問題 #77

Which technologies should you use to integrate SAP S/4HANA Cloud Private Edition with an SAP public cloud solution? Note: There are 2 correct answers to this question.

- **A. SAP Integration Suite**
- B. SAP HANA Cloud
- **C. SAP Connectivity service**
- D. SAP Process Orchestration

答案: A,C

解題說明:

Step 1 - Understanding the Question

The question asks which technologies are used to integrate SAP S/4HANA Cloud, Private Edition with SAP public cloud solutions (for example, SAP SuccessFactors, SAP Ariba, SAP Concur, or SAP Business Network).

SAP recommends cloud-native integration technologies that support secure, scalable, and managed connectivity between private and public cloud systems.

Step 2 - Evaluate Each Option

A). SAP Process Orchestration

* SAP Process Orchestration (PO) is an on-premise middleware combining Process Integration (PI) and Business Process Management (BPM).

* It is not part of SAP's recommended integration architecture for cloud-to-cloud scenarios.

* SAP Integration Suite has replaced PO for modern cloud integrations.

Result: Incorrect - Legacy tool, not used for cloud integration.

B). SAP HANA Cloud

* SAP HANA Cloud is a database-as-a-service, not an integration platform.

* It stores and processes data but does not handle integration flows or connectivity between cloud solutions.

Result: Incorrect - Not used for system-to-system integration.

C). SAP Connectivity service

* The SAP Connectivity service is part of SAP Business Technology Platform (BTP).

* It enables secure communication between SAP BTP applications (including SAP Integration Suite) and on-premise or private systems like SAP S/4HANA Cloud, Private Edition.

* It provides the tunnel connection and secure channel required for data exchange between systems hosted in different environments.

Result: Correct - Used for secure connection between SAP BTP and Private Edition systems.

D). SAP Integration Suite

* SAP Integration Suite (part of BTP) is SAP's strategic cloud integration platform.

* It provides capabilities such as:

* API management

* Cloud integration (iFlows)

- * Event mesh for event-driven communication
 - * Connectivity with public cloud and on-premise systems
 - * It is the primary tool for integrating SAP S/4HANA Cloud (Private or Public) with other SAP cloud solutions.
- Result: Correct - Core integration technology for hybrid and cloud landscapes.
