## Salesforce Certified Platform Sharing and Visibility Architect Sample Questions (Q69-Q74):

### NEW QUESTION # 69

Universal Containers has a Performance Feedback custom object (Private organization-wide default) used by customers to report any issues with delivery drivers. Feedback should not be visible to the driver, but any feedback records should be accessible to people above them in the Role Hierarchy, even when the driver changes managers.

Assuming managers have Read access to the Feedback object, which three steps are necessary to solve these requirements?

- **A. Remove Read permission on the Driver profile, have feedback ownership transferred to the driver's**
- B. Remove Read permission on the Driver profile, have feedback ownership transferred to the driver when feedback is submitted, and create an ownership-based sharing rule.
- C. Remove Read permission on the Driver profile, have feedback ownership transferred to the driver when feedback is submitted, and use the Role Hierarchy to give access to a driver's manager

**Answer: A**

### NEW QUESTION # 70

Universal Containers (UC) operates worldwide, with offices in more than 100 regions in 10 different countries, and has established a very complex Role Hierarchy to control data visibility. In the new fiscal year, UC is planning to reorganize the roles and reassign

account owners.

Which feature should an architect recommend to avoid problems with this operation?

- A. Skinny table
- B. Partition data using Divisions
- C. Parallel Sharing Rule recalculation

**Answer: C**

#### NEW QUESTION # 71

Universal Containers (UC) delivers training and courses to students and companies. UC is implementing a Salesforce Customer Community for its students granting them a Customer Community license. As part of the community requirements, UC asked to give students access to cases that are related to their account in the UC community.

What is the optimum sharing technique to achieve these requirements?

- A. Create a sharing set to share cases with the students.
- B. Use Apex sharing to share cases with the students.
- C. Create a sharing rule to share cases with the students.

**Answer: A**

#### NEW QUESTION # 72

Universal Containers (UC) operates worldwide, with offices in more than 100 regions in 10 different countries, and has established a very complex Role Hierarchy to control data visibility. In the new fiscal year, UC is planning to reorganize the roles and reassign account owners.

Which feature should an architect recommend to avoid problems with this operation?

- A. Deferred Sharing Recalculation
- B. Skinny table
- C. Partition data using Divisions

**Answer: A**

#### NEW QUESTION # 73

Universal Containers (UC) would like to store an encryption key within Salesforce for use in Apex code, but it does not want users to be able to see this confidential key. Users require the view setup permission.

How can UC securely store the confidential key?

- A. Create a custom metadata type that stores the encryption key. Make sure that only the admin profile has access to the custom metadata type so that end users cannot access the encryption key.
- B. Create a protected custom metadata type that stores the encryption key. Package the protected custom metadata type with its associated records in a managed package. Install the package in the production org.
- C. Create a protected custom metadata type that stores the encryption key. Package the protected custom metadata type with its associated records in an unlocked package. Install the package in the production org.

**Answer: B**

#### NEW QUESTION # 74

.....
