最新的 Pega CSA PEGACPSA24V1 免費考試真題 (Q240-Q245):

問題 #240

Which best practice helps ensure that application bugs are resolved efficiently?

- A. Escalating all minor bugs immediately
- B. Assigning all bugs to a single work queue
- C. Delaying bug resolution until after testing
- **D. Prioritizing defects based on impact**

答案：D

解題說明：

Prioritizing defects based on impact ensures that critical issues are addressed first, improving application stability and performance. Assigning all bugs to one work queue or delaying resolution reduces efficiency.

問題 #241

Which two Pega components are used to display data in a tabular format? (Choose Two)

- A. Repeat Layout
- B. SLA Timer
- C. Work Queue
- D. Grid

答案: A,D

解題說明:

A Grid displays structured tabular data, such as customer lists or transaction histories, retrieved from a Data Page. A Repeat Layout is used to dynamically iterate over multiple data records. These UI components ensure clear data presentation. They enhance case visibility and usability.

問題 #242

Which step allows a parent case to wait until all child cases reach a defined status?

- A. Escalation Trigger
- B. Wait for Child Case
- C. Case Resolution Rule
- D. SLA-Based Routing

答案: B

解題說明:

A Wait for Child Case step ensures that the parent case remains paused until all child cases meet a defined status. This guarantees that necessary work is completed before further processing. It is useful in order processing, contract approvals, and compliance workflows. This ensures dependencies are respected in case progression.

問題 #243

Which setting ensures that a field is always required before submission?

- A. Required Property
- B. Work Queue Processing
- C. Case Escalation
- D. SLA Goal

答案: A

解題說明:

The Required Property enforces that a field must be filled before form submission, preventing incomplete data entry. This ensures data integrity and reduces errors. SLA goals, work queues, and case escalations do not control field requirements.

問題 #244

Which two actions can users perform using the Explore Data landing page? (Choose Two)

- A. Create new Insights
- B. Assign cases to work queues
- C. Modify SLA deadlines
- D. Apply filters and groupings

答案: A,D

解題說明:

The Explore Data landing page allows users to create and customize Insights by applying filters and groupings to refine data. These features help generate meaningful business reports. Assigning cases to work queues and modifying SLAs are workflow-related actions and not part of Insights.

問題 #245
