### NEW QUESTION # 108

A customer is hesitant to directly connect their network to the Cortex platform due to compliance restrictions.

Which deployment method should the customer use to ensure secure connectivity between their network and the Cortex platform?

- A. Elasticsearch
- B. Broker VM
- C. Windows Event Collector
- D. Syslog collector

**Answer: B**

Explanation:

To ensure secure connectivity between the customer's network and the Cortex platform while adhering to compliance restrictions, the customer should use the Broker VM. The Broker VM acts as a secure intermediary between the local network and the Cortex platform, allowing for controlled and encrypted communication without directly exposing the network to the platform.
