute hours across the resource plan time frame, what allocation spread should be used?

- A. Even.
- B. Back Load.
- C. Front Load.
- D. Any.

**Answer: D**

Explanation:

If an `it_project_manager` does not want to equally distribute hours across the resource plan time frame, the allocation spread should be set to Any. This option allows the `it_project_manager` to manually enter the hours for each month or quarter in the resource plan. The other options (Even, Back Load, and Front Load) automatically distribute the hours evenly, from the end, or from the start of the time frame, respectively. You can find more information about the allocation spread in the Product Documentation for ServiceNow.

#### NEW QUESTION # 74

Which role is needed to group related projects and demands?

- A. it\_demand\_manager
- B. it\_project\_manager
- C. it\_program\_manager
- D. it\_project\_user

**Answer: C**

Explanation:

Explanation

According to the ServiceNow documentation<sup>1</sup>, the it\_program\_manager role is needed to group related projects and demands. This role can create and manage programs, which are containers for projects and demands that share a common goal or objective. The other options are incorrect because:

B: it\_project\_manager: The it\_project\_manager role can create and manage projects, but not group them into programs<sup>2</sup>.

C: it\_demand\_manager: The it\_demand\_manager role can create and manage demands, but not group them into programs<sup>3</sup>.

D: it\_project\_user: The it\_project\_user role can view and edit project tasks, but not create or manage projects, demands, or programs<sup>4</sup>.

#### NEW QUESTION # 75

What is the default table that stores the idea categories that a user can select from when submitting an idea?

- A. im\_category
- B. im\_idea\_core
- C. im\_module
- D. dmn\_demand

**Answer: A**

Explanation:

Explanation

According to the Category Configuration document, the default table that stores the idea categories that a user can select from when submitting an idea is im\_category. This table contains the predefined categories for ideas, such as Business Process, Customer Service, or IT Service. The other options are not correct, as they are not the tables that store the idea categories. The dmn\_demand table stores the demand records that are created from the approved ideas. The im\_module table stores the idea modules that are used to group ideas by different criteria. The im\_idea\_core table stores the core fields of the idea records.

#### NEW QUESTION # 76

Which is the minimum role that has access to the Project Administration > Settings > Preferences-Project module?

- A. it\_pps\_admin
- B. sys\_admin
- C. it\_project\_manager
- D. it\_program\_manager

**Answer: A**

Explanation:

According to the ServiceNow documentation<sup>1</sup>, the it\_pps\_admin role is the minimum role that has access to the Project Administration > Settings > Preferences-Project module. This role can configure the project preferences, such as the default project template, the default project currency, and the default project status. The other options are incorrect because:

A. it\_program\_manager: The it\_program\_manager role can create and manage programs, but not project preferences<sup>2</sup>.

B. sys\_admin: The sys\_admin role can access all modules and features on the platform, but it is not the minimum role required for the Project Administration > Settings > Preferences-Project module<sup>3</sup>.

C. it\_project\_manager: The it\_project\_manager role can create and manage projects, but not project preferences<sup>4</sup>.
