Salesforce Salesforce-Slack-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">App Administration: This section evaluates the skills of Slack Administrators in managing applications within Slack. Candidates will summarize the value of interoperability for both decision-makers and end-users while learning to use Workflow Builder for automating tasks.
Topic 2	<ul style="list-style-type: none">Security: This domain targets Salesforce Security specialists in identifying Slack product security features that meet organizational needs. Candidates will describe how Slack addresses security governance, risk management, and compliance while recommending features that protect sensitive data.
Topic 3	<ul style="list-style-type: none">Workspace Administration: This domain assesses the competencies of Salesforce administrators in creating and managing Slack workspaces to meet organizational needs. Candidates will determine when a new workspace should be created and manage the approval process for workspace creation.

Salesforce Certified Slack Administrator Sample Questions (Q109-Q114):

NEW QUESTION # 109

Your company is on the Slack Business+ plan and is interested in setting up SCIM provisioning in their identity provider (IdP) to more efficiently manage their Slack user base.

Which two benefits would the company gain from using SCIM provisioning? (Select the TWO best answers.)

- A. They can pre-provision Multi-Channel and Single-Channel Guests to their workspace.
- B. They do not have to pre-provision any users; employees will automatically create an account when they attempt to log in for the first time.
- C. They can sync custom profile fields to obtain more useful analytics about employees' Slack usage.
- D. Users only need to remember one set of credentials for all the applications they use.
- E. They can deactivate users automatically from their IdP.

Answer: A,E

Explanation:

SCIM provisioning offers two major benefits:

"Automatically deactivating user accounts when they are deactivated in the identity provider (IdP)."

"Pre-provisioning Multi-Channel and Single-Channel Guests in Slack."

SSO (Option B) relates to authentication, not provisioning. Automatic account creation upon login (Option D) is tied to Just-in-Time (JIT) provisioning with SSO, not SCIM.

(Reference: Slack Administration Study Guide - SCIM Provisioning Benefits)

NEW QUESTION # 110

You're a Workspace Admin for AcmeTesting Inc., which has standard prefixes: help-, proj-, and announcements-.

What is an appropriate channel name within the AcmeTesting Sales workspace?

(Select the best answer)

- A. #acme-sales proj finance
- B. #announcements-team
- C. **#help-finance**
- D. #sales-help-services

Answer: C

Explanation:

Slack recommends:

"Channel names should follow consistent naming conventions and use hyphens between words, e.g., help-finance for a help-related finance channel." Option A incorrectly reverses prefix order. Option B uses incorrect formatting. Option D misuses the prefix format as well.

(Reference: Slack Administration Study Guide - Channel Naming Conventions)

NEW QUESTION # 111

You're a Workspace Owner on the Slack Business* plan. Your company receives a report indicating the leak of trade secrets and needs to conduct an urgent investigation by reviewing Slack content in your public channels.

What is the best way to quickly handle this request?

(Select the best answer.)

- A. Use the Discovery API to export the required public channel data.
- B. Contact Slack, and apply to export data from all channels and conversations, including private channels and direct messages (DMs).
- C. Contact Slack, and request access to export the required public channel data.
- D. Use the import/Export Data tool under workspace settings to export the required public channel data.

Answer: D

NEW QUESTION # 112

Your organization is on the Slack Enterprise Grid plan.

What are three benefits of syncing identity provider (IdP) groups?

(Select the THREE best answers.)

- A. Automatically assigns approved apps to certain groups within your org.
- B. Automatically adds or removes members of an IdP group to workspaces within your org.
- C. Makes membership for certain channels required to ensure that all members of an IdP group remain members of a channel.
- D. Makes membership for certain workspaces required to ensure that all members of an IdP group remain members of a workspace.
- E. Automatically assigns system roles.
- F. Automatically assigns admin roles.

Answer: B,C,D

Explanation:

Slack's Enterprise Grid documentation clearly states:

"Syncing IdP groups with Slack allows you to automatically manage workspace membership, channel membership, and access control based on IdP group assignments." Key benefits include:

- * Automatically provisioning and deprovisioning members to specific workspaces (A).
- * Maintaining mandatory membership in designated channels (B).
- * Maintaining mandatory membership in designated workspaces (C).

Assigning system roles, approved apps, or admin roles (D, E, F) is not automatically handled through IdP group syncing.

(Reference: Slack Administration Study Guide - Identity and Access Management)

NEW QUESTION # 113

You are a Workspace Admin in your organization's Slack Pro instance.

A terminated user is still active because Okta (your IdP) is down.

Which immediate steps should you take?

- A. Ask your IT team and Primary Org Owner to contact both Okta and Slack customer service right away to address the technical issue.
- B. Deactivate the member's account in Slack settings, and ask the Human Resources (HR) team to notify you of any other employee updates until Okta is working again.
- C. Change the member's email to a dummy email and perform a force logout so they will not be able to log back in.
- D. Temporarily make the #general channel read-only, delete the offensive messages left by the member, and reach out to the member's previous manager.

Answer: B

Explanation:

Slack's immediate response guidance states:

"If SCIM provisioning is unavailable, Workspace Admins should manually deactivate users through Slack settings to immediately prevent access." Changing the email (A) is messy and not recommended. Making #general read-only (B) doesn't prevent broader access. Contacting support (D) is useful, but not immediate enough for stopping access.

(Reference: Slack Administration Study Guide - Managing User Access in Case of SCIM Outage)

NEW QUESTION # 114

Candidates who crack the Salesforce-Slack-Administrator examination of the Salesforce Salesforce-Slack-Administrator certification validate their worth in the sector of information technology.
