Every year, countless GARP aspirants face challenges to prove their skills and knowledge by attempting the GARP SCR certification exam. Once they pass this examination, lucrative job opportunities in the tech industry await them. But fear not! DumpStillValid has got you covered with their collection of real and updated SCR Exam Questions. These affordable SCR questions are available in three user-friendly formats, ensuring a smooth and efficient preparation experience for the SCR exam.

GARP SCR Certification Exam is becoming increasingly important as sustainability and climate change are becoming major considerations for businesses and organizations around the world. SCR exam is designed to help individuals demonstrate their expertise in this critical area, and to provide organizations with a way to identify and hire individuals with the necessary skills and knowledge to manage sustainability and climate risk. Sustainability and Climate Risk certification is recognized globally and is highly valued by employers in the financial services industry.

The SCR Certification is a globally recognized credential that is highly valued in the financial industry. It is a clear indication of a professional's commitment to sustainability and climate risk management, and it demonstrates their ability to apply best practices in these areas. Sustainability and Climate Risk certification is also a valuable tool for organizations looking to hire professionals with expertise in sustainability and climate risk, as it provides a clear benchmark for evaluating candidates.

These tools assist you in assessing your ability and identifying areas for improvement to pass the GARP Sustainability and Climate Risk exam.

GARP Sustainability and Climate Risk Sample Questions (Q45-Q50):

NEW QUESTION # 45

The risk team at an agricultural company in Eastern Europe evaluates crop yield production performance. The evaluation reveals high temperature and water shortages will likely harm crop production, and current company insurance will not mitigate this exposure. The team recommends increasing coverage by purchasing an additional insurance policy that includes area yield protection. According to the COSO ERM framework, which risk response strategy did the team recommend?

- A. Pursuit
- B. Reduction
- C. Acceptance
- **D. Sharing**

Answer: D

NEW QUESTION # 46

An international hotel chain reviews progress on sustainability goals in preparation for an Earth Day marketing campaign. A sustainability director suggests the hotel highlight how its energy and food sustainability initiatives align with UN SDG targets. Which of the following correctly describes an SDG target that the hotel could align with?

- A. By 2030 double the rate of energy efficiency improvements.
- B. By 2050 double the share of renewables in the energy mix.
- C. By 2030 reduce GHG emissions to half of 2000 levels.
- **D. By 2050 reduce per capita food waste by half.**

Answer: D

NEW QUESTION # 47

A timber products company in the southeastern US plants, manages, and harvests a species of trees with a 30- year growth cycle. Prior to a planting cycle, the risk management team measures company exposure to stranded asset risk. Which of the following will the team most likely use to measure stranded asset exposure risk to the company?

- A. Timeframe before timber assets are written off
- B. Projected quality of timber products at forest maturity
- C. Short-term consumer preference shifts toward alternative products
- **D. Stringency of carbon regulations in timber farm locations**

Answer: D

NEW QUESTION # 48

A major hurricane extensively damages the electrical infrastructure of a utility company. To improve the utility's risk management, the risk director prepares a strategy plan and incorporates climate risk considerations within the existing risk management framework. Which recommendation should the director make to incorporate climate risk into the framework's risk identification component?

- **A. Examine the transmission channels of climate risk drivers into financial risk to determine which risks are likely to materialize for the utility.**
- B. Flag any substantial changes in the utility's external environment to trigger a modification of the risk management process.
- C. Rate risks on impact and level of control to focus on risks with the most severe impact but over which the utility has the most control to improve outcomes.
- D. Evaluate the vulnerability and adaptive capacity of facilities using data gathered on the scope of climate risks.

Answer: A

NEW QUESTION # 49

A climate scientist develops a presentation on modern climate change for a group of policymakers.

What observation does the scientist include in the presentation that provides evidence of human attribution to current climate change?

- A. Glacial ice records indicate atmospheric CO₂ increased by 135 parts per thousand since the Industrial Revolution.
- B. In the past 100 years, the atmospheric lifetime of CO₂ attributed to energy use increased.
- C. In the past 200 years, CO₂ is responsible for most negative radiative forcing.
- **D. Atmospheric CO₂ with isotopes consistent with fossil fuel emissions have increased since the mid-20th century.**

Answer: D

NEW QUESTION # 50

.....
