The learning material is open in three excellent formats, PDF, a desktop practice test, and a web-based practice test. SAP C\_S4CPB\_2502 Dumps is organized by experts while saving the furthest down-the-line plan to them for the SAP C\_S4CPB\_2502 Exam. The sans bug plans have been given to you all to drift through the SAP C\_S4CPB\_2502 certification exam.

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q45-Q50):

### NEW QUESTION # 45

You have assigned a deployment target in SAP Central Business Configuration, but have not yet completed the Confirm Scoping milestone.

Which of the following tasks can you complete? Note: There are 2 correct answers to this question.

- A. Rename the deployment target.
- B. Create a company code.
- C. Define the group currency.
- D. Assign a different deployment target.

**Answer: A,D**

### NEW QUESTION # 46

Where can you find packaged integration content if there is no SAP Best Practices content available?

- A. SAP BTP Cockpit
- B. SAP Extensibility Explorer
- C. SAP Fiori Apps Reference Library
- D. SAP Business Accelerator Hub

**Answer: D**

### NEW QUESTION # 47

In which type of extensibility is the SAP Business Technology Platform used to host a custom extension?

- A. Classic extensibility
- B. Key user extensibility
- C. Side-by-side extensibility
- D. Developer extensibility

**Answer: C**

### NEW QUESTION # 48

Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- A. Use the Test system to demonstrate SAP Best Practice processes.
- B. Define the organizational structure and chart of accounts.
- C. Conduct the Digital Discovery Assessment to identify extension requirements.
- D. Conduct the Fit-to-Standard analysis to gather configuration values.

**Answer: A,D**

Explanation:

Based on the SAP Activate methodology, the Explore phase is where consultants configure business processes based on the information gathered in the Fit-to-Standard workshops. The Fit-to-Standard analysis is conducted in a series of workshops and allows for validation of predefined scenarios agreed upon and to make room for enhancements or additional configuration required. To prepare for this workshop, it is recommended that teams get familiar with the SAP Best Practices content, including the process flows, test scripts with sample data, and other documentation available in SAP Best Practices Explorer. Consultants should also use the Test system to demonstrate SAP Best Practice processes and enable business users to run the end-to-end processes and identify any gaps. The other two activities, conducting the Digital Discovery Assessment and defining the organizational structure and chart of accounts, are part of the Prepare phase, not the Explore phase. References = SAP Activate - Explore Phase: Use Fit-to-Standard to confirm business process fit and identify gaps in your SAP S/4HANA Cloud Implementation, SAP Explore Phase Activities: Define Target BP and Architecture, SAP Activate Elements and Phases, Explaining the Explore Phase

#### NEW QUESTION # 49

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. On premise
- B. Platform as a Service
- C. Infrastructure as a Service
- D. Private Cloud
- E. Software as a Service

**Answer: A,B,D**

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:

\* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.

\* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

\* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

#### NEW QUESTION # 50

.....

For any candidate, choosing the C\_S4CPB\_2502 question torrent material is the key to passing the exam. Our study materials can fully meet all your needs: Avoid wasting your time and improve your learning efficiency. Spending little hours per day within one week, you can pass the exam easily.
