

# Juniper - JN0-452 - High Pass-Rate Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) New Questions

P.S. Free & New JN0-452 dumps are available on Google Drive shared by Dumpcollection: <https://drive.google.com/open?id=1V5KmZHpzh3dJDIVi18n5zLVr9tEvGGYI>

Another great way to pass the JN0-452 exam in the first attempt is by doing a selective study with valid JN0-452 braindumps. If you already have a job and you are searching for the best way to improve your current JN0-452 test situation, then you should consider the JN0-452 Exam Dumps. By using our updated JN0-452 products, you will be able to get reliable and relative JN0-452 exam prep questions, so you can pass the exam easily. You can get one-year free Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) exam updates from the date of purchase.

It is important to mention here that the Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) practice questions played important role in their Juniper JN0-452 Exams preparation and their success. So we can say that with the Juniper JN0-452 Exam Questions you will get everything that you need to learn, prepare and pass the difficult Juniper JN0-452 exam with good scores.

## JN0-452 New Exam Braindumps - JN0-452 PDF Guide

Now, if you use JN0-452 preparation materials, you only need to learn twenty to thirty hours to go to the exam. And, you will have a 99% chance to pass the exam. Of course, you don't have to buy any other study materials. JN0-452 exam questions can satisfy all your learning needs. During this time, you must really be learning. If you just put JN0-452 Real Exam in front of them and didn't look at them, then we have no way. JN0-452 exam questions want to work with you to help you achieve your dreams.

## Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q38-Q43):

### NEW QUESTION # 38

An administrator uses the Marvis conversational assistant and asks, "Why is my client failing to connect?" Marvis responds with a root cause analysis indicating an "Authentication Failure" due to "RADIUS Server Missing Events." What does this specific Marvis insight mean?

- A. The client device is not configured as a Network Access Service (NAS) client on the RADIUS server.
- B. The APs at the site cannot reach the configured RADIUS server, causing EAP requests to time out.
- C. The RADIUS server is online but is explicitly rejecting the client's credentials.
- D. The client is using the wrong PSK password.

**Answer: B**

**NEW QUESTION # 39**

A user with an 802.1X-configured laptop moves from their desk to a conference room. The user's VoIP call drops during the transition. The administrator investigates and finds that the client performed a full EAP re-authentication when it connected to the conference room AP, which took several seconds. Which feature was likely not enabled or not functioning correctly on the WLAN, leading to the slow roam?

- A. Client Isolation
- B. Band Steering
- C. Fast Roaming (802.11r or OKC)
- D. WPA3 Encryption

**Answer: C**

**NEW QUESTION # 40**

What is the purpose of a Device Profile in the Mist UI?

- A. To create a profile for a user in the guest database.
- B. To apply a configuration to all devices within a specific site.
- C. To define a security policy for a type of client device (e.g., iPhone).
- D. To apply specific settings (like disabling an LED or setting a static IP) to APs of a certain model.

**Answer: D**

**NEW QUESTION # 41**

Which Service Level Expectation (SLE) specifically measures the success rate of clients passing the initial 802.11 association frame exchange with an access point?

- A. Successful Connects
- B. Time to Connect
- C. Coverage
- D. Roaming

**Answer: A**

**NEW QUESTION # 42**

An access point discovers switch information using which protocol?

- A. SNMP
- B. LLDP
- C. CDP
- D. ARP

**Answer: B**

Explanation:

In Juniper Networks Mist AI Wireless, access points discover upstream switch and port information using Link Layer Discovery Protocol (LLDP). LLDP is an IEEE-standard, vendor-neutral Layer 2 discovery protocol designed specifically to allow network devices to advertise and learn information about directly connected neighbors.

When a Juniper Mist AP connects to a wired switch, it uses LLDP to exchange information such as:

- \* Switch hostname and chassis ID
- \* Switch port identifier
- \* VLAN details
- \* Power over Ethernet (PoE) capabilities and power allocation

This information is critical for Mist operations and visibility. It enables the Mist cloud to accurately display AP-to-switch mappings,

identify the exact switch port an AP is connected to, validate PoE delivery, and assist with troubleshooting wired-side issues that impact wireless performance. LLDP data is also leveraged by Mist AI and Marvis to correlate wired and wireless events, improving root-cause analysis.

The other options are incorrect for the following reasons:

\* CDP (Cisco Discovery Protocol) is a Cisco-proprietary protocol and is not used by Juniper Mist APs for switch discovery.

\* ARP (Address Resolution Protocol) resolves IP addresses to MAC addresses and does not provide device or port identity information.

\* SNMP is a management and monitoring protocol used by controllers or management systems, not by APs for neighbor discovery.

Because LLDP is standards-based, lightweight, and designed for neighbor discovery, it is the correct and supported protocol used by Juniper Mist APs to learn switch information.

Therefore, the correct answer is D. LLDP.

## NEW QUESTION # 43

.....

We can promise that our JN0-452 study materials will be the best study materials in the world with the high pass rate as 98% to 100%. All these achievements are due to the reason that our JN0-452 exam questions have a high quality that is unique in the market. If you decide to buy our JN0-452 training dumps, we can make sure that you will have the opportunity to enjoy the JN0-452 practice engine from team of experts.
