Users can customize the time and 200-201 questions of Cisco 200-201 practice tests according to their needs. You can give more than one test and track the progress of your previous attempts to improve your marks on the next try. These 200-201 mock tests are made for customers to note their mistakes and avoid them in the next try to pass Understanding Cisco Cybersecurity Operations Fundamentals (200-201) exam in a single try.

If you are the first time to prepare the 200-201 exam, it is better to choose a type of good study materials. After all, you cannot understand the test syllabus of the 200-201 exam in the whole round. It is important to predicate the tendency of the 200-201 study materials if you want to easily pass the exam. And our 200-201 Exam Questions are the one which can exactly cover the latest information of the exam in the first time for our professionals are good at this subject and you can totally rely on us.

200-201 Exam Dumps Demo | Test 200-201 Questions Answers

You may find that there are a lot of buttons on the website which are the links to the information that you want to know about our 200-201 exam braindumps. Also the useful small buttons can give you a lot of help on our 200-201 study guide. Some buttons are used for hide or display answers. What is more, there are extra place for you to make notes below every question of the 200-201 practice quiz. Don't you think it is quite amazing? Just come and have a try!

The Cisco 200-201 Exam consists of 100 multiple-choice questions that must be completed within 120 minutes. To successfully pass the exam, candidates must score a minimum of 750 out of 1000 points. 200-201 exam can be taken at any authorized Pearson VUE testing center, and the cost of the exam is \$300 USD. Upon passing the exam, candidates will receive the Cisco Certified CyberOps Associate certification, which is a valuable credential in the field of cybersecurity operations.

Cisco Understanding Cisco Cybersecurity Operations Fundamentals Sample Questions (Q280-Q285):

NEW QUESTION # 280

What is a description of a social engineering attack?

- A. email offering last-minute deals on various vacations around the world with a due date and a counter
- B. fake offer for free music download to trick the user into providing sensitive data
- C. package deliberately sent to the wrong receiver to advertise a new product
- D. mistakenly received valuable order destined for another person and hidden on purpose

Answer: B

Explanation:

Social engineering attacks involve manipulating individuals into divulging confidential information or performing actions that compromise security. The fake offer for a free music download is a classic example of social engineering, where attackers lure users with a tempting offer to trick them into providing personal information or downloading malware.

Understanding Cisco Cybersecurity Operations Fundamentals (CBROPS)

NEW QUESTION # 281

Which vulnerability type is used to read, write, or erase information from a database?

- A. cross-site scripting
- B. SQL injection
- C. buffer overflow
- D. cross-site request forgery

Answer: B

NEW QUESTION # 282

A compliance analyst receives a complaint from a customer regarding personal data being unlawfully retained despite a deletion request. The company is based in Europe and must comply with GDPR. The only data collected is the email address 052419i75@gmail.com. How should the compliance analyst act?

- A. Delete the data regardless of where the customer is from
- B. Delete the data if the customer is from the EU
- C. Notify the legal team about a data compliance breach
- D. Do not delete the data - the email address is not considered PII

Answer: A

Explanation:

Under the General Data Protection Regulation (GDPR), an email address that can be linked to an individual is classified as personal data, regardless of whether it contains a real name. The regulation grants individuals the right to erasure, also known as the "right to be forgotten," when they request deletion of their personal data and no lawful basis for retention exists.

Because the company is based in Europe, GDPR applies to its data processing activities. Additionally, GDPR protections extend not

only to EU citizens but also to any individual whose data is processed by an EU- based organization, depending on context. Therefore, deletion should not be conditional on the customer's geographic location. Option A is incorrect because email addresses are considered personal data under GDPR. Option C is incomplete and misleading because GDPR obligations are not limited only to confirmed EU residents in this scenario. Option D may be appropriate if systemic noncompliance is identified, but the immediate and correct action is to honor the deletion request. Cybersecurity and compliance documentation emphasizes minimizing data retention and responding promptly to data subject requests. As no lawful justification for retaining the email exists, it must be deleted. Therefore, the correct action is to delete the data regardless of where the customer is from.

NEW QUESTION # 283

An analyst discovers that a legitimate security alert has been dismissed. Which signature caused this impact on network traffic?

- A. true positive
- B. false positive
- C. true negative
- D. false negative

Answer: D

Explanation:

A false negative occurs when an intrusion detection system (IDS) fails to detect and report actual malicious activity. This means that a legitimate security alert has been dismissed or overlooked, allowing potentially harmful traffic to pass through the network undetected. The impact of false negatives can be significant as they represent missed opportunities to stop or mitigate security threats.

References = Cisco documentation on security systems, such as IPS (Intrusion Prevention System), discusses the importance of accurately detecting malicious activity and the risks associated with false negatives, which include the failure to trigger alerts for actual attacks.

NEW QUESTION # 284

Refer to the exhibit.

No.	Time	Source	Destination	Protocol	Length	Info
14.	27.405297	192.168.1.83	192.168.1.80	HTTP	305	GET /news.php HTTP/1.1

40.	58.515011	192.168.1.83	192.168.1.80	HTTP	259	GET /login/process.php HTTP/1.1
40.	58.522942	192.168.1.80	192.168.1.83	HTTP	60	HTTP/1.0 200 OK (text/html)

A network administrator is investigating suspicious network activity by analyzing captured traffic. An engineer notices abnormal behavior and discovers that the default user agent is present in the headers of requests and data being transmitted. What is occurring?

- A. indicators of denial-of-service attack due to the frequency of requests
- B. cache bypassing attack: attacker is sending requests for noncacheable content
- C. indicators of data exfiltration HTTP requests must be plain text
- D. garbage flood attack attacker is sending garbage binary data to open ports

Answer: B

Explanation:

The presence of a default user agent in the headers of requests and data being transmitted suggests a cache bypassing attack. In this scenario, the attacker is likely requesting noncacheable content to avoid detection by caching mechanisms that could otherwise

identify and block malicious traffic.

NEW QUESTION # 285

.....

Our 200-201 study materials are compiled and verified by the first-rate experts in the industry domestically and they are linked closely with the real exam. Our products' contents cover the entire syllabus of the exam and refer to the past years' exam papers. Our test bank provides all the questions which may appear in the real exam and all the important information about the exam. You can use the practice test software to test whether you have mastered the 200-201 Study Materials and the function of stimulating the exam to be familiar with the real exam's pace, atmosphere and environment. So our 200-201 study materials are real-exam-based and convenient for the clients to prepare for the exam.
