## H13-511\_V5.5 Test Book | Valid Exam H13-511\_V5.5 Braindumps

It is a truism that an internationally recognized H13-511\_V5.5 certification can totally mean you have a good command of the knowledge in certain areas. If you are overwhelmed by workload heavily and cannot take a breath from it, why not choose our H13-511\_V5.5 preparation torrent? We are specialized in providing our customers with the most reliable and accurate exam materials and help them pass their exams by achieve their satisfied scores. With our H13-511\_V5.5 practice materials, your exam will be a piece of cake.

## Huawei HCIA-Cloud Computing V5.5 Sample Questions (Q83-Q88):

### NEW QUESTION # 83

The reason why computing virtualization technology can improve application reliability is?

(Multiple choice)

- A. Use computer virtualization technology to automatically assign virtual machines hosting applications to physical hosts with sufficient resources
- B. The virtual machine hosting the application is decoupled from the hardware, and the virtual machine can be used to migrate between multiple physical hosts
- C. Use computing virtualization technology to enable multiple applications to run on a physical host at the same time
- D. Use computing virtualization technology to automatically adjust virtualization specifications

**Answer: A,B**

### NEW QUESTION # 84

In order to improve the information security of the confidential IT department, a company requires that only User1, User2, and User3 be allowed to access the company's network through a certain switch. Administrators can configure MAC address-based VLAN division on the switch, and The MAC addresses of User1, User2, and User3 are bound to VLANs to meet this requirement.

- A. False
- B. True

**Answer: B**

### NEW QUESTION # 85

Which of the following descriptions about storage virtualization is correct? (Multiple choice)

- A. Storage virtualization is to abstract storage devices into data storage. Virtual machines are stored in directories as a group of files in data storage. Data storage is a logical container, similar to a file system. It hides the characteristics of each storage device. and provide a unified model for storing virtual machine files
- B. The advantage of storage virtualization based on storage devices is that it does not occupy host resources and has rich data management functions
- C. It is difficult to implement host-based storage virtualization, and the cost of equipment is high
- D. Storage virtualization refers to adding a logical layer to the storage device, and users access or adjust storage resources through the logical layer to improve storage utilization.

**Answer: A,B,D**

### NEW QUESTION # 86

Which of the following descriptions about OpenStack is wrong?

- A. Virtualization resources can be allocated and scheduled according to user needs, and allocated to different businesses and applications
- B. OpenStack can independently implement resource access and abstraction without relying on the underlying virtualization software
- C. The underlying virtualization resources are managed through the coordination of various component services, and the usage is flexible
- D. OpenStack is an open source cloud platform operating system

**Answer: B**

### NEW QUESTION # 87

Which of the following descriptions about KVM is wrong?

- A. KVM is a kernel-based virtual machine that runs on the Linux operating system

- B. KVM needs the DomianO virtual machine to schedule hardware resources
- C. The KVM virtual machine exists as a process on the operating system
- D. KVM supports hardware-assisted virtualization

**Answer: B**

## NEW QUESTION # 88
