Palo Alto Networks Cloud Security Professional Sample Questions (Q11-Q16):

NEW QUESTION # 11

An administrator of Prisma Cloud wants to enable role-based access control for Docker engine.

Which configuration step is needed first to accomplish this task?

- A. Set Docker's listener type to TCP.
- B. Configure Defender's authentication sequence to first use an identity provider and then Console.
- **C. Set Defender's listener type to TCP.**
- D. Configure Docker's authentication sequence to first use an identity provider and then Console.

Answer: C

NEW QUESTION # 12

An administrator has added a Cloud account on Prisma Cloud and then deleted it.

What will happen if the deleted account is added back on Prisma Cloud within a 24-hour period?

- A. New alerts will be generated.
- B. No alerts will be displayed.
- C. Existing alerts will be marked as resolved.
- **D. Existing alerts will be displayed again.**

Answer: D

Explanation:

When an administrator adds a Cloud account to Prisma Cloud and then deletes it, if the deleted account is added back to Prisma Cloud within a 24-hour period, the existing alerts associated with that account will be displayed again. This behavior ensures continuity in monitoring and alerting, allowing security teams to retain visibility into potential security issues or compliance violations associated with the cloud account. Re-displaying existing alerts helps maintain a consistent security posture and ensures that no critical alerts are overlooked during the re-addition process.

NEW QUESTION # 13

Which three platforms support the twistcli tool? (Choose three.)

- **A. Linux**
- B. Solaris
- **C. Windows**
- D. Android
- **E. MacOS**

Answer: A,C,E

Explanation:

The twistcli tool, part of Prisma Cloud's suite of security tools, supports various platforms for security scanning and configuration. The correct platforms supported by twistcli include:

- * A. Linux: twistcli is widely used on Linux platforms for scanning container images, host vulnerabilities, and more, making it a correct choice.
- * B. Windows: twistcli supports Windows, allowing users to perform security scans and checks on Windows-based systems, making it a correct choice.
- * D. MacOS: twistcli is also compatible with MacOS, enabling security operations on Apple's operating system, making it a correct choice. Option C (Android) and E (Solaris) are not supported platforms for the twistcli tool, according to the available documentation on Prisma Cloud.

NEW QUESTION # 14

NEW QUESTION # 15

What are two built-in RBAC permission groups for Prisma Cloud? (Choose two.)

- A. Account Group Read Only
- B. Account Group Admin
- C. Group Membership Admin
- D. Group Admin

Answer: B,C

Explanation:

Prisma Cloud includes built-in Role-Based Access Control (RBAC) permission groups to manage user access and permissions efficiently. Among the options, Group Membership Admin and Account Group Admin are two built-in RBAC permission groups. Group Membership Admins are responsible for managing user memberships within groups, while Account Group Admins have administrative privileges over specific account groups, allowing them to manage resources and policies within those groups. These roles help in delegating administrative tasks and enforcing the principle of least privilege.
