## Study Guide AP-222 Pdf & Verified AP-222 Answers

During review, you can contact with our after-sales if there are any problems with our AP-222 exam torrent. They will help you 24/7 all the time. These services assure you avoid any loss. Besides, our passing rate of AP-222 practice materials has reached up to 98 to 100 percent up to now, so you cannot miss this opportunity. Besides, free updates of AP-222 Exam Torrent will be sent to your mailbox freely for one year, hope you can have a great experience during usage of our practice materials.

## Salesforce Public Sector Solutions Accredited Professional Sample Questions (Q97-Q102):

### NEW QUESTION # 97

The employee object has to be linked to the person account to use the Public Sector data model with the Employee data model. How should the employee object be linked with other objects?

- A. PersonAccount->User->Employee
- B. PersonAccount -> Individual <- Employee.
- C. Contact -> Individual <- Employee

- D. User -> Individual <- Custom employee object

**Answer: B**

Explanation:

Linking the Employee object with the PersonAccount in the context of the Public Sector data model involves leveraging the Individual object as a junction. The PersonAccount represents the personal details of an individual, while the Individual object in Salesforce acts as a standard mechanism to store privacy and personal data consent information. By associating the Employee custom object with the Individual object, which in turn is linked to the PersonAccount, a comprehensive data model is established. This structure supports the management of employee data in alignment with personal accounts, facilitating a unified view of individuals as both constituents and employees within the public sector framework. This setup respects Salesforce's design principles for data models, ensuring data integrity and privacy compliance.

### NEW QUESTION # 98

A Technical Consultant is implementing an experience site for a government agency where they will be accepting grant applications during a specific window of time. The Technical Consultant expects a high volume of interest in this grant offering. What three steps or tools should be leveraged to ensure the solution can support this surge?

- A. Analyze and test the application for the expected load with a load testing tool
- B. Perform UAT testing to find defects in the code
- C. Set up IP restrictions to control who can access the website and when
- D. Identify expensive processes to offload to asynchronous processes.
- E. Implement CDN and waiting rooms

**Answer: A,D,E**

Explanation:

To ensure that a government agency's experience site can handle a high volume of grant applications during a specific window, the following steps or tools should be leveraged:

\* Identify expensive processes to offload to asynchronous processes (Option C). This approach helps manage resource-intensive tasks without impacting the user experience on the front end, particularly important during high-traffic periods.

\* Implement CDN and waiting rooms (Option D). Content Delivery Networks (CDNs) can significantly improve load times for users by caching content at edge locations closer to users. Waiting rooms can be used to manage access to the site during peak times, preventing overload.

\* Analyze and test the application for the expected load with a load testing tool (Option E). Prior to going live, it is crucial to simulate expected traffic using load testing tools to ensure that the site can handle the surge in users without performance degradation.

Option A, while important, primarily focuses on code quality rather than scalability and performance under load. Option B, setting up IP restrictions, does not directly contribute to handling a surge in site traffic but rather controls access based on user location or network, which may not be relevant to the scenario described.

### NEW QUESTION # 99

A government agency is planning for a project Implementation. The project has to comply with regulations for storing protected health information (PHI). What are two different Salesforce security tools that can be used to meet this requirement?

- A. Setup Audit Trail
- B. Event Monitoring
- C. Field Audit Trail
- D. Platform Encryption

**Answer: C,D**

Explanation:

Field Audit Trail and Platform Encryption are two different Salesforce security tools that can be used to meet the requirement of storing protected health information (PHI). Field Audit Trail allows government agencies to track changes to sensitive data fields over time and set retention policies for field history data. Platform Encryption allows government agencies to encrypt sensitive data at rest while preserving critical platform functionality. ### NEW QUESTION # 100

A resident in the city of Richdale has concerns about unnecessary debris from construction at a nearby residence and has filed a complaint with the city. The city uses Public Sector Solutions for LPI (Licensing, Permitting & Inspections) to manage residential construction permits.

What three recommendations should a Technical Consultant provide to the city to handle complaints from residents and tie them back to existing residential construction permits?

- A. Link Cases to Permits
- **B. Link Inspections and Visits to Permit Applications**
- C. Set up Business Rules Engine (BRE) to determine Complaint validity.
- **D. Configure Action Plans on Cases and Permits**
- **E. Configure Inspections and Visits**

**Answer: B,D,E**

Explanation:

Linking inspections and visits to permit applications allows the city to track the progress and status of the inspections related to the complaints. Configuring inspections and visits enables the city to define the inspection types, schedules, checklists, and outcomes. Configuring action plans on cases and permits allows the city to automate the inspection tasks and workflows, assign them to inspectors, and collaborate on them using Chatter. ### NEW QUESTION # 101

After a grantseeker has submitted an application for review. Foodvania needs to review the Funding Request and allocate the funds appropriately. For audit purposes, all expenditures must be tracked according to how the money was disbursed (Mortgage arrearage. Utility assistance, etc.).

Which two would the consultant build to handle this request utilizing Public Sector Solutions(PSS)?

- A. Recommend using PSS with the Nonprofit Success Pack.
- **B. Recommend using PSS with the Grants Management product.**
- **C. Recommend using PSS with the Outbound Funds Module.**
- D. Recommend using PSS with FinancialForce Accounting.

**Answer: B,C**

Explanation:

The Outbound Funds Module and the Grants Management product are two solutions that can be used with Public Sector Solutions (PSS) to handle the request of deploying a digital experience that enables constituents to sign up for volunteer projects. The Outbound Funds Module is an open source app that can help public sector agencies to track their funding programs, funding requests, disbursements, and expenditures. The Grants Management product is a prebuilt app that comes with PSS and it can help public sector agencies to manage the entire grant lifecycle, from application to award to reporting.
