All these three ITexamReview FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam questions formats are easy to use and perfectly work with all devices, operating systems, and the latest web browsers. So rest assured that with the ITexamReview FCP_FMG_AD-7.6 Exam Dumps you will get everything that you need to learn, prepare and pass the challenging FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam with good scores.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
Topic 3	<ul style="list-style-type: none">• Troubleshooting
Topic 4	<ul style="list-style-type: none">• This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 5	<ul style="list-style-type: none">• Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.

Topic 6	<ul style="list-style-type: none"> • Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.

FCP_FMG_AD-7.6 Dumps - Practice FCP_FMG_AD-7.6 Questions

Without a doubt, there is one thing that can assist them with perceiving this interest and clearing their FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam with flying colors. Fortinet FCP_FMG_AD-7.6 dumps merge all that gigantic and the competitor doesn't require to purchase the aide or different books to review. They have this test material and need nothing else for planning FCP - FortiManager 7.6 Administrator exam.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q49-Q54):

NEW QUESTION # 49

An administrator configures a new BGP peer in the FortiManager device-level database of FortiGate. They reinstall the policy package to the managed FortiGate device without any errors.

However, when the administrator logs in to FortiGate, they do not see the BGP configuration changes. What is the most likely reason why FortiManager did not push the BGP peer changes to FortiGate?

- A. The FortiGate firmware version is different from the FortiManager ADOM version.
- **B. The administrator must use the Install Wizard and select Install device settings only to push BGP settings**
- C. The administrator must run a sanity check on FortiManager to make sure the database is not corrupted.
- D. Fortigate has a BGP template assigned on the FortiManager database.

Answer: B

Explanation:

If you change BGP in FortiManager and only reinstall the policy package, the change will NOT reach FortiGate because BGP is a device setting. You must install device settings.

NEW QUESTION # 50

A service provider administrator has assigned a global policy package to a managed customer ADOM named My_ADOM. The customer administrator has access only to My_ADOM.

How can the customer administrator edit the global header policy of the global policy package?

- **A. The customer administrator cannot edit the global header policy; only the service provider administrator can make changes from the global ADOM.**
- B. The customer administrator can edit the header policy by using workspace mode on the global ADOM.
- C. The service provider administrator can unlock the global policy from the global ADOM to authorize changes to the customer administrator.
- D. The customer administrator can edit the header policy by using workflow mode on the global ADOM and My_ADOM.

Answer: A

Explanation:

The global policy package is managed only from the global ADOM by the service provider administrator.

Customer administrators with access solely to their ADOM (My_ADOM) cannot edit the global header policy; such changes must be made by the service provider administrator in the global ADOM.

NEW QUESTION # 51

Refer to the exhibit.

An administrator created two new meta fields in FortiManager. Which operation can you perform with these parameters?

- A. You can export them to be used in other ADOMs.
- **B. You can add them to objects as custom attributes.**
- C. You can use them as variables in scripts.
- D. You can invoke them using the \$ character.

Answer: B

Explanation:

Meta fields in FortiManager can be added to objects as custom attributes, allowing administrators to categorize and add additional information to firewall objects for easier management and identification.

NEW QUESTION # 52

An administrator assigned the Training global policy package to the Branches policy package in ADOM1. Later, the administrator created a new policy package named Remotes on ADOM1.

What should the administrator do to sync the Training global policy package with the Remotes policy package in ADOM1?

- A. Unassign the Training policy package and reassign it to all policy packages within ADOM1
- **B. Assign the Training global policy package to the Remotes policy package**
- C. Manually add and assign the Remotes policy package to the Training global policy package
- D. Use the automatically install policies to ADOM devices method to sync from the Training global policy package to the Remotes policy package

Answer: B

Explanation:

In FortiManager, global policy packages are not automatically assigned to new policy packages created in an ADOM. To apply a global policy (like "Training") to a new policy package (like "Remotes"), the administrator must manually assign the global policy to that policy package.

Therefore, the correct step is to assign the Training global policy package to the Remotes policy package.

NEW QUESTION # 53

What must you consider before deciding to use FortiManager to manage a FortiAnalyzer device?

- A. Confirm that FortiManager has enough storage capacity for the expected logs.
- B. Ensure that FortiAnalyzer features are installed in advance.
- C. Check whether FortiManager is part of a high availability (HA) cluster.
- **D. Determine whether the VDOMs of the same FortiGate will be assigned to different ADOMs.**

Answer: D

Explanation:

When FMG is managing a FAZ, you cannot switch to advanced mode. And it is only in advanced mode Vdoms of the same Fortigate can be assigned to different ADOM.

NEW QUESTION # 54

.....

It will improve your skills to face the difficulty of the FCP_FMG_AD-7.6 exam questions and accelerate the way to success in IT filed with our latest study materials.
