

100% Pass 2026 MB-500: High Pass-Rate Microsoft Dynamics 365: Finance and Operations Apps Developer Online Bootcamps

P.S. Free & New MB-500 dumps are available on Google Drive shared by Actualtests4sure: <https://drive.google.com/open?id=11yY30FrSsuG3e57OjvRwz7pLulqU9PM>

Do you want to pass the Microsoft MB-500 exam better and faster? Then please select the Actualtests4sure. It can help you achieve your dreams. Actualtests4sure is a website that provide accurate exam materials for people who want to participate in the IT certification. Actualtests4sure can help a lot of IT professionals to enhance their career blueprint. Our strength will make you incredible. You can try a part of the questions and answers about Microsoft MB-500 Exam to test our reliability.

The meaning of qualifying examinations is, in some ways, to prove the candidate's ability to obtain qualifications that show your ability in various fields of expertise. If you choose our MB-500 learning guide materials, you can create more unlimited value in the limited study time, through qualifying examinations, this is our MB-500 Real Questions and the common goal of every user, we are trustworthy helpers, so please don't miss such a good opportunity. The acquisition of MB-500 qualification certificates can better meet the needs of users' career development.

Ace the Microsoft MB-500 Exam preparation material with Three Formats

Our Microsoft MB-500 exam prep have inspired millions of exam candidates to pursue their dreams and motivated them to learn more high-efficiently. Our Microsoft MB-500 practice materials will not let your down. To lead a respectable life, our experts made a rigorously study of professional knowledge about this exam. We can assure you the proficiency of our Microsoft MB-500 Exam Prep.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q273-Q278):

NEW QUESTION # 273

You have the following code:

```
public void CompareValues ()
{
    Date myDate = str2date('01/08/1901', 123);
    boolean result1, result2, result3;
    result1 = (myDate + 1 == str2date('02/08/1901', 123));
    result2 = (int2str(real2int(myDate)) + 1 == str2date('02/08/1901', 123));
}
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
The value of result1 = true	<input type="radio"/>	<input type="radio"/>
The value of result2 = true	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statement	Yes	No
The value of result1 = true	<input checked="" type="radio"/>	<input type="radio"/>
The value of result2 = true	<input type="radio"/>	<input checked="" type="radio"/>

Explanation

Statement	Yes	No
The value of result1 = true	<input checked="" type="radio"/>	<input type="radio"/>
The value of result2 = true	<input type="radio"/>	<input checked="" type="radio"/>

Box 1: Yes

Add 1 to a date adds one day.

Box 2: No

You cannot do a real2int conversion on a Date.

NEW QUESTION # 274

A company uses Dynamics 365 Finance.

You implement an extension of a method named calc in ClassA. The calc method:

- * Accepts an integer as an input parameter.
- * Returns an integer as an output parameter.

You must implement an extension to:

- * Extend the calc method.
- * Prevent the standard code from running if the value of the input parameter is greater than 10- You need to implement the correct solution. Which code segment should you use?

```

public int calc(int _value)
{
    int ret = next calc(_value);
    if (_value > 10)
    {
        throw error('The value cannot be greater than 10.');
```

- A.

```

public int calc(int _value)
{
    if (_value > 10)
    {
        throw error('The value cannot be greater than 10.');
```
- B.

```

public int calc(int _value)
{
    int ret;
    if (_value <= 10)
    {
        ret = next calc(_value);
    }
    return ret;
}
```

- C.

```

public int calc(int _value)
{
    int ret;
    if (_value <= 10)
    {
        ret = next calc(_value);
    }
    return ret;
}
```
- D.

```

public int calc(int _value)
{
    if (_value > 10)
    {
        throw error('The value cannot be greater than 10.');
```

```

public int calc(int _value)
{
    if (_value > 10)
    {
        throw error('The value cannot be greater than 10.');
```

Answer: A

NEW QUESTION # 275

A company uses Dynamics 365 Finance.

You must use QueryBuilder classes to implement a query that loops through all customers for whom the customer group equals EXT. You need to implement the query. You declare and initialize a query Object.

You need to run the query.

in which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Declare a QueryBuildRange object and add a range for the CustGroup field on the QueryBuildDataSource.
- Declare a QueryBuildDataSource object. Call the addDataSource method on the query object and assign it to the QueryBuildDataSource by using CustTable.
- Add a value to range for the CustGroup EXT to the QueryBuildRange object.
- Loop through the QueryRun object by using the next method.
- Declare and initialize the QueryRun object by using the query object.

Answer area

- 1
- 2

Answer:

Explanation:

Answer Area

1. Declare a QueryBuildDataSource object. Call the addDataSource method on the query object and assign it to the QueryBuildDataSource by using CustTable.
2. Add a value to range for the CustGroup EXT to the QueryBuildRange object.
3. Loop through the QueryRun object by using the next method.
4. Declare and initialize the QueryRun object by using the query object.

1 - Declare a QueryBuildDataSource object. Call the addDataSource method on the query object and assign it to the

QueryBuildSource by using CustTable.

2 - Add a value to range for the CustGroup EXT to the QueryBuildRange object.

3 - Loop through the QueryRun object by using the next method.

4 - Declare and initialize the QueryRun object by using the query object.

NEW QUESTION # 276

HOTSPOT

You are creating a Dynamics 365 Finance and Operations report. You cannot query the data for the report directly.

You must include parameters to specify data for the report.

You need to create the report.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area	
Which type of class should you create to pass parameters to the report?	<div><div></div><div>Data contract class</div><div>Report data provider class</div><div>Report controller class</div><div>Report UI builder class</div></div>
Which type of class should you create to access and process the data for the report?	<div><div></div><div>Data contract class</div><div>Report data provider class</div><div>Report controller class</div><div>Report UI builder class</div></div>
Which attribute should you use to identify the class that defines report variables?	<div><div></div><div>DataContractAttribute</div><div>DataMemberAttribute</div><div>SysOperationContractProcessingAttribute</div><div>SysOperationGroupAttribute</div></div>
Which attribute should you use to identify parm methods to send data for the report?	<div><div></div><div>DataContractAttribute</div><div>DataMemberAttribute</div><div>SysOperationContractProcessingAttribute</div><div>SysOperationGroupAttribute</div></div>
Which attribute should you use to define the contract class for a provider class?	<div><div></div><div>SRSReportQueryAttribute</div><div>SRSReportParameterAttribute</div><div>SRSReportDataProviderBase</div></div>

Answer:

Explanation:

Answer Area

Which type of class should you create to pass parameters to the report?

	▼
Data contract class	
Report data provider class	
Report controller class	
Report UI builder class	

Which type of class should you create to access and process the data for the report?

	▼
Data contract class	
Report data provider class	
Report controller class	
Report UI builder class	

Which attribute should you use to identify the class that defines report variables?

	▼
DataContractAttribute	
DataMemberAttribute	
SysOperationContractProcessingAttribute	
SysOperationGroupAttribute	

Which attribute should you use to identify parm methods to send data for the report?

	▼
DataContractAttribute	
DataMemberAttribute	
SysOperationContractProcessingAttribute	
SysOperationGroupAttribute	

Which attribute should you use to define the contract class for a provider class?

	▼
SRSReportQueryAttribute	
SRSReportParameterAttribute	
SRSReportDataProviderBase	

Explanation:

Box 1: Data contract class

A data contract class defines the parameters for a report that is bound to a report data provider (RDP) class.

You can specify one or more groups of report parameters, the order of the groups, and the order in which the report parameters appear in a print dialog box.

Box 2: Report data provider class

Report data provider class - processes business logic based on parameters and a query, and then returns the tables as a dataset for the report.

Box 3: DataContractAttribute

DataContractAttribute - This attribute is applied to an X++ class and specifies that the class can be used as a data contract (that it should be serialized).

Box 4: DataMemberAttribute

DataMemberAttribute - This attribute is applied to a parm (parameter) method on an X++ data contract class and specifies that the data member should be serialized.

Box 5: SRSReportParameterAttribute

You set the SRSReportParameterAttribute attribute to the data contract you created for the RDP class.

Reference:

<https://docs.microsoft.com/en-us/dynamicsax-2012/appuser-itpro/how-to-use-a-report-data-provider-class-in-a-report>

NEW QUESTION # 277

You are a Dynamics 365 Finance and Operations developer.

Users are experiencing slower load times for the All Customers form.

You need to update caching for CustTable to improve data retrieval times.

How should you configure CacheLookup properties? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Property	Value
Set-based caching	<div>▼</div> <div>Entire table</div> <div>None</div> <div>Found</div> <div>FoundandEmpty</div>
Single-record caching	<div>▼</div> <div>Found</div> <div>Entire table</div> <div>None</div> <div>SurrogateKey</div>

Answer:

Explanation:

Property	Value
Set-based caching	<div>▼</div> <div>Entire table</div> <div>None</div> <div>Found</div> <div>FoundandEmpty</div>
Single-record caching	<div>▼</div> <div>Found</div> <div>Entire table</div> <div>None</div> <div>SurrogateKey</div>

Explanation

Property	Value
Set-based caching	<div>▼</div> <div>Entire table</div> <div>None</div> <div>Found</div> <div>FoundandEmpty</div>
Single-record caching	<div>▼</div> <div>Found</div> <div>Entire table</div> <div>None</div> <div>SurrogateKey</div>

Box 1: Entire table

In Microsoft Dynamics AX, groups of records can be cached all at once with set-based caching. Set-based caching can be implemented in two ways:

At design time, by setting the table's CacheLookup property to EntireTable.

In code, by using the RecordViewCache class.

Box 2: Found

Record caching is enabled for a table when all the following statements are true:

The CacheLookup property on the table is enabled by setting it to one of the following values:

NotInTTS, Found, FoundAndEmpty.

The record buffer disableCache method has not been called with a parameter of true.

Reference:

NEW QUESTION # 278

.....

Actualtests4sure is regarded as an acclaimed MB-500 dumps study material provider for certification exams that includes a range of helping materials, programs and pathways to ease your tensions of MB-500 exam preparation. The prime objective in developing MB-500 exam dumps is to provide you the unique opportunity of getting the best information in the possibly lesser content. It not only saves your time but also frees you from the hassle of going through tomes of books and other study material. Shorn of unnecessary burden, you better focus what is extremely important to pass exam; hence you increase your chances of success with MB-500 Exam Questions than other that of candidates.

MB-500 Latest Dumps Ebook: <https://www.actualtests4sure.com/MB-500-test-questions.html>

Besides, we have the skilled professionals to compile and verify the MB-500 exam braindumps, they have covered most knowledge points of the exam. It is convenient for you to download the free demos of our MB-500 learning guide, all you need to do is just to find the "Download for free" item, and you will find there are three kinds of versions of MB-500 learning materials for you to choose from namely, PDF Version Demo, PC Test Engine and Online Test Engine, you can choose to download any one as you like. The reason why the PDF version of our MB-500 latest free pdf is well received by the general public is mainly attributed to the following two aspects.

Social events, clubs, and classes are all places where MB-500 you can meet and connect with people. His research group is also well known for their development of exploits against software security, including cracking MB-500 New Dumps encryption, passwords and infiltrating protected networks via novel attacks against software defenses.

Authentic Microsoft MB-500 Dumps PDF - The Best Way To Pass Exam

Besides, we have the skilled professionals to compile and verify the MB-500 Exam Braindumps, they have covered most knowledge points of the exam. It is convenient for you to download the free demos of our MB-500 learning guide, all you need to do is just to find the "Download for free" item, and you will find there are three kinds of versions of MB-500 learning materials for you to choose from namely, PDF Version Demo, PC Test Engine and Online Test Engine, you can choose to download any one as you like.

The reason why the PDF version of our MB-500 latest free pdf is well received by the general public is mainly attributed to the following two aspects, Thirdly, we have three versions of MB-500 brain dumps.

Usually getting a MB-500 certification should pass several exams and passing score is above the average.
