## Questions C\_BCBDC\_2505 Exam, Valid C\_BCBDC\_2505 Exam Tips

Don't waste further time and money, get real SAP Certified Associate - SAP Business Data Cloud (C\_BCBDC\_2505) pdf questions and practice test software, and start SAP Certified Associate - SAP Business Data Cloud (C\_BCBDC\_2505) test preparation today. VCETorrent will also provide you with up to 1 year of free SAP Certified Associate - SAP Business Data Cloud

exam questions updates.

## SAP Certified Associate - SAP Business Data Cloud Sample Questions (Q15-Q20):

### NEW QUESTION # 15

Which automatically created dimension type can you delete from an SAP Analytics Cloud analytic data model?

- A. Organization
- **B. Generic**
- C. Version
- D. Date

**Answer: B**

Explanation:

In an SAP Analytics Cloud (SAC) analytic data model, you typically have a degree of flexibility in managing dimensions. Among the automatically created dimension types, the Generic dimension can often be deleted if it's not relevant or desired for your analysis. Generic dimensions are often generated by the system based on identified data patterns but might not always align with specific business requirements or be redundant. In contrast, Date, Version, and Organization dimensions are fundamental and often system-critical, especially for planning models (Version, Organization) or time-based analysis (Date). These core dimensions are usually not freely deletable or are required by the system for specific functionalities. Therefore, for tailoring your analytic model to specific business needs, the ability to remove generic dimensions provides greater control and simplification.

### NEW QUESTION # 16

What is the purpose of SAP Datasphere in the context of SAP Business Data Cloud?

Please choose the correct answer.

Response:

- A. To transfer data to SAP Databricks for machine learning processing
- **B. To add semantically rich models to prepare data for analysis**
- C. To extract data from the SAP source systems
- D. To store data to create a data warehouse

**Answer: B**

### NEW QUESTION # 17

How does SAP Business Data Cloud support self-service analytics enablement?

Please choose the correct answer.

Response:

- A. By using SAP NetWeaver Gateway integration
- B. By embedding dashboards into Microsoft Excel
- C. By offering static reports through scheduled email
- **D. By exposing business-friendly models to SAP Analytics Cloud**

**Answer: D**

### NEW QUESTION # 18

You want to combine external data with internal data via product ID. Although the data may be inconsistent, such as the external data contains the letter "O" where the internal data contains the digit 0, you still want to combine them. Which artifact should you use for matching?

- **A. Intelligent Lookup**
- B. Graphical View
- C. Analytic Model
- D. Entity Relationship Model

**Answer: A**

Explanation:

When faced with the challenge of combining data from different sources where the matching keys (like "Product ID") are inconsistent or contain variations (e.g., "O" vs. "0"), the recommended artifact in SAP Datasphere for such fuzzy or approximate matching scenarios is an Intelligent Lookup. An Intelligent Lookup (D) leverages machine learning capabilities to identify and map records that are semantically similar but not exact matches. Unlike standard joins in graphical views or SQL views which require precise key matches, Intelligent Lookups can handle data quality issues, typos, and variations, allowing you to successfully link disparate records that would otherwise be missed. This is particularly valuable when integrating data from external systems or legacy sources where perfect data standardization is not feasible, ensuring a more comprehensive and accurate combined dataset for analysis.

#### NEW QUESTION # 19

What scripting language is used in the advanced story interface?

Please choose the correct answer.

Response:

- A. HTML5
- B. Python
- C. JavaScript

**Answer: C**

#### NEW QUESTION # 20

.....
