Prepare with Actual SAP C_CPI_2506 Exam Questions to Get Certified in First Attempt

The fact that SAP C_CPI_2506 questions are available in three different formats enables users to prepare according to their styles. To test out the C_CPI_2506 study material, you can download a free SAP C_CPI_2506 demo from ITexamReview. You receive 1 year of free C_CPI_2506 Questions updates and 24-hour customer service. To avoid disappointment and failure, purchase C_CPI_2506 exam preparation material and begin your SAP Certified Associate - Integration Developer (C_CPI_2506) exam preparation.

SAP Certified Associate - Integration Developer Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which of the following are markup languages that you can use to describe APIs? Note: There are 2 correct answers to this question.

- A. HTML
- B. CXML
- C. RAML
- D. OpenAPI

Answer: C,D

Explanation:

RAML and OpenAPI are markup languages that you can use to describe APIs. RAML stands for RESTful API Modeling

Language and is based on YAML. OpenAPI is a specification for describing RESTful APIs and is based on JSON or YAML. Both languages allow you to define the structure, parameters, responses, and documentation of your APIs. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 14

Where can you find more information about APIs, policies, and integrations?

- A. SAP Business Accelerator Hub
- B. Open Connectors capability within SAP Integration Suite
- C. Cloud Integration capability within SAP Integration Suite

Answer: A

Explanation:

You can find more information about APIs, policies, and integrations in the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central place where you can discover, explore, and consume pre-built integrations, APIs, and best practices for various business scenarios and industries. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 15

You want to build an architecture that is largely asynchronous. Which design do you use to exchange notifications between the partners involved?

- A. Hexagonal design
- B. Request-driven design
- C. Event-driven design
- D. Serverless design

Answer: C

Explanation:

You can use an OData adapter to implement a synchronous call to a remote HTTP API as an integration flow component. An OData adapter allows you to send and receive messages using the OData protocol. OData stands for Open Data Protocol and is a standard for exposing and consuming data over HTTP or HTTPS. You can use an OData adapter to communicate with OData services that support CRUD (Create, Read, Update, Delete) operations on resources. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 16

Which of the following does SAP Graph provide?

- A. Abstraction of business data for end users
- B. Unified view of SAP-managed business data
- C. Unified cache of SAP-managed business data

Answer: B

Explanation:

SAP Graph provides a unified API layer that offers a business-centric, semantically harmonized view of SAP-managed data across multiple SAP solutions (e.g., S/4HANA, SuccessFactors, Ariba).

It does not cache data; instead, it provides real-time access.

It is not only an abstraction for end users, but specifically designed as a unified view for developers and applications.

Thus, the correct answer is Unified view of SAP-managed business data.

NEW QUESTION # 17

Which SAP offering manages integrations across hybrid and multicloud environments?

- A. SAP process Orchestration manages integrations across hybrid and multicloud environments.
- B. SAP Cloud Platform Integration manages integrations across hybrid and multicloud environments.
- C. SAP Business Technology Platform manages integrations across hybrid and multicloud environments.
- **D. SAP Integration Suite manages integrations across hybrid and multicloud environments.**

Answer: D

Explanation:

SAP Integration Suite is the strategic integration platform-as-a-service (iPaaS) from SAP. It provides a comprehensive set of integration capabilities for hybrid and multicloud landscapes.

It connects on-premise SAP systems, cloud SAP solutions (e.g., S/4HANA Cloud, SuccessFactors, Ariba), and third-party applications.

It offers capabilities like Cloud Integration, API Management, Event Mesh, Open Connectors, and Integration Advisor to support various integration patterns.

SAP explicitly positions Integration Suite as the solution to manage end-to-end integrations across heterogeneous and distributed IT landscapes.

Other options:

SAP Cloud Platform Integration was the older name of Cloud Integration (now part of Integration Suite).

SAP Process Orchestration is the legacy on-premise middleware and not designed for multicloud/hybrid environments.

SAP BTP is the overall platform; integration is only one capability within it.

NEW QUESTION # 18

.....

If you haplessly fail the C_CPI_2506 exam, we treat it as our blame then give back full refund and get other version of practice material for free. In contrast we feel as happy as you are when you get the desirable outcome and treasure every breathtaking moment of your review.
